American Railroad Journal.

New York Saturday, January 6, 1872.

EMIGRATION—PAST AND PRESENT.

Among the great improvements of the nineteenth century is the method for carrying emigrants across the ocean. In the past emigrants crossed the ocean in sailing ships, and were buffeted on the waves of the Atlantic ocean for sixty to ninety days, and finally settled in the West only after undergoing the hardships of the primitive mode of traveling on the Plains, and the danger of being attacked by the Indians. Steam has worked a wonderful revolution in the method of transportation, both on sea and land. Emigrants now cross the ocean in large and commodious steam-ships, and the passage occupies only ten to twelve days, and when they reach our shores, railroads carry them to their destination. It is a noteworthy fact that corporations to furnish increased facilities to emigrants are multiplying very fast, and the new year promises a large addition to the population of the West by the influence of emigrants from Europe. Emigrants in settling land now keep close to the line of railroads, especially those which form what are called trunk lines, and run through a fertile country. Previous to the construction of the Pacific Railroads, the route from St. Joseph to Fort Kearney was a favorite wagon road, and many emigrants settled permanently along this route. The evidences of this are plainly seen in the thriving and populous cities, towns and villages which dot this line, and also the many cultivated fields of grain which meet the eye in all directions. It is along this very route that the ST. JOSEPH AND DENVER CITY RAILROAD is now steadily approaching completion. The greater part of the road is built, and only a comparatively small portion of the Western Division remains to be constructed in order to materially shorten the distance between San Francisco and the East. The ST. JOSEPH AND DENVER CITY RAILROAD COMPANY has a land grant of 1,500,000 acres of land located in what is known as the GARDEN SPOT of the West. This land is being sold to actual settlers on easy terms of payment, and every encouragement is extended to emigrants to settle along the line of the road, which is destined to become one of the great trunk lines of the country. We are now offering the remainder of the FIRST MORTGAGE SINKING FUND LAND GRANT BONDS OF THE ST. JOSEPH AND DENVER CITY RAILROAD COMPANY Western Division, at 97½ and accrued interest in currency, from Aug. 15, 1871. The earnings of that portion of the road in active operation have more than equaled the expectations of the projectors of the enterprise, which, of itself, is a sufficient guaranty for the safety of the investment; but the land grant of the Company is estimated to be worth $18,000,000, and the money derived from land sales is devoted exclusively to the retirement of the bonds by the FARMERS' LOAN AND TRUST COMPANY, as trustees for the bondholders. The bonds have thirty years to run, bear interest at the rate of 8 per cent. per annum, payable in February and August of each year, and both interest and principal are payable in gold.

Our firm deal in the St. Joseph and Denver City Railroad Company's bonds the same as all other first-class securities; and those of the Eastern Division, which were placed by us at 97½, are now quoted at 101½ to 102½ and accrued interest. *These bonds have never sold as low as the subscription price since the loan was all taken. Thus investors in them have always been enabled to realize a handsome premium on the price originally paid, while receiving their interest-money, punctually. To parties about to reinvest their January interest, or who may desire to fund their 5-20 and other high-priced bonds, we recommend the above facts to their calm consideration.*

TANNER & CO.,
BANKERS, No. 11 WALL-ST.

Cincinnati and Terre Haute Railway.

General Hunter, of Indiana, recently addressed a meeting in the room of the Chamber of Commerce, in favor of the Cincinnati and Terre Haute Railway, a road which we have noticed as having just been begun. The object of this road is to pass from Terre Haute, through Clay, Greene, Monroe, and other counties, nearly or quite fifty miles south of the present road through Indianapolis, and especially through the iron and coal districts of Indiana. Probably no road of equal length can be devised from Cincinnati which will be equally beneficial to the trade of this city. The reasons are quite obvious; 1. There is no road through a large district of country in which this road will lie. All its trade should come to Cincinnati, but Gen. Hunter says only a small part really does. But it is a region so new and so closely connected with Cincinnati, that its whole trade ought to reach this city. As a local road through these counties, the Cincinnati and Terre Haute railway would bring all the business of that country. 2. It is a section containing very superior beds of iron ore. This fact was known half a century ago. The ore beds of Greene county were worked a short time about fifty years ago; but mining could not be carried on successfully for the very reason which has arrested the rapid increase of Cincinnati, the want of railroads (properly constructed) to the best iron and coal beds; and it is plain that Cincinnati can not have its former rapid progress till it does have such roads. 3 The road lies on one of the best coal beds in this country, the beds of block coal, and which are partially mined in Clay county. Now it is true, that about the same distance there are coal beds in Ohio, Kentucky and West Virginia as in Indiana, but there are great differences in the value of these coal beds as to quality and ease of transportation. The best coal beds which may be reached from Cincinnati by easy railroad transportation are those of Sunday creek (Perry county), of the Kanawha (West Virginia), and Clay county (Indiana), granting that the former may be reached as easily; yet it is plain that as Cincinnati extends over a great area, and is fast extending west beyond Mill creek, there will be a great advantage and probably greater cheapness, in supplying the

west side of the city from Indiana. Taking into view the obvious increase of trade, and the excellency of iron and coal beds, we are justified in our remark, that probably no local road can be made from Cincinnati which will be more profitable to the city. *Cincinnati—Railroad Record.*

Railroads in the United States.

The following tabulation shows the distribution of mileage and cost of railroads and equipments to the several geographical Sections, States and Territories of the Union:

Sections, States & Territories.	L'gth in Miles. Total.	Complete.	Cost of road & equipment.
Maine	923.86	872.86	$31,561,691
New Hampshire	1,021.75	797.32	26,750,817
Vermont	881.31	711.31	38,493,213
Massachusetts	1,810.96	1,641.96	90,822,022
Rhode Island	139.46	139.46	6,526,693
Connecticut	986.48	821.74	39,477,800
	5,763.82	4,984.65	$233,632,236
New York	6,196.28	4,252.93	$262,435,839
New Jersey	1,354.61	1,049.31	101,322,908
Pennsylvania	6,682 80	5,520.92	336,656,887
Delaware	227.69	207.69	6,280,771
Maryland (D. of Col.)	1,203.53	813.18	43,548,806
West Virginia	725.34	477.91	32,816,298
	16,390.25	12,321.94	$783,061,509
Virginia	2,167.49	1,478.29	$52,552,914
North Carolina	1,740.88	1,260.50	33,509,378
South Carolina	1,594.69	1,209.69	34,801,786
Georgia	3,087.89	2,157.39	53,475,352
Florida	764.20	461.20	15,245,000
	9,355.15	6,567.07	$189,584,430

Interior, East	3,129.69	2,616 79	111,950,739
Interior, West	2,303.00	2,726.79	101,684,895
Pacific slope	1,663.70	226.20	13,598,000
Total increase	11,017.40	8,188.80	$376,932,327

No previous annual period has been so active in construction, or so successful in bringing into use long lines of track, as the year 1871. At the commencement of that year there were in the whole Union 54,435.49 miles of track, and at the close 62,646.79 miles, showing an increase in the year of 8,211.30 miles. This length is exclusive of City Passenger Railroads, and also of a second track, sidings, &c. As great a mileage was built in 1871 as existed in all the Union in 1851.

By reference to the tables, herewith presented, it will be seen what sections of the country have been most active in construction. The great interior as far as the Rocky Mountains has increased 5,343.58 miles, or 65 per cent. of the total increase.

In the Eastern Seaboard States construction activity has been less marked, but there are several important works which were largely forwarded or brought to completion during the year. In Maine, the European and North American Railroad was opened through. In Maine, New Hampshire and Vermont, the Portland and Ogdensburg Railroad was almost completed and awaites the Spring to have it brought into use. In the lower New England States considerable has been accomplished, chiefly in short roads and new connections.

In New York the New York, and Oswego Midland Railroad has been pressed forward and will soon find its New Jersey connections, forming together a new and valuable short line between Lake Ontario and New York Harbor. The other accessions in this State are of minor importance.

The principal work in Pennsylvania has been the completion of the Pittsburg and Connellsville Railroad, an extension of the Baltimore and Ohio Railroad from Cumberland to Pittsburg. This road will eventually be carried west from Pittsburg to Chicago, the work having been organized under subsidy of the Baltimore and Ohio Company.

The several new roads pointing west towards or to the Pacific coast are in rapid progress. The Northern Pacific Company recently opened their main line in Minnesota and are now extending their works through Dakota. The have also commenced work on the Pacific terminus, anticipating to open 60 or 70 miles as soon as the snows disappear. The St. Paul Division of this road is now complete from St. Paul to Breckenridge. The St. Joseph and Denver City Railroad from St. Joseph to Fort Kearney will also be completed in early spring and give a supplementary line to the Pacific. Then further south, and with the ulterior design of carrying their road to the Pacific coast, we have the Atlantic and Pacific road completed some 40 miles into the Indian Territory, and in the same neighborhood, three lines penetrate from Kansas into the same territory and which at no distant day will connect with Texas lines reaching to the gulf ports and to the confines of Mexico. The Texas Pacific (International) Railroad also deserves mention in this notice. The company having it in charge have already opened 60 or 70 miles west from Hearne, and are working rapidly eastward and westward. Fine land-grants and a State subsidy in money are stimulating all concerned to carry the line (of which this is the S.W. portion) from the Mississippi River to the Gulf of Cortez. The line under control of this company will extend from Fulton, on the Red River, to Laredo on the Rio Grande, 600 miles.

Thus it appears that there is plenty of work cut out for the current year, and we may venture to assert that the close of 1872 (when the final statistics of that year are collected) will show at least 70,000 miles of completed road. We should not be surprised, indeed, if the mileage at that date should exceed that count. But much depends on circumstances—a money panic might insue, and in that case (as many of our great roads pass through sparsely populated territory, and especially those now under construction) more than ordinary disaster would overtake our rail interest. As farms are opened, and towns founded, however, all fear of such results will disappear. Let us be satisfied with the present, and the prospects it hold out without discounting the future.

The progress of railroad construction in the United States since 1827, in which year the Granite Railroad at Quincy, Mass., was inaugurated, to the present time is shown in the following table:

Year.	Miles open.	Yearly Increase.	Year.	Miles open.	Yearly Increase.
1827	3		1850	7,475	1,125
1828	3		1851	8,589	1,114
1829	28	25	1852	11,027	2,438
1830	41	13	1853	13,497	2,470
1831	54	13	1854	15,672	2,175
1832	131	77	1855	17,398	1,726
1833	576	445	1856	19,251	1,853
1834	762	186	1857	22,625	3,374
1835	918	156	1858	25,090	2,465
1836	1,102	184	1859	26,755	1,665
1837	1,431	329	1860	28,771	2,016
1838	1,843	412	1861	30,593	1,822
1839	2,220	477	1862	31,769	1,176
1840	2,797	577	1863	32,471	702
1841	3,319	522	1864	33,860	1,389
1842	3,877	558	1865	34,442	582
1843	4,174	297	1866	35,351	909
1844	4,311	137	1867	36,896	1,545
1845	4,522	211	1868	38,822	1,926
1846	4,870	348	1869	42,272	3,450
1847	5,336	466	1870	48,860	6,588
1848	5 682	346	1871	54,535	5,575
1849	6,350	668	1872	62,647	7,212

☞ From the Department of Agriculture we learn that the cotton returns received in December are similar in tenor to the November reports. A fair rendering of the recent local estimates have been unusually numerous and complete, gives a total aggregate of 3,400,000 bales as the present expectation of the cotton yield of 1871. The area in corn has been greater than in any former year. The estimate for 1870 was 1,094,000,000 bushels, being 220,000,000 more than that of the small crop of 1869; while a calculation of the local estimates of the present year gives a total product of 1,092,000,000.

Through Route from the Mississippi via Kentucky and Virginia.

There have been rumors of negotiations and consolidations touching the Louisville, Cincinnati and Lexington, one of the oldest roads in Kentucky, and one of the best-paying roads in the West, some of which have only a slight foundation in fact. This road, like many of the Southern roads, had a five-foot gauge, and was, therefore, cut off from such through traffic as could not be diverted from it by a change of cars. Nevertheless, in its capacity of a local road, its earnings for ten years back averaged $1,709 per mile; the gross receipts for the whole line of 171 miles being $948,748 for the fiscal year 1870, and for 1871 $995,425. Following the example of the Ohio and Mississippi and other roads, the company determined to change the gauge a few months since, which was accomplished in a single day, without interruption of traffic. This will enable the Cincinnati arm of the line to become a shorter and important link in a through line between Eastern cities and Louisville and points in the Southwest, by means of the new bridge at Cincinnati, which is to be ready in a short time.

The Louisville, Cincinnati and Lexington road spreads out in two arms, having their converging point near Louisville, and connecting the chief cities of Kentucky with the commercial metropolis of Ohio. The central arm passes through Frankfort, the State capital, to Lexington, in the central part of the State, through the famous blue-grass grazing region of Kentucky. This portion of the line is, in like manner, about to be made part of an important through line, connecting Louisville and all points West with the seaboard by a new and more favored route to the seaboard. The Lexington and Big Sandy Railroad Co. are pushing the construction of the incomplete gap, so as to be ready to take the through traffic from the Chesapeake and Ohio Railroad at their Big Sandy terminus and convey it by their very direct line to Louisville, as well as the very heavy return business bound eastward from Kentucky.

The Chesapeake and Ohio Company, it will be remembered, contains in its direction some of the most eminent names in American railroad management, among them Mr. C. P. Huntington, to whose exertions the great success of the Central Pacific is mainly due. This company have already made the bulk of their expenditures on the main line of the Chesapeake and Ohio, and are now awaiting the completion of two tunnels and some minor points of grading to complete their track from tide water to the Kentucky border. The Lexington and Big Sandy line is in substantially the same hands, and is part of the great enterprise, which will extend between Louisville and the Chesapeake Bay. The negotiations with the Louisville, Cincinnati and Lexington have resulted in securing to the Chesapeake and Ohio Company a controlling interest in the road, and hereafter the roads will be operated in harmonious co-operation. By means of the new bridge at Louisville, two lines of railroad (one of them still incomplete) will furnish the desired connections to St. Louis.

The grades, proximity of fuel, and equable climate are so favorable to economy of operation along this route that it must prove a very profitable line, as the vast quantities of tobacco, hemp, cotton, live-stock, provisions and the like, which now cross the Ohio river into Indiana and Ohio, on their way East will naturally be attracted to the Chesapeake and Ohio route, whereon the crossing of the Alleghanies is much easier, as well as more direct. For example, the distance from New York to St. Louis by this route is 1,150 miles, against 1,200 miles by the Erie and Atlantic and Great Western route, and 1,260 via the Lake Shore and Chicago route. To Nashville, Memphis and New Orleans the saving in linear distance is considerable and, if grades and curves be considered, the Chesapeake and Ohio route is the most direct of all. The cities of Cincinnati, Covington, Louisville and towns along these Kentucky extensions have an aggregate population of nearly half a million, together with one of the most fruitful territories in the world, and back and beyond them are the great valleys of the Mississippi and its tributaries. Eastward of the Kentucky line is the largest and one of the most valuable known deposits of coal and iron in the world, in the Kanawha Valley. The demand for these minerals at the West, alone may be reasonably expected to furnish a large traffic for these lines, East and West.—*N. Y. Daily Bulletin.*

Extension of Trade at Barrow-in-Furness.

It is rumored that the Duke of Devonshire and several capitalists who have vested interests in the prosperity of the new port of Barrow-in Furness have made arrangements to purchase the entire fleet of an old-established firm connected with Liverpool and Glasgow, whose steamers have for several years been engaged in the North American trade, chiefly with Canada. It seems that the communications, so far as they have gone, include the entire purchase of the present fleet, comprising some twenty steamers, and transferring them and all the establishment connected with them to Barrow-in Furness, the present owners being engaged for a certain number of years as managers. Barrow-in-Furness is the centre of the hematite ore district, and enormous docks, warehouses &c., have been constructed there for the purpose of making it the chief port of North Lancashire. Whether it will be possible to divert so suddenly an enormous trade in the face of the probable constant competition from both Liverpool and Glasgow remains to be seen. There is, however, plenty of money in the scheme, and as Barrow-in-Furness is connected by railways with all the chief towns and ports in the kingdom, it is just possible that if the capital is large enough to thoroughly develop the new port it will succeed. There are certain circumstances in connection with both Liverpool and Glasgow which have doubtless been considered by those interested in pushing the fortunes of Barrow. In Liverpool, owing to the enormous and rapid increase of the steam trade, the owners of steamers are constantly crying out for increased accommodation, and however willing the Mersey Docks and Harbor Board may be to increase the trade of the port, and with it their revenues, they are already at their wits' end to keep pace with the constant and often angry demands of the large companies who sail the enormous fleet of sea-going and coasting vessels from the Mersey. There are certain disadvantages connected with Glasgow as a port, including the dangerous navigation up the Channel and down the Clyde, and it is just possible that these disadvantages will serve the wishes of the Duke of Devonshire and his commercial partners interested in this Barrow-in-Furness scheme.—*Leeds Mercury.*

The above paragraph points to an enterprize which affords a significant indication of the advance of ideas in this age of progress. Twenty years ago not one person in a thousand in England could have said where Barrow or Furness was. Some very few antiquaries and archeoligists knew of Furness Abbey as a magnificent ruin of great extent. Some few, also, were aware that the region abounded with Iron, and that traces of very ancient smeltings of it were to be found in the vicinity. So far back as the tenth century the records of iron workings extended, and even the Romans were said to have smelted Iron there.

Something less than twenty years ago this industry had become a feature of the neighborhood; but even then was not of great importance or extent. When Mr. Bessemer found that the red Hematite of the region was precisely *the material* of which he had several years been in search to make his new method of steel-making a perfect success, from that moment the place sprung *into* notice with unexampled rapidity, and in a few years the desolate sandy waste has given place to a handsome flourishing town of over twenty thousand people, engaged not so much in the mining as in the smelting of the Iron, and its manufacture into Steel by the Bessemer process, the present year's production of which at the works of the Barrow Hematite Steel Company approximate closely 100,000 tons, while their Iron production will not be less than 350,000 tons of Pig Iron.

In 1868 the parties engaged in these industries formed, in conjunction with others of the landed proprietors, a company which has constructed spacious tidal docks, of which over 205 acres are completed; and a still larger extent is under way. The place is situated on Morecamb Bay—after Milford Haven, the finest Harbor in the West Coast of England—and already it has become a port of commercial importance; and it is not improbable, taking into account the enterprise, wealth, and energy of the several corporations, known as the Iron and Steel and Dock Companies—at whose heads are the Dukes of Devonshire and Buccleugh, that ere many years shall have passed, Barrow-in-Furness may take rank as competing with Liverpool for the carrying trade of England with the Western World.

Memphis and Little Rock Railroad.

We learn that the work of raising the embankment of the Memphis and Little Rock Railroad so as to protect the track entirely from overflow in the bottom lands, progresses rapidly; and the road bed from Hopefield to Madison will be completed in a few weeks.

The necessary repairs involved by the alteration of the guage have been completed, and the new rolling stock is arriving at Memphis.

By the first of March the Memphis and Little Rock Railroad will be among the best roads in every respect to be found in the Southwest.

Notwithstanding the delays which have been occasioned by the change of gauge, and these repairs, the trains have been run with astonishing regularity, and the traffic of the road is rapidly increasing.

The gross earnings from April 1st to Nov. 1st 1871, a period of seven months, amounted to $205,800, against $91,400, for a corresponding period in 1870.

Notwithstanding the fact that the freight transportation has rapidly increased, the amount transported does not represent one eighth of that which has been offered, and when it is understood that this business has been done with only four engines and thirty freight cars over a road 130 miles in length, and 40 miles of which have been in a miserable condition for over three months, the merchants in Little Rock and Memphis will be able to appreciate the difficulties that are being contended with by some of the best railroad men in the South.

President Tate probably has few superiors as a practical railroad man, and he has exerted every possible means to put his road in first-class order.

☞ The Shepaug Valley Railroad has been accepted by the commissioners, and trains are now running regularly between Litchfield and Hawleyville, making connections with trains both up and down the Housatonic Railroad.

Railroads of the United States.

A Tabular Statement showing the Length and Cost of each Work at the close of the financial year ending nearest to January 1, 1872.

(Not including City Passenger Railroads.)

State of Maine.

Area....31,776 sq. M. Population....626,915. Valuation....$202,990,319.

Indebtedness of Southern Railroads.

The following abstract from the Report of the Quartermaster General will show the exact indebtedness of the companies named to the U. S. Government on the 30th of June, 1871:

Name of Company.	Entire indebtedness to June 30, 1871.	Entire payments to June 30, 1871.	Net indebtedness June 30, 1871.
Alexandria, Loudoun and Hampshire	$82,263 38	$70,304 18	$11,959 20
Atlantic and North Carolina	62,494 08	62,494 08	.....
Alabama and Florida	27,109 04	15,728 23	11,380 81
Alabama and Chattanooga	41,530 92	22,773 29	18,757 63
East Tennessee and Georgia	516,596 08	140,590 57	376,005 51

New Orleans and Ohio	48,820 14	13,781 83	35,038 31
Pacific Railroad of Missouri	125,433 65	113,718 08	11,715 57
S. W. Branch of do.	57,115 24	1,000 00	56,115 24
Selma and Meridian	170,832 71	170,832 71	.....
Selma, Rome and Dalton	249,792 51	106,606 83	142,185 68
San Antonio and Mexican Gulf	65,827 93	65,827 93	.....
Washington, Alexandria and Georgetown	324 06	106 45	217 61
Total	$7,170,028 78	$2,445,678 25	$4,724,350 53

The Atlantic and North Carolina discharged its debt July 31, 1870; Macon and Brunswick did the same January 25, 1871; Selma and Meridian June 13, 1871; San Antonio and Mexican Gulf June 14, 1871. The amount paid by these four companies during the past fiscal year to accomplish that result was $86,563 89. The Washington, Alexandria and Georgetown paid in full August 16, 1871. Ten companies, viz.: Alexandria, Loudoun and Hampshire, Alabama and Florida, Alabama and Chattanooga, East Tennessee and Virginia, Mississippi and Tennessee, Memphis and Ohio, Memphis and Little Rock, Pacific Railroad of Missouri, Southwest Branch do., and the Selma, Rome and Dalton, have reduced their indebtedness during the year by $39,333 48. They also paid, on account of interest, $39,205 22, making their total payments $78,538 10.

The indebtedness of eleven companies—the East Tennessee and Georgia, Edgefield and Kentucky, Knoxville and Kentucky, McMinnville and Manchester, Mississippi, Gainesville and Tuscaloosa, Mobile and Ohio, Memphis, Clarksville and Louisville, Nashville and Chattanooga, Nashville and Northwestern, and New Orleans and Ohio—has increased $200,403 17. They have paid during the year, $31,393 87. The principal increase was owing to the fact that the Nashville and Chattanooga, Nashville and Northwestern, Nashville and Decatur, and the Memphis, Clarksville and Louisville roads paid only $7,362 79, while their interest amounted to $182,514 72. But the Nashville and Chattanooga and the Nashville and Decatur have performed mail service. The former has turned in its orders on the Postoffice Department for pay, and the latter is expected to do so.

The claim of the United States against the Nashville and Chattanooga road was compromised for $1,000,000, payable one-half in ten and one-half in twenty years from June 1st, 1871.

The following named roads discharged their entire indebtedness to the government previous to June 30, 1870: Richmond, Fredericksburg and Potomac, Georgia Railroad and Banking Company, Southwestern, Macon and Western, South Carolina, Muscogee, Petersburg, Memphis and Charleston, Mobile and Great Northern, New Orleans, Jackson and Great Northern, Mississippi Central, Virginia and Tennessee, Montgomery and West Point, Virginia Central, Rome, Western and Atlantic, Orange and Alexandria, Manassas Gap, Wilmington and Weldon, Alabama and Florida, New Orleans, Opelousas and Great Western, Norfolk and Petersburg, and Western North Carolina. Their total payments were $2,381,489 09.

During the year 1871 the Department disallowed the following claims of the roads against the United States for damages claimed to have been sustained during the war: Nashville and Chattanooga, $4,557,092 62; Nashville and Northwestern, $848,140 69; East Tennessee and Virginia, $751,200 07; East Tennessee and Georgia, $765,912 33.

Suits are pending against the East Tennessee and Georgia, East Tennessee and Virginia, Edgefield and Kentucky, Memphis, Clarksville and Louisville, Nashville and Chattanooga, Nashville and Northwestern, and New Orleans and Ohio. The suits are not pressed, however, the Attorney General being empowered under an act of the last Congress to compromise with the roads wherever an equitable adjustment can be made in that way.

Marine Losses.

The whole number of vessels belonging to or trading to ports in the United States reported totally lost and missing during the year 1871, as compared with the previous year, with their estimated value, are given in the following:

	1870. Vessels.	1870. Value.	1871. Vessels.	1871. Value.
January	37	$1,016,000	53	$1,461,000
February	32	753,000	34	1,071,000
March	36	1,448,000	30	771,000

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A dash (—) across the column signifies "nil," and running dots (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, January 6, 1872.

Stock Exchange and Money Market.

The New Year opened, as the old year closed, on an active Money Market, on the basis of from 7 per cent. in currency to the prominent Government houses, to 7 per cent. in gold and $\frac{1}{32}$@$\frac{1}{16}$ commission, to borrowers for speculative use at the Stock and Gold Exchanges. On the opening days of the New Year, the Banks and Banking Offices and Trust Companies were busily engaged paying January Dividends, and a large amount, in the aggregate, was paid out, but the money thus disbursed has not yet returned to the market for employment in Wall-street, and it will probably be some days before the full effect is felt. Meanwhile, the available supply in the open market fall short of the urgent needs of speculative borrowers, who have to pay extreme rates for prompt accommodation. In the discount line there has been very little animation and the best grades of mercantile paper have been rated at from 9@12 per cent. per annum. The Treasury programme of Gold Sales and bond purchasers for January has not been deemed satisfactory, by street operators. Under the instructions from Washington, the U. S. Sub-Treasury proposes to sell, during the month, two millions of Gold, as follows: Thursday, January 11, $1,000,000; Thursday, January, 25, $1,000,000; and to buy in two million of U. S. bonds as follows: Thursday January 4, $1,000,000; Thursday January 18, $1,000,000.

The city banks, in their latest return, show a reduction of $935,000 of legal tender notes, with an increase of $2,284,800 of specie, and $1,054,100 of deposits; also a decrease of $849,000 in their loan and discount averages, and $32,800 in their item of circulation. The city bank exchanges, last week, averaged $112,360,593; and thus far, this week, 93⅛ millions daily. The banks now hold $8,096,400 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $25,049,500, against $20,828,846 same time last year. The city bank deposits are now $200,400,800, against $188,223,995 week ending Dec. 31st, 1870. The legal tender reserve amounts to $40,282,800, against $45,245,358 same time last year. The circulation now stands at $28,542,800 against $32,153,514, same time last year. The loans are now $270,534,000, against $263,147,418 at this date last year.

The U. S. Sub-Treasury reduced its currency balance $3,444,344 and increased its coin reserve $2,600,868 as the result of the week's business. The receipts of the office were $5,922,920 in coin, and $4,820,654 in currency; payments, $3,322,052 in coin, and $8,264,998 in currency. The office received $1,781,000 in coin or its equivalent, from customs; and disbursed $474,021 of coin interest.

The U. S. Sub-Treasurer retired, last week, $1,522,013 of coin certificates, received for customs.

The receipts of the United States Sub-Treasury in December were $79,670,979, including $8,394,333 from customs; payments, $78,582,288, including $2,237,576 of coin interest on the current account, while $5,850,000 prepaid for January were not charged off.

Government revenues have been on a restricted scale, since our last. The excises yielded last week about three millions, and thus far since July 1, about 68 millions. The customs at the port of New York, last week were $1,690,013; and at the outports, equal to about $550,000 more, all in coin, or coin certificates.

Gold has been more active, and quoted higher, with the chief dealings on speculative account, the customs export call having been rather limited. A few failures, among the short operators, on Wednesday, tended to stimulate the speculative movement. The range of the price during the week has been from 108⅜@109¾ and the closing quotation on Wednesday was 108½ against 108½ the preceding Wednesday. The specie outflow, last week, was $449,716. The Gold Exchange Bank clearances have averaged about 47⅞ millions a day during the week.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from Jan. 1, to Dec. 30, 1871, $82,558,515, against $86,671,676 same time in 1870.

The customs demand for Gold last week, averaged $356,200 a day; thus far, this week, it has averaged $420,000 a day or equal to a

weekly aggregate of $2,520,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $35,611, and since Jan. 1, 1871, $8,618,290 against $11,581,771 same time in 1870. The total customs revenue of the Government, in coin, at this port, in 1871, were $153,814,406 against $139,703,539 in 1870.

The export drain of specie was $449,716 last week, against $464,303, same week preceding year. The shipments in 1871, were $64,212,415, against $58,191,475 in 1870.

The Assistant Treasurer at this port has paid paid out about 23 millions of gold on account of Five-Twenties redeemed altogether.

Foreign Exchange has been quoted firmer, but has not been remarkably active. Bankers' sixty day bills on London closed on Wednesday at 109¼@109½; sight bills on London, 109⅞@110⅛.

The produce exports from this port, week ending with Jan. 2, were to the currency value of $3,199,209.

Government securities have been in more demand and quoted strong and buoyant in price, with light offerings of the coin bearing issues reported. The U. S. Currency Sixes are now quoted with accrued interest included.

U. S. sixes of 1881 closed here on Wednesday of the current week at 114¾@115; U. S. Five-Twenties of 1862, (other than the bonds called in) 110¼@110½; U. S. Five-Twenties of 1864 at 110¼@110¾; U. S. Five-Twenties of 1865, 112⅜@112¾; U. S. Five-Twenties of 1865 consolidated, 111⅜@111½; U. S. Five Twenties of 1867, 112⅝@112¾; U. S. Five-Twenties of 1868, 112¾@112⅞; U. S. Ten-forties at 109¾@110¼; U. S. Fives of 1881 (Funding Loan) 109½@109¾. Six per cent. currency bonds, 114⅞@115⅛.

The amount of the U. S. currency outstanding on the 1st of January was $399,274,171.

London telegrams report that the business at Stock Exchange there on January 2nd was the largest of any day in 46 years.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Dec. 20.	Dec. 27.	Jan. 3.
Consols	92½	92½	92¾
U.S. 5-20's of 1862..	92¼	92	92¼
U. S. 5-20s, 1865....	93½	93⅞	94⅜

" 10-40s	91⅞	91¾	92⅛
Erie.....	27½	27¾	30½

* Less the January coupon.

The new Funding Five per cent. Loan was quoted in London on Wednesday at 91½@91⅝

State bonds have been moderately sought after and have been irregular in price, though closing more steadily.

There has been a good inquiry for the better class of railway bonds, and values have been quoted buoyant. Of the older loans, the offerings have been quite limited both at the Stock Exchange and through the Commission-houses. There has been more call for the Central Pacific Sixes, which closed at 100¼@100½ ex the January coin coupon of three per cent. For the Chesapeake and Ohio Sixes there has been an improved demand from investment buyers on the basis of 94 per cent. and accrued interest.

In their annual report to the holders of the securities of the Central Pacific Railroad Company, Fisk & Hatch, the financial agents of the Company, show that the receipts of the road from passengers and transportation increased about 20 per cent. in 1871 over those of the preceding year. The increase in the through passenger travel westward and in the shipments of Asiatic and California products eastward has been so rapid and important, that notwithstanding an unprecedented drouth, and the consequent large reduction in the wheat harvest of California, the Gross Receipts of the road for the year 1871, amount to upwards of $9,500,000, thus substantially justifying the estimates made at the beginning of the year. The entire surplus Earnings of the road from the beginning to the present time, amounts to $7,858,865, which would be sufficent for a dividend of over Fourteen per cent. on the amount of Capital Stock issued.

Railway and miscellaneous share property has been fairly active, but variable as to price, closing with indications of renewed strength and buoyancy despite the activity in Money. A failure of a commission broker, on the short side occasioned considerable excitement early in the week.

General business has been comparatively dull. Breadstuffs and Provisions closed about steady. Middling upland cotton closed buoyantly on Wednesday at 20⅝ cts. per lb. The receipts at all the ports, since Sept. 1, have been 1,437,942 bales, against 1,625,395 bales same time in the preceding year; exports 684,344 bales, against 909,663 bales in the previous year; stock at the ports at latest dates, 482,393 bales, against 520,884 bales same date 1870.

At the Live Stock Markets, Beeves have been in moderate demand and at from 8@14½ cts.; Veals at 5@11 cts.; Sheep at 4@8 cts. Lambs at 5@9 cts.; Swine, at 4¾@4¾ cts. per lb., all live weight. The week's receipts were 5,373 Beeves, 372 Veal Calves, 11,347 Sheep and Lambs; and 21,349 Swine.

Foreign goods have been in light request at about previous rates. The week's imports of foreign goods reached $4,912,151, including $1,097,279 of dry goods.

Ocean freights have been quiet with rates quoted somewhat irregular, closing heavily.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—North Carolina Fund Act, 1868, 20; South Carolina 6s, old, 50; do. new, Jan. and July, 26; do., Apl. and Oct., 23; N. Y. State 7s, B. L., reg., 106½; Ohio 6s, 1875, 101; Long Dock bonds, 90½; Galena and Chicago 1st mort., 107; do. 2d mort., 96½; Ohio and Miss. 2d mort., 82⅞; St. Louis and Iron Mt. 1st mort., 96; Cedar Falls and Minnesota 1st mort., 81; St. Louis, Jacksonville and Chicago 1st mort., 93½; Belleville and Southern Illinois 1st mort., 98; Chicago and Milwaukee 1st mort., 93; Toledo, Wabash and Western consol., 87; Albany and Susq. 2d mort., 94; Long Island R. Proposed Consolidation of Arkansas Railways.

The Memphis *Appeal*, alluding to the proposed consolidation of Arkansas railways, says:

Why may not the Memphis and Little Rock road be consolidated with that connecting Little Rock and Fort Smith? If this were done the great and prosperous State of Arkansas, the Indian Territory and Northern Texas would be nearer New York, by way of Memphis, one hundred miles than by way of St. Louis.

The completion of fifty-four miles from Fort Smith to Fort Gibson, which will be finished within six months, places Tennessee, Mississippi, Alabama and Louisiana in direct connection with the Union Pacific road through Memphis.

By this means the States designated will have a shorter route to the Pacific than by way of St. Louis.

We will then have within the next few months a completed line from this city to the Pacific. With this and the branch to Camden, Jefferson and Shreveport finished, Memphis grasps two empires and two routes to the Pacific. There is no city that can compete with us for years to come.

Western Missouri and Eastern Kansas must come to the Mississippi below the confines of the ice-King's domains, and all these ends may be consummated simply by the consolidation of the railroads designated.

That the interest of stockholders in the Memphis and Little Rock and Little Rock and Fort Smith roads will be promoted by the proposed consolidation is as certainly true as that cities and towns along these lines will be aggrandized.

We understand that Mr. Josiah Caldwell, of Boston, Mass., the great railroad contractor and banker, has just returned to this city from Little Rock, where he has made arrangements for the immediate completion of the Little Rock and Fort Smith railroad. With him is ex-senator McDonald, of Little Rock, vice president of the road.

The two gentlemen are now at the Peabody Hotel, enroute to Boston, to perfect arrangements for the immediate completion of the road.

As soon as the Fort Smith road is finished there will be only seventy miles unfinished between Fort Smith and Fort Gibson, the latter place being the point of intersection with a branch of the Union Pacific connecting with the Kansas Pacific road at Junction City.

By this route passengers can reach San Francisco from Memphis, passing through Little Rock, Fort Smith, Junction City, Denver and Cheyenne over the Union Pacific to California.

Senator McDonald, having abandoned politics, becomes of necessity one of the most useful citizens of the South.

Worcester and Nashua Railroad.

The report of the directors of this company for the year ending September 30, 1871, makes the following exhibit of finances:—

Capital stock—Received for 17,050 shares issued, $1,425,400; construction, $2,041,171 42; earnings for the year ending September 30, 1871, $569,764 30; expenses, $993,054 60; net profits, $173,709 70; from which deduct dividends paid January and July, $162,750; surplus not divided, $10,959 70.

Liabilities of the company—Unpaid dividends, $2,744; bonds payable, $200,000; total liabilities, $202,744; assets, $140,261 08; liabilities over assets, $61,482 92. Since the last annual report of the directors of this company, the second track has been extended to Sterling Junction and put to use; another section ending at Clinton is in process of construction, and will be finished and open for business during the coming spring. The equipment of the road has been improved and increased by additions and renewals.

Agriculture and its Profits.

The ninth census reports gives an aggregate of $9,261,775,121 as the true value of the farms of the United States. Adding $336,890,871 for agricultural implements, and $1,524,271,714 for domestic animals, and we have a total agricultural capital of $11,122,937,706 in 1870 against $7,983,301,641, in 1860, an increase, in ten years, of $3,139,636,065, or about forty per cent. The total value of the agricultural production of 1869 was $2,445,602,379, or about 22 per cent. upon the entire capital. These figures indicate a fair margin of profits to agricultural industry in the United States. Our farming is becoming more intelligent each year, hence when the embarrassments of Southern agriculture are removed we may expect a still higher average profit.

☞ The Illinois Central Railroad Company has declared its usual Semi-annual Dividend of Five per cent., payable the 1st of February. The Transfer-books close on the 13th inst. The Company is prepared to pay its Seven per cent. Construction Bonds, maturing April 1, 1875; having placed at the disposal of the Trustees $1,077,500 more, making $2,630,000 in the Sinking Fund, which, with the accumulation of Interest, will pay the Three millions of outstanding Bonds; the fund being applicable at once to the payment of Bonds when presented.

☞ West of the Mississippi river the United States still own 973,475,563 acres, distributed as follows: Iowa, Missouri and Arkansas, 16,000,000; Dakota and Wyoming, 145,295,284; Montana, 86,904,605; Kansas, 43,148,076; Nebraska, 52,523,637; Colorado and Idaho, 117,800,000; New Mexico and Utah, 224,140,000; Nevada and Arizona, 136,000,000; Minnesota, 36,776,170; Indian Territory, 154,000.

☞ The Montpelier and Wells River Railroad is progressing satisfactorily. A large force is now at work in the wilderness between Groton and Marshfield. A contract has been made with Mr. W. H. Smith of New Hampshire to complete all the bridges along the line of the road.

REINVESTMENT OF DIVIDENDS, INTEREST, AND CALLED IN FIVE-TWENTIES.

During the first three months of 1872 there will be disbursed for the redemption of Five-Twenties, interest on the United States, Central Pacific, and other Bonds, dividends on stocks, &c., not far from $150,000,000, a considerable portion of which will seek reinvestment.

Government Bonds at present market prices (estimating the length of time for which they are likely to run) yield but little over 4 per cent on the investment, and it is now apparent that no higher rate of interest can hereafter be derived from investment in our National Securities.

The amount of really first-class and absolutely safe six per cent Gold Bonds which can now be had at anything less than par is very limited. Prominent among them are the SIX PER CENT GOLD BONDS OF THE CHESAPEAKE AND OHIO RAILROAD COMPANY, which we offer and recommend, *believing them to be as safe as the Bonds of the Government.* Less than $2,000,000 now remain unsold, and they will be rapidly taken up.

Present price 94 and accrued interest. Interest and principal payable in gold in New York City. Interest May 1 and Nov. 1. Denominations $1,000, $500 and $100—coupon or registered.

We buy and sell, as usual, GOVERNMENT and CENTRAL PACIFIC BONDS, and receive them in exchange for CHESAPEAKE and OHIO BONDS. Accounts of Banks and others received, on which we allow interest at the rate of four per cent. Orders for Investment Stocks and Bonds executed at the Stock Exchange.

FISK & HATCH.

HARVEY FISK.
A. S. HATCH.

☞ On the Rondout and Oswego road 67 of the 100 miles are now completed, and the road for that distance is earning 10 per cent. net on its entire cost. The heaviest of the work is over in surmounting the Shawahgunk and another range of hills near the west of Rondout, the Hudson River terminus of the road. All rail connection with New York is had by the Wallkill Valley Railroad.

☞ Passenger and freight trains are now running regularly on the Portsmouth, Great Falls and Conway Railroad to Conway Corner. The intention is to land passengers from Boston to Conway in six and one half-hours: distance 134 miles. About four miles to North Conway remains unfinished, but it will be completed by next May, in season for travel to the White Mountains.

☞ The Chesapeake and Ohio Railroad Company will receive proposals until the 18th inst. for the graduation and masonry of a branch of their road, from Carrington Street to James River, including a tunnel through Church Hill about 3,400 feet long. For particulars apply to H. D. WHITCOMB, Chief Engineer, Richmond, Va.

☞ Proposals will be received until the 15th inst. for the graduation, masonry and ballasting of the first 26 sections of the Valley Railroad between Harrisonburg and Staunton, Va. Addres RICHARD RANDOLPH, Engineer, Camden Station, Baltimore, Md.

Journal of Railroad Law.

RAILROAD COMPANIES—ACT OF CONGRESS LIMITING LIABILITY OF SHIPOWNERS TO MERCHANDISE SHIPPED APPLIES ALSO TO PERSONAL BAGGAGE.

The late case of Chamberlain *vs.* The Western Transportation Company, (44 N. Y., 305,) was an action brought by Chamberlain as assignee of Hamilton Ward and wife to recover from the defendant, as a common carrier, the value of certain personal baggage, which was destroyed by fire on board the propeller Racine, owned by the defendant and employed by it in its general business of carrying passengers and freight between Detroit and Buffalo.

The following is the able opinion by the Court delivered by—

EARL, C.—The defendant was a common carrier of passengers and goods between Detroit and Buffalo, and the measure of its responsibility, as such, is the only question to be determined in this case.

The common law, for reasons of public policy, held carriers, both by land and water, to the same rigid responsibility. It made them answerable for all loss and damage to the goods entrusted to them to carry, except such as were caused by the act of God, or the public enemies. Loss by fire, unless caused by lightning, was not within the exception, and hence if a vessel was burned at sea and she and her cargo were involved in a common catastrophy, the carrier become liable to the freighter for the entire value of his goods. New Jersey Steam Navigation Co., *vs.* Merchants Bank, 6 How., U. S. 344; Miller *vs.* Steam Navigation Co., 6 Seld, 431.

This common law liability of carriers by water was at an early day limited, in England, by the statutes of 7 Geo. 2, C. 15; 26 Geo. 3, C. 68 and 53, Geo. 3, C. 159. The object of these statutes, as expressed in the preamble to one of them, was "to promote and increase the number of ships and vessels, and to prevent any discouragements to merchants and others from being interested and concerned therein." By these statutes the parliament exempted shipowners from liability in several cases of loss, and among them loss by fire. These statutes were doubtless passed to place English shipowners upon the same footing with the shipowners of the continental nations of Europe, where the extreme rigor of the common law had not applied to carriers by water, (Moore *vs.* American Transportation Company, 24 How., U. S. 1.)

The common law rule remained in force in this country until an act was passed by Congress, on the 3rd day of March, 1851, entitled "An act to limit the liability of shipowners and for other purposes," which embodies most of the provisions of the English statutes above referred to. This act is supposed to have been passed in consequence of the decision in 6 Howard, and *Supra*, holding the New Jersey Steam Navigation Company liable for goods lost by fire upon the Lexington, burned upon Long Island Sound. (Walker *vs.* The Transportation Co., 3 Wallace, 150.) The object of this statute, as stated by Justice Caton, in 24 Howard, *Supra*, and as appears from the debates in Congress at the time of its passage, (23 Congressional Globe, 713-718,) was to place our commercial marine on an equal footing with that of Great Britain, so that the increase of the number of ships and the navigation of them might be equally encouraged.

The first section of the Act of Congress referred to is as follows: "No owner or owners of any ship or vessel shall be subject or liable to answer for, or make to any one or more person or persons any loss or damage which may happen to any goods or merchandise whatsoever, which shall be shipped, taken in or put on board any such ship or vessel, by reason or by means of any fire happening to or on board, the said ship or vessel, unless such fire is caused by the design or neglect of such owner or owners."

The defendant claimed to be protected against any recovery in this action by virtue of this section, but the plaintiff claimed that the baggage in question was not "goods or merchandise" within the meaning of this section, and hence that the defendant was under the common law liability, and this was the view taken of the case by the General Term, and was the sole ground upon which the case was decided against the defendant.

This is not, in any sense, a penal statute, nor is it in any way derogatory to natural right, and hence I know of no rule of law that requires that it should be strictly construed. It is true that it changes the common law, but there can be no reason for applying the rule of strict construction to the vast body of statute law which change the common law. The prior law, whether it be statute or common law, is to prevail, unless the subsequent statute, by a fair construction, repeals or modifies it. This statute is rather a remedial statute. It was enacted to remedy the rigor of the common law, which it was deemed unwise, on grounds of public policy, to continue. It should, therefore, be construed, if not liberally, at least fairly, to carry out the policy which it was enacted to promote.

In construing this statute there are a few canons of construction which it is well to bear in mind. The popular or received import of words furnishes the general rule for the interpretation of the statutes. (Millard *vs.* Lawrence, 16 How., U. S. 25). Where general words are used the courts are not at liberty to insert limitations not called for by the sense or the objects or the mischiefs of the enactment. Whenever any words are obscure or doubtful the intention of the law makers must be resorted to in order to find their meaning; and when ascertained, it must be followed with reason and discretion in the construction of the statute. Though the intention is to be collected from the words, yet, when the words are not explicit, it is to be gathered from the occasion and necessity of the law, the defect of the former law, and the designed remedy. And sometimes the meaning of the legislature in a statute may be extended beyond the precise words used in the law, from the reason or motive upon which the legislature proceeded, from the end in view, or the purpose designed. The current of authority of the present day is in favor of reading statutes according to the most natural and obvious import of the language, without resorting to the settled and forced constructions, for the purposes of limiting their operations.

We come to the question whether the baggage in question is covered by the word "goods" in this section; and I entertain no doubt that it is. Webster defines "Goods" to mean personal or movable estate. In Jacob's Law Dictionary and also in Thomlin's it seems to be held synonymous with chattles. In Bovoier's Law Dictionary it is said that this term will sometimes include money, valuable securities and other mere personal effects, and that used in a will, it will pass the whole personal estate, including even stocks in the funds. And such is the common understanding of the meaning of this word. It is generally understood to mean personal estate, as distinguished from reality.

It sometimes has a restricted meaning, depending upon the circumstances under which it is used. I am not aware that in the business of commerce or among seafaring men this term has any signification different from that in common use. It is undoubtedly true that in some cases of marine insurance an insurance of goods and merchandise has been held to cover only such cargo as was laden on board of the vessel for the purpose of commerce. But in all these cases this result was reached, not so much from the force of the terms used as from the presumed intention of the parties, as gathered from the circumstances of the case. In all cases of insurance the courts seek diligently for the intention of the parties as to the extent of the risk assumed by the underwriters, and to do this it is necessary to go out of the written instrument to look at the course of the trade and technical use of terms, etc., more frequently than in most other contracts. And insurance upon the goods in a store would probably be held not to include the clothing and personal ornaments of the merchant, while the insurance upon the goods in a dwelling house would probably be held to include all the personal effects of the owner. In American Ins. Co. *vs.* Griswold, (14 Wend., 399,) a marine insurance upon "goods and merchandise" was held to include specie obtained upon a sale of part of the cargo. In Duplanty *vs.* Com. Ins. Co., (Anthon case at N. B., 114,) a curricle was held to come within the description of "goods, wares and merchandise." In (Phillips on Insurance, 173,) it is said that "Jewels, rings, etc., not designed for trade but belonging to the persons of those on board of a vessel have been said not to come under this description, but there appears to to be no reason why they should not if the policy was so intended."

What reasons have we, therefore, for supposing that Congress used this word in a restricted sense? It is not qualified in the statute, to indicate that it was used in the broadest sense, we have the language "any goods whatever" thus making it clear that the term was used to include everything that could come within it. After using such broad terms, which, according to ordinary usage, include baggage, if the law makers had intended to have excluded or excepted baggage, would they not have said so? Then, again, can there be any reason for excluding from the operation of this law, baggage? It seems to me that every reason for exempting the carrier from liability for the loss of a thousand dollars worth of other property applies equally for exempting him from the loss of the same amount of baggage; and hence to carry out the policy of the law, the terms used should be so construed as to include baggage. But if this term is to be used

in a restricted sense what is to be included and what is to be excluded? Does it include only goods shipped as articles of commerce, or would the furniture of a family moving from the East to a home in the West be included? Is it confined to such goods as are shipped as part of the vessel's cargo, ordinarily accompanied with the shipping bills? It seems to me that it is not thus confined. The language used, "any goods whatever" "shipped, taken in or put on board" forbids it.

But it is claimed that there is something in the subseqent sections of the statute, showing that the term was used in a restricted sense. It is true that it is proper to look at the statute to see what is meant by any part of it, but it is said by Chief Justice Marshall, in Faw *vs.* Marstellar, (2 Cranch, 10,) that in searching for the construction of an act, positive and explicit provisions, comprehending in terms a whole class of cases, are not to be restrained by applying to those cases an implication drawn from subsequent words, unless that implication be very clear, unnecessary and irresistible. I have looked with great care at these subsequent sections, as much stress was laid upon them by the learned judge who wrote the opinion of the General Term.

The second section provides that the owner of a vessel shall not in any case be liable to any shipper of "platina, gold, gold dust, silver, bullion or other precious metals, coins, jewelry, bills of any banks or public body, diamonds or other precious stones," unless the shipper gives the owner or his agent notice in writing of their character and value, and has the same entered on the bill of lading, and that the owners shal, not be liable for such "valuable goods" beyond the value thus given. Here the word "goods" is used to and include all the valuable articles before named.

The third section provides that the liability of the owner of the vessel for the embezzlement, loss or destruction, by the master, passengers or crew, of any "property, goods or merchandise" shall in no case exceed the amount of the interest of such owner in the vessel and the freight; and in section 4, the same property is referred to as "goods, wares or merchandise, or any property whatever," and also under the general designation of "property;" and in section 6, the same property is referred to as "goods, wares or merchandise or other property." It is conceded that the language used in these subsequent sections includes baggage; but it is claimed in the opinion at the General Term that because the word "property" is used in these sections in connection with the other terms, it must be inferred that the law makers used the terms "goods or merchandise" in the first section, in a restricted sense, and as not including all that is included in the terms subsequently used. This is upon the theory that the law makers must have had a purpose in the use of every word which they have inserted in a statute, and that a statute must be so construed as to give effect, if possible, to all the words used. However true and just this may be theoretically, as a rule of construction I apprehend that it will frequently be found in practice to lead to very absurd results. Under the rule of construction, why, in the first section, was the word "merchandise" used, as "goods" certainly, according to the construction adopted at the General Term, would include merchandise? In the third section, why are the words "any property, goods or merchandise" used, when all the things intended would clearly be covered by the words "any property?" And in the 4th and 6th sections, in speaking of precisely the same things, why are things called in the one "goods, wares and merchandise or any property whatever," and in the other "goods, wares, merchandise or other property?" What significance has the word "wares" and what is included in that that is not covered by the other terms used? It will thus be seen that language is used in this statute without much precision and that there is no reason for believing that the law makers meant, by the language used in the subsequent sections, to include baggage, and not to include it in the words "any goods or merchandise whatever" used in the first section.

This conclusion is made more clear when we consider that, according to the construction given to this statute by the courts below, while the common law liability is changed by the first section as to all property including baggage. What reason can there be for this distinction? Why limit the common law liability of the ship owner, for the embezzlement and destruction of baggage by his own servants, and have it in full force, in all its vigor, in case of destruction of the baggage by fire, without his fault? Such an effect can be given to the statute, it seems to me, only by "a subtile and forced construction" disregarding the plain and ordinary meaning of the language used, and losing sight of the object the law makers had in view in enacting the law.

This statute, in a case of loss of baggage by fire, has never come under discussion so far as I have observed, in any reported case, although the statute has existed in England for nearly a century. The elementary writers upon carriers, and shipping, while referring to these statutes and commenting upon them, do not allude to the distinction here contended for between baggage and other property. If such an important distinction existed, some of these able writers would probably have discovered and commented upon it; and it would not have escaped their notice and attention that the common law liability of ship owners as to property destroyed by fire remains in full force as to baggage, but is abrogated as to all other property.

As there was no proof that the fire was caused by the design or neglect of the owners of this vessel, I am therefore of the opinion that the defendant was not liable to the plaintiff; and the judgment of the General Term should be reversed, and judgment ordered for the defendant.

Judgment for defendant.

☞ The commercial statistics of Baltimore show that during the year 1871, 41 first-class steamers left that port for Europe, all carrying large cargoes, and in addition 701 sailing vessels cleared for foreign ports. The total number of arrivals from foreign ports during the year was 873. The customs receipts were $8,909,194, which is a falling off from last year of $282,810.

☞ Work is being bushed forward on the Woods' Hole (Mass.) Railroad, and it is stated that it will be ready for travel next season.

Railroad across the Isthmus of Costa Rica.

Information has reached Washington from an official source that the Government of Costa Rica has executed a contract with Henry Meiggs, an American citizen, known as the great railroad contractor of South America, to construct a railroad from the Port of Limon, on the Atlantic ocean, to the city of Aldjuela, about fifty miles distant from the Pacific, via Castago, San Jose and Heredia, the estimated distance being one hundred and twenty miles. Mr. Meiggs undertakes to construct the road within three years and equip it complete for the sum of 1,000,000 pounds sterling, 170,000 pounds of which was paid on signing the contract, the residue to be paid in monthly instalments as the work progresses. The Government has already obtained a loan in London for 500,000 pounds sterling. It is the purpose of the Government to put on the London market another loan at an early day for a sufficient amount to cover the entire cost of the construction of the road.

Our Minister to Costa Rica says that this long-talked-of and much desired enterprise will now be carried successfully through there can be no reasonable doubt. So far as the trade of Costa Rica is desirable the construction of this road is of interest to the people of the United States. At present almost the entire coffee crop of the country, which seldom falls below two hundred thousand quintals per annum, is hauled in ox-carts to the port of Punta Arenas, on the Pacific, at a cost of one dollar and twenty-five cents per quintal. Thence it is shipped in sailing vessels around the Horn, and finds a market in London and Hamburg, after a four months' voyage. Construct this road and the trade of Costa Rica will take a new departure. It will not cost more than forty or fifty cents, at most, to take a quintal of coffee to the port of Limon, on the Atlantic, and then, in nine days by steamer, it is in New York, at much less expense than by sailing vessels to the markets above mentioned, or to New York by way of Aspinwall, over the Panama Railroad.

Book Notices.

ALBUM OF DESIGNS—Phœnixville Bridge Works—Clarke, Reeves & Co., Philadelphia. This belongs to a class of literature deserving of a higher place than generally accorded it—the advertising circular. Our Patent Office has within a few years commenced to appreciate and to collect and cherish with due honor these valuable and instructive pages, teeming with the live, the practical; and the only faults of which are that they are published with a view to a reward through the appreciation by the public of the articles treated of, rather than through a purchase of the book. This is a collection of large lithographs with short descriptive text, showing iron bridges and combined iron and wood, from small road crossings to massive draw bridges.

PROFILE FIELD BOOK—Wm. J. Young & Sons, Philadelphia. A Pocket Field Book, with alternate pages, peculiarly ruled with close light and heavy lines—every 5th heavy broken, and 10th heavy continuous, with proper cross lines for longitudinal distances.

☞ The grading of that portion of the Bachman Valley railroad which lies in Maryland has been let to Michael McCabe, of Frederick, A. Favourite, of Emmittsburg, and Abraham Greider, residing at the Chestnut Hill ore banks. The line is to be completed by July next.

☞ The railroad from Swedesboro' to Woodstown (N. J.) will be put under contract early in the spring, and efforts are being made to extend the road from the latter place to the Salem Railroad, a distance of 3¼ miles.

☞ All new railroads are at once made postal routes, so that the Postoffice Department has most accurate knowledge of the development of railroad enterprises. During the last month the amount of such new service ordered exceeds any former month, and was almost double the average for the last year. The number of miles was nine hundred and sixty-eight upon twenty-nine new railroads, or more than one for each working day in the month. These new railroads were in fourteen different States in all parts of the Union.

☞ The town of Epping, N. H., has appropriated $15,000 towards the construction of the Rochester and Nashua Railroad. This sum, added to the private subscriptions in the town, nearly completes the million dollars required for the road, and consequently insures its success. An offer to lease the road to the Nashua and Worcester Railroad Company for twenty years at six per cent. upon its cost has been accepted by the directors of the proposed road.

☞ At a late meeting in Lancaster, Pa., of the Peachbottom Railway Company it was resolved to construct a branch from King's bridge, on the west branch of the Octorora, to Quarrysville. A committee was appointed to solicit subscriptions.

☞ The interest bearing debt of the State of Ohio is stated in the Governor's message of $8,956,211 05; and the non-interest bearing at $44,518 31.

☞ The total production of Anthracite coal for the year 1871 amounted to 17,454,728 tons, against 17,465,869 tons in 1870, showing a decrease of 11,138 tons.

☞ Work on Wolfborough (N. H.) Railroad was commenced on the 27th ult. It is expected the road will be completed by mid-summer.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD COMPANY, NEW YORK, Jan. 3, 1872.

A **DIVIDEND OF FIVE PER CENT.**, free of Government tax, has been declared by the Board of Directors of this Company, payable on the 1st day of February next, to the holders of full-paid shares registered at the close of the 13th day of January instant, after which and until the 7th day of February next, the transfer-books will be closed.

American Railroad Journal.

New York Saturday, January 13, 1872.

☞ The stockholders of the Mississippi River and Paducah and Gulf railroads have ratified their consolidation under the name of the Memphis and Paducah Railroad. Work is to be let at once.

☞ Ashbel Welch, Esq., of Lambertville, N. J., late President of the United Companies of New Jersey, has been officially notified of his appointment as Engineer-in-Chief of those works, and has specially given to him in charge the costly improvements contemplated at Harsimus Cove.

☞ The Governor of Colorado, in his message to the Legislature, says there is a balance of $50,000 in the Treasury and no debt; that 422 miles of railroad have been constructed since the last session, and that the yield of the mines has increased over 50 per cent.

☞ The total receipts of cotton at Boston during the year 1871 amounted to 312,827 bales, of which only 7333 bales were exported to foreign ports, the rest being consumed by the manufactures of New England, leaving in the hands of dealers there 8000 bales on the 1st inst. The receipts show an increase of 47,801 bales as compared with the previous year. In the article of wool the receipts have been 204,697 bales domestic and 56,772 bales foreign, a gain over 1870 of 19,682 bales of the former and 30,579 bales of the latter.

Erie Railway.

The following is a comparative statement of the earnings, expenses, length, cost, capital, indebtedness, equipment, miles run, passengers and tons carried, etc., etc., during the years ending September 30, 1870 and 1871:

	1870.	1871.
Capital stock paid up	$83 536,910 00	$86,536,910 00
Funded debt	23,398,800 00	26,398,800 00
Floating debt	None.	None.
Total cost of road and equipment	78,955,587 02	106,904,362 22
Length of road, miles	459	459
Double track, including sidings	389¼	397¼
Branches owned by company	364¼	455
Double track on same	60	78¼
Number of locomotives	440	475
First-class passenger cars	220	232
Second-class and emigrant cars	54	58
Baggage, mail & express cars	71	71
Freight cars	8,840	9,779
Miles run by passenger trains	2,900,189	3,068,701
Miles run by fr'ght trains	6,426,190	7,511,065
Passeng'rs carried one mile	133,589,109	148,242,790
Tons of freight carried one mile	898,862,718	897,446,728
Exp'ded for maintenance of road	$3,689,693 64	$3,432,948 46
Repairs of machinery	2,601,691 05	2,854,644 97
Operat'g expenses	5,781,626 20	6,411,502 78
Total expenses including interest, rents, &c.	16,471,483 09	17,049 740 31

New York Central and Hudson River R.R.

The following is a comparative statement of the length, cost, capital, indebtedness, equipment, miles run, passengers and tons carried, earnings, expenses, dividends, etc., etc., for the fiscal years ending September 30, 1870 and 1871:

	1870.	1871.
Capital st'k including consolidation certificates	$89,428,880 00	$89,428,880 00
Funded debt	13,681,807 81	15,231,718 98
Floating debt	1,167 00	1,167 00
Total cost of road and equipment	59,765,684 06	60,413,656 86
Length of road, miles	740.17	740.17
Double track, including sidings	662.60	681.92
Third track	9.50	6.50
Branches owned by company	298.42	298.42
Double track on same	19.55	19.55
Lines leased by company	97.50	104.46
Number of locomotives	400	424
First-class passenger cars	831	833
Second-class and emigrant cars	114	115
Baggage, mail, and express cars	132	129
Freight cars	9,026	8,849
Miles run by passenger trains	4,024,178	3,645,690
Miles run by freight trains	7,405,699	6,986,107
Passengers carried one mile	321,365,953	288,678,896
Tons of freight carried one mile	769,087,777	888,827,865
Expend'd for maintenance of road	$4,564,434 16	$4,882,591 90
Repairs of machinery	8,181,515 08	2,502,492 20
Operating expenses	6,245,160 74	6,876,204 77
Total expenses	13,991,109 98	13,711,288 87
Total earnings	22 201,521 43	21,972,105 47
Passenger earnings	6,788,592 01	6,224,739 74
Freight earnings	14,327,418 28	14,647,580 06
Miscellane'us earnings and receipts	1,135,511 14	1,099,785 67
Payments for interest	1,093,840 80	721,808 04
Payments for dividends (8 per ct.)	6,861,241 29	7,258,741 70

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of December, were:

ENTERED FOR CONSUMPTION.

	1870.	1871.
Manufactures of wool.....	$784,282	$798,213
" cotton...	1,179,025	655,067
" silk	1,722,776	772,386
" flax	664,382	591,730
Miscellaneous dry goods..	703,345	604,905
Total entered for consump.	$5,053,810	$3,422,301

WITHDRAWN FROM WAREHOUSE.

	1870.	1871.
Manufactures of wool	$427,212	$419,346
" cotton ...	226,315	137,565
" silk.....	270,084	208,405
" flax	353,614	220,041
Miscellaneous dry goods..	72,849	78,280
Total withdrawn from warehouse	$1,350,074	$1,063,637
Add entered for consump.	5,053,810	3,422,301
Tot. thrown on the market..	$6,403,884	$4,485,938

ENTERED FOR WAREHOUSING.

	1870.	1871.
Manufactures of wool....	$913,801	$871,211
" cotton ...	447,691	498,168
" silk.....	768,809	454,250
" flax	574,736	617,967
Miscellaneous dry goods..	175,388	155,692
Total entered for wareh'g..	$2,880,425	$2,597,288
Add entered for consump.	5,053,810	3,422,301
Total entered at the port..	$7,934,235	$6,019,589

The imports of foreign dry goods at the port of New York for each month of the years 1870 and 1871 were as follows:

	1870.	1871.
January.....	$7,629,753	$8,442,025
February	10,796,404	14,648,882
March....	12,983,106	18,129,012
April....	7,982,484	11,062,459
May	7,221,398	9,662,228
June	4,558,546	5,951,772
July	6,990,722	10,247,622
August	14,002,482	19,632 708
September.	11,076,597	12,194,996
October	9,365,558	8,611,975
November	8,957,238	7,977,509
December....	7,934,235	6,019,589
Total....	$109,498,523	$132,480,777

The following will show the relative proportion of the different classes of fabrics:

	1870.	1871.
Manufactures of wool..	$32,355,260	$40,916,424
" cotton	20,977,062	25 503,564
" silk ..	30,004,407	36,222,588
" flax ..	15,580,306	17,477,987
Miscellane's dry goods.	10,581,488	12,360,214
Total imports.....	$109,498 523	$132,480,777

The value of foreign dry goods entered directly for consumption at the port of New York, is as follows:

	1870.	1871.
January.	$4,786,668	$5,683,440
February.	7,568,232	10,983,545
March	9,762,526	14,400,775
April.	5,846,662	8,893,459
May	5,819,940	7,259,242
June.	3,436,569	3,858,500
July.....	4,627,472	6,882,173
August....	10,146,200	14,648,416
September	8,981.377	9,587,291
October	7,547,625	6,138,461
November	6,488,302	5,510,864
December	5,053,810	3,422,301
Total....	$80,065,883	$97,268,467

The value of foreign dry goods entered for warehousing at the port of New York, is as follows:

	1870.	1871.
January.....	$2,843,085	$2,758,585
February.....	3,228,172	3 565 337
March	3,220,580	3,728.237
April....	2,135,822	2,169,000
May	1,401,458	2,402,956
June	1,121,977	2,093,272
July	2,368,250	3,365,449
August.	3,856,282	4,984.292
September....	2,095,220	2,607,705
October.....	1,817,933	2,473,514
November.....	2,468,936	2,466.645
December	2 880,425	2,597,288
Total....	$29,433,140	$35,212,310

The value of foreign dry goods withdrawn from warehouses at the port of New York, is as follows:

	1870.	1871.
January.....	$1,938,433	$2,449,570
February.....	3 359 689	3,461,564
March	4,032,585	4,316,636
April	2,864,810	2,397,530
May	2,444,639	1,894,828
June....	951,090	1,144.408
July	1,302,710	2,175,810
August.	4,038,510	4,949 858
September....	3 267,375	3,444.374
October.....	1,797,501	1,854.735
November.....	1,652,124	1.904,108
December	1,360,074	1,063,637
Total....	$28,998,940	$31,057,058

The total imports of foreign dry goods at New York from 1849, compare as follows:

Year.	Invoiced value.	Year.	Invoiced value.
1849	$44 435,571	1861	$43,636,689
1850	60,106,375	1862	56,121,227
1851	62,846,731	1863	67,274,547
1852	61,654,144	1864	71,589,752
1853	93,704,211	1865	91,965,138
1854	80,842,936	1866	126,222,855
1855	64,974,062	1867	86,263,643
1856	93,362,893	1868	80,905,884
1857	90,534,129	1869	94,726,417
1858	60,154,509	1870	109,498 523
1859	113,152,624	1871	132,480,777
1860	103,927,100		

Helena and Iron Mountain Railroad.

In an interview with Captain J. C. Maccabe, secretary of the above road, the other day, we learned that it is hoped to push work forward on this railroad early in the coming year. The road is already graded seventeen miles north of Helena, and 15,000 ties are ready for the road bed. There is only one bridge on the whole line of 150 miles, and this over the L'Anguille, the timbers for which are all ready to be put up in the early spring. The road has a landed subscription of 200,000 acres of the finest land in the State, and county aid of $700,000. The road is built by private subscription, and is specially incorporated by the legislature of the state; and it is reasonable to suppose that it will be built as fast as possible.

The Helena and Iron Mountain taps the Memphis and Little Rock at Forreat City, with the Memphis and Kansas City road at some point in Cross county, with the Cairo and Fulton at the state line, where it will connect with the St. Louis and Iron Mountain road. It will thus be seen that this road has some very important connections with the north and west, and as Helena is claimed to be at the head of low water in the Mississippi, shippers of grain, produce, cattle and merchandize will have a straight and uninterrupted winter route to southern ports. The projected line from Mobile to Helena, a contract to build which has already been made, will also give the road another connection with the south Atlantic coast.

Our Helena friends are looking forward anxiously to this road being speedily built, and promise themselves a heavy increase in trade on account of it.

Capt. Maccabe says that all the energy necessary will be expended, in order to complete the road.—*Ark. Gaz.*

Memphis and Charleston Railroad.

The gross earnings of this railroad for the fiscal years ending June 30, 1870 and 1871, compare as follows:

	1870.	1871.
From passengers....	$818,903 65	$665,338 21
" freight	638,658 22	619,182 92
" mails.....	34,373 99	42.891 24
" express.....	36,000 00	36,000 00
" other sources..	21,154 53	54,034 09
Total receipts..	$1,549,090 39	$1.417 441 46
Transportation.....	$303,129 55	$283,301 39
Motive power.....	366,750 82	287,211 23
Way	272,316 92	219,170 70
Cars	138,332 14	114,208 18
	$1,080,429 43	$903,891 50
Deduct....	70,157 79	9,369 15
Net operating cost..	$1,010,271 64	$894,522 35
Net revenue....	$528,818 75	$522,919 11
Decrease in earnings....		$131,648 93
Decrease in expenses		115,749 29
Decrease in net revenue....		15,898 64

Comparing the receipts and expenses per mile of road operated in 1869–'70 and 1870–'71, we have the following results:

	1869–'70.	1870–'71.
Receipts	$5,341 69	$4,887 72
Expenditures....	3,483 69	3,084 55
Net revenue....	$1,858 00	$1,803 17

The receipts and expenses per train mile run compare as follows:

	1869–'70.	1870–'71.
Receipts .... cents	183.89	197 64
Expenditures.... .... "	119.93	124.72
Net revenue..... "	63.96	72.92

The cotton movement has been largely increased as seen from the following comparison:

	1869.-'70. Bales.	1870-'71. Bales.
Receipts at Memphis....	64,422	81,966
" Grand Junction ..	1,297	3,994

Total....		70,413

The Memphis and Charleston Railroad extends from Memphis eastward to Stevenson, 272 miles, at the latter point connecting with the Nashville and Chattanooga Railroad, over which the trains of the Memphis and Charleston Railroad are tolled to Chattanooga, a distance of 27 miles—making the whole distance between Memphis and Chattanooga 299 miles. The road has two branches—one from Moscow to Somerville 13, and another from Tuscumbia to Florence 6 miles. The road has 24 miles of sidings, &c.

To operate the road, the company have 46 locomotives and cars as follows: sleeping 2, 1st class passenger 21, second class passenger 5, postal 4, baggage 7, and freight 731.

Trains run 801,661 miles, of which passenger trains run 349,785, freight trains 367,396 and wood and ballast trains 84,480 miles.

Through passengers, East 18,527 and West 26,226—total 44,753; and local passengers, East 117,017 and West 109,725, and commutation 41,924—total 268,666. Total of all passengers 313,419.

No statement of freight except cotton, is furnished.

The following is a comparative statement of the results of the traffic of 1869-'70 and 1870-'71:

Total passenger receipts 1870-'71	$665,333 21
" " " 1869-'70	818,903 65
Decrease 18.75 per cent	$153,570 44
Through passenger receipts 1870-'71	$255,932 65
" " " 1869-'70	320,777 08
Decrease 20.21 per cent	$64,844 43
Local passenger receipts 1870-'71	$409,400 56
" " 1869-'70	498,126 57
Decrease 17.81 per cent	$88,726 01
Total freight receipts 1870-'71	$619,182 92
" " 1869-'70	638,658 22
Decrease 3.05 per cent	$19,475 30
Through freight receipts 1870-'71	$243,750 51
" " " 1869-'70	372,506 79
Decrease 34.29 per cent	$128,756 28
Local freight receipts 1870-'71	$375,432 41
" " 1869-'70	266,151 43
Increase 29.01 per cent	$109,280 98

The falling off in the year's business as compared with that of the next previous year is accounted for, first by the floods in Virginia in October which caused an entire stoppage of railroad traffic for thirty days. This not only occasioned the loss of all Eastern freight and passage business for one of the heaviest months, but influenced many customers of the road to look to other lines, which affected the results materially through the remainder of the year.

This was followed by the effect of the war in Europe, causing such a decline in the price of cotton as to cut off the income of the people to an extent that naturally affected receipts from business, and which accounts for the loss in receipts from passenger traffic.

The opening of the Iron Mountain Railroad, the improved condition of the Northwestern and the perfecting of the route *via* Vicksburg to Montgomery and points East, have caused a large loss to this company in their business with St. Louis. The aggregate loss on freight, however, was only $19,475 30.

This small decrease is accounted for by an increase of 24,165 bales of local cotton, an increase in local rates for short distances, and the movement of an increase of 46,248 bales of through cotton which nearly compensated for the loss of St. Louis business, and the suspension of Eastern business caused by the Virginia floods.

Speaking of the new roads recently opened or which are progressing to completion the President in his report says:

"We are gratified to announce the completion of the road to Little Rock, with prospects of its extension to Fort Smith in a short time. There is but little doubt of the building of a narrow gauge road from Devalls Bluff, *via* Pine Bluff, Camden and Shreveport, to connect with the Texas Pacific at Marshall, Texas, which will add greatly to our business.

"No work has been done in the State of Arkansas, looking to our connection with the different roads centering at Springfield, Mo., and but little on the line connecting us with St. Louis

"The South and North Alabama Railroad will be completed in the next twelve months. Under an arrangement with the Louisville and Nashville Railroad, our business is placed upon the same footing as their own, which will be of great value to us, without any outlay on our part. By this line, *via* Elvton, we trust soon to have a connection with Atlanta. Other Southern connections are spoken of.

"The prospect of a connection with the Eastern cities *via* Sparta, Tenn., and Cincinnati is more favorable than heretofore.

"With the view of increasing the population on the line of our road, we have entered into an arrangement with connecting roads, dividing the expense, and have sent an agent to Europe for the purpose of procuring immigrants, to be used as laborers on the track, while we offer them all inducements in our power to purchase or lease lands in the vicinity of our road, and at the same time add to our receipts by inducing this class of travel over our line to the West and Southwest.

"Should we succeed in once more getting under proper cultivation the open lands on the line of our road, then dividends could be relied upon. With this view we shall foster and encourage our local business."

The receipts and disbursements for the fiscal year ending June 30, 1871, are shown in the following account:

RECEIPTS.

Cash on hand 30th June, 1870	$87,165 50
Gross earnings for year 1870-'71	1,417,441 46
Sale of Stocks	154,175 00
Paid on bills receivable	8,965 83

		771,054 51
Total		$11,428,403 91

Since the close of the fiscal year the company have purchased from the State of Tennessee the McMinnville and Manchester, and the Winchester and Alabama Railroads. They now design to construct a road from Huntsville to Tullahoma, and from McMinnville to Sparta, at the latter point connecting with the projected Cincinnati and Southern Railroad.

A recent report in the Memphis newspapers states that the company's roads have been leased to the Pennsylvania Company, a syndicate, of which T. A. Scott is the President, for 45 years, the stockholders to receive for five years 8 per cent. and for the remainder of the term 6 per cent. on their investment.

President.—M. J. Wicks.

Directors.—By the stockholders: W. B. Waldran, George P. Beirne, James J. Donegan, Joseph C. Bradley, Albert H. Jones, R. C. Brinkley, Peter Miller, M. J. Wicks and John D. Rather. By the City of Charleston: W. S. Hastie and Edward Willis; and By the State of Tennessee: Joel P. Pulliam, John M. Carmack and J. W. Crocker.

Secretaries and Treasurers.—E. Div.: Sam R. Cruse, and W. Div. Geo. Robertson.

Superintendents.—E. Div.: Chas. S. Williams, and W. Div.: C. L. Anderson.

General Freight & Ticket Agent.—A. A. Barnes.

Chief Engineer.—Niles Meriwether.

☞ The citizens of Wheeling (W. Va.) have voted, 2,510 to 190, to authorize the City Council to subscribe $225,000 to the capital stock of the Pittsbugh, Wheeling and Kentucky Railroad, to be used in building the road from Wheeling to the Brooke county line.

☞ At the annual meeting of the stockholders of the Buffalo, Corry and Pittsburg Railroad, held at Mayville, N. Y., on the 9th inst., the following gentlemen were elected directors: Horace F. Clark, Augustus Schell, William H. Vanderbilt, A. H. Barney, M. P. Bemus, George B. Gates, Daniel Williams, Thomas Struthers, William P. Whiteside, George W. Gifford, Amos K. Warren, William A. Steward, John F. Phelps.

At a subsequent meeting of the Board the following officers were elected: M. P. Bemus, president and treasurer; Thomas Struthers, vice-president; Daniel Williams, secretary; H. H. Potter, general superintendent.

Erie Railway.

To the Stockholders of the Erie Railway Company.

At the close of the last fiscal year, Sept. 30, 1871, the railroads owned and controlled by lease by you were the

	Miles.
Main Line—Jersey City to Dunkirk	459
Northern Railroad of New Jersey—Bergen to Nyack	26
Hackensack and New York Railroad—Junction to Cherry Hill	7¼
Hackensack Extension Railroad—Cherry Hill to Nanuet	13¼
Paterson and Newark Railroad—Paterson to Newark	11¼
Piermont Branch—Piermont to Suffern	18
Newburgh and New York Railroad—Greenwood Junction to Vail's Gate	12¼
Newburg Branch—Newburg to Greycourt	18¼
Honesdale Branch—Lackawaxen to Honesdale	25
Jefferson Railroad—Susquehanna Junction to Carbondale	36¼
Chemung Railroad—Junction to Watkins	17¼
Buffalo, New York and Erie Railroad—Corning to Buffalo	141¼
Rochester and Genesee Valley Railroad Avon to Rochester	18¼
Buffalo Branch—Hornellsville to Attica	60
Buffalo, Bradford, and Pittsburgh Railroad Carrollton, to Gilesville	25¼
Suspension Bridge and Erie Junction Railroad—Buffalo to Suspension Bridge	23¼
Total	914
Second track	241¼
Side tracks	234¼

On 64¼ miles from Waverly to Watkins and from Buffalo to Suspension Bridge, a third rail has been laid to admit of the passage of narrow gauge trains, which is equivalent to a track of 82¼

Total length of track owned and leased..1,422¼

You also furnish train service and operate by contract the

Warwick Valley Railroad—Greycourt to Warwick	10
Goshen and Deckertown Railroad—Goshen to Pine Island	11¼
Montgomery and Erie Railroad—Goshen to Montgomery	10¼
Wallkill Valley Railroad—Montgomery to New Paltz	18
Middletown, Unionville, and Water Gap Railroad—Middletown to Unionville	14
Monticello and Port Jervis Railroad—Port Jervis to Monticello	24
Weekawken Branch Railroad and Fort Lee Railroad—East End of Tunnel to Stock Yards	5

Total length of track owned and operat d..1,515¼

To operate which 475 engines, 283 passenger cars, 71 baggage, express and mail cars, 3,352 box freight cars, 1,007 stock cars, 26 milk cars, 2,351 flat cars, 1,555 eight-wheel coal cars, 2,706 four-wheel coal cars, and 222 caboose cars, were on the road.

Of the 440 engines on hand at the commencement of the last fiscal year, during the year, 30, which had been condemned as worn out and unfit for further use except as old scrap iron, were broken up and destroyed, and 65 new engines were added to the equipment—by construction at the company's shops of 19, and purchase of 46. During the same time the equipment has been increased by 12 first-class passenger cars and 939 eight-wheel freight cars.

EARNINGS AND EXPENSES.

The earnings, from all sources, for the year ending Sept. 30, 1871, were as follows:

From passenger trains	$8,972,064 70
From freight trains	12,861,999 74
From other sources	333,940 72
	$17,168,005 16
Expenses of operating and repairs (72.5 per cent.)	12,446,355 87
Net earnings	$4,721,649 29
Interest and other payments, for details see accompanying statement	4,603,384 64
Surplus	$118,264 65

The expenses of operating and repairs for five preceding years were: 1866, 74.3 per cent; 1867, 71.3 per cent; 1868, 77.4 per cent; 1869, 79 per cent. and 1870, 75 per cent.

The earnings for the year would have been largely in excess of this amount, without a corresponding increase of expenses, but for the strike of coal-miners last winter and spring, which continued for a period of five months, during which time the transportation of anthracite coal on your road was suspended.

The sources of the passenger and freight business during the year are shown as follows:

PASSENGER BUSINESS, 1871.

Oct. 1, 1870, to Sept. 30 1871.

	Total No. carried in cars.	Carried one mile.	Revenue.
Through, East	128,175	19,525,340	$405,498 41
Through, West	138,470	30,759,436	657,179 77
Way, East	1,618,701	46,809,368	1,115,274 21
Way, West	1,624,116	51,148,651	1,169,714 88
Total, East & West	3,509,462	148,242,790	$3,247,667 27

FREIGHT BUSINESS, 1871.

	Total tons carried in cars.	Tons carried one mile.	Revenue.
Through, East	811,351	231,235,035	$4,861,615 76
Through, West	342,354	95,859,120	1,750,852 18
Way, East	2,683,995	493,840,333	5,128,573 71
Way, West	1,006,508	76,512,240	1,991,193 75
Total, East & West	4,844,208	897,446,728	$13,282,235 40

The business of the preceding year is shown in the following statement:

PASSENGER BUSINESS, 1870.

Oct. 1, 1869, to Sept. 30, 1870.

	Total No. carried in cars.	Carried one mile.	Revenue.
Through, East	102,730	19,938,151	$423,106 55
Through, West	114,914	32,784,681	554,327 80
Way, East	1,521,482	38,310,856	1,050,274 21
Way, West	1,535,899	42,555,421	1,139,168 78
Total, East & West	3,275,025	133,589,109	$3,166,877 34

FREIGHT BUSINESS, 1870.

	To'l Tuns carried in cars.	Tons carried one mile.	Revenue.
Through, East	815,844	232,138,955	$3,694,090 26
Through, West	295,580	81,750,361	1,680,611 52
Way, East	2,808,987	487,470,874	4,793,187 04
Way, West	932,094	97,502,528	2,160,138 43
Total, East & West	4,852,505	898,862,718	$12,328,027 25

The following statement of the source and amount of coal traffic on your road during the last year, notwithstanding the "long strike," shows a gratifying result:

COAL TRAFFIC, YEAR ENDING SEPT. 30, 1871.

From	No. of cars loaded.	Tons.	Revenue.
Hawley	83,373	770,227	$1,007,861 14
Honesdale	44,946	288,077	519,598 19
Carbondale	21,611	177,717	369,596 38
Binghamton	8,654	57 953	85,115 91
Waverly	44,492	533,713	785,168 95
Corning	74,562	729,901	275,911 89
Alton	1,590	18,924	17,712 20
Total	280,228	2,576,562	$3,010,964 16

The shipments from Hawley, Honesdale, Carbondale and Binghamton were anthracite; shipments from Waverly both anthracite and bituminous, and from Corning and Alton shipments were of bituminous coal.

On the 1st of September your lease of the Atlantic and Great Western Railway was surrendered, and that road passed into the possession of the trustees of the new Atlantic and Great Western Railway Company. The result of your lease of that railway, in the difference between the receipts and expenditures of the road, was a loss; but the actual result in retaining that line in the interest of the broad gauge system and working directly with and bringing business to your railway was undoubtedly very beneficial, and, if the profits of the business, to and from that railway, on your road, east of Salamanca, have not already more than compensated for the direct, local loss, the fact that the road had been preserved from the possession of other lines rivals to you in the carrying trade between the sea-coast and the West, and will continue to work harmoniously in your interest, warrants the belief that the ultimate result will prove the lease to have been entered into and carried out by you on perfectl sound business principles. Arrangements have been made with the new Atlantic and Great Western Railroad Company for the interchange of business, and for the working of the whole line in the same common interest as during the time of the lease, and that company has assumed your contract and lease with the Cincinnati, Hamilton and Dayton Railroad Company for the use of the broad gauge tracks between Dayton and Cincinnati, on such terms as relieves you from pecuniary responsibility of the contract, but at the same time, insures to your road the benefit of all through business over that line.

Amicable and satisfactory business relations have been maintained with the Lake Shore and Michigan Southern Railroad and its connections west of Buffalo, so that your road has been fully represented in procuring business to and from the West over the narrow gauge lines via Cleveland, and at the same time by the construction of the Suspension Bridge and Erie Junction Railroad, connection has been made with the Great Western Railway of Canada by which a large business has been obtained from that road and its connections, the Michigan Central Railroad and the Detroit and Milwaukee Railway; in fact, the additional business to your road by the construction of this suspension bridge road, far exceeds the most sanguine expectations, and it promises a large and steady increase in the future, while the local business of that new road has developed the ability of the road to be self-supporting.

Arrangements have been made with the City of Lockport to construct a branch road from that city to Tonawanda, which, it is expected, will be completed in a few weeks after settled Spring weather, and which will throw considerable local business on the Suspension Bridge road as well as give to your main line an additional amount of through business. The Newark and Hudson Railroad is in course of construction and will soon be completed from the west end of Bergen Tunnel to a connection with the Paterson and Newark Rail-

road at Newark. This road will have a large local passenger business to bring to your ferry, as it will reach a part of the City of Newark at present not having the benefit of a rail line to New York, and it will very much enhance the value of the Paterson and Newark Railroad and the country through which it runs. The Hackensack Extension Railroad Company is extending its road to Grassy Point, above Haverstraw, on the Hudson River, which will add much to the value of your lease of that road. During last year a contract was made with the new Oceanic Steam Navigation Company, by which the landing of their steamships was secured at Long Dock, and arrangements made for mutual exchange of business. This contract has had the effect of adding to the revenue of your ferry when any of their steamships have been in port. That company expects to have enough ships completed to form a regular weekly line early next spring, the advantages of which will be felt by your road as well as by the ferry.

When the present management assumed charge of your road, we found the use of the Bergen Tunnel very seriously interfered with by trains of the Dalaware, Lackawanna and Western Rail road Company, lessee of the Morris and Essex Railroad, and on looking into the matter it was found that a contract had been made in 1859 with the Hoboken Ferry to connect with the New Jersey Railroad near the Hackensack River, to run through the tunnel; but instead of building such a road, as contemplated by the contract, under authority subsequently obtained from the Legislature of New Jersey, they built an independent road to Newark, and there connected with the Morris and Essex Railroad—by extending that road west they made connection with the Pennsylvania roads and so on to all points in the Western country, and this was the road they were operating through the tunnel without any charge therefor. On calling attention of the officers of the Delaware, Lackawanna and Western and Morris and Essex Roads to the matter, and requesting an account and settlement for use of the tunnel, they claimed the right granted under the contract of 1859, for a branch of the New Jersey Road, and refused action on our request, so that we were obliged to resort to the courts. Suit was commenced in Chancery of New Jersey, to which they put in an answer in substance same as they had given to us, and at same time claimed that your company had, by acquiescence in their construction of the contract of 1859, in permitting them to use the tunnel as they pleased without formal demand for compensation, forfeited all right to question their position in the premises. About the time the suit was ready for final hearing before the Chief Justice, the matter was compromised and a new contract made, under which the Delaware, Lackawanna and Western Company are now paying us at the rate of about $60,000 a year for use of the tunnel, whereas previously they had paid nothing for it.

Application has been made to the Post-Office Department for an increase of compensation for transportation of United States mails, which, so far, has been only partly successful, as under the law as it now stands the Postmaster General does not consider that he has authority to pay us what is conceded to be but an adequate compensation for the service performed. It is hoped that Congress will correct this matter during its present session by necessary legislation. We are hauling two Post-Office cars each way daily over the road, on express passenger trains, beside performing mail service on several local trains, and the Post-Office Department, with a view of enlarged and improved mail service, is now asking us to increase the dimensions of the postal cars. The policy of this Company has been to furnish the public with the largest and best facilities for business, and in this matter of mail service you were the first to construct and put in operation the present system of postal cars, which are run at a cost in excess of the compensation. The public has had the benefit, while we have been trusting the Federal Government would readjust the pay and fix it at a proper amount.

The expenditures for repairs and new constructions, on the line of the road, for the convenience of the public and improvement of your property, have been continued from time to time in accordance with the established policy as indicated in the annual report of 1869. The economy in the use of steel and steel-headed rails is being clearly demonstrated every day, from the fact that with the large increase in the number of miles of road operated and to be maintained, the quantity of new rails required for repairs is constantly decreasing, and the condition of the track is at the same time improving. During the year ending September, 1870, there were used in repairs of track 2,872,558 feet, or 59,228,000 pounds of rails, while in the last year we used but 2,601,062 feet, or 53,692,000 pounds, showing a saving of 51 miles of rails, or 25¼ miles of road and 2,918 gross tons; and your track was in better order at the close of the last year than at the close of the preceding year. It is confidently expected that the cost and quality of new rails required for repairs will largely decrease every year from this time. We have, so far, put in the track about 100 miles of solid steel rails and 314 miles of steel-headed rails. The economy in the use of these rails is shown, also, in the cost of repairs and condition of the rolling stock, and also in the more expeditious manner in which the largely accumulating number of trains are now run over the road, from the decrease in the number of accidents, by broken or defective rails throwing cars and engines from the track, and the consequent damage and destruction of rolling stock.

In the matter of bridges, we have continued the system of renewing, when required, the wooden structures with iron; and at this time two of the most important bridges on the line, which were for single track only, are being renewed with iron, and enlarged for double track; one over the Passaic River, west of Paterson, is 365 feet long, of three spans; and one over the Delaware River, and Delaware and Hudson Canal west of Port Jervis, is 793 feet long, of five spans—one span of 170 feet, three spans of 158 feet each, and one span of 149 feet. The former bridge is being constructed by the Watson Manufacturing Company of Paterson, on the plan of Mr. S. S. Post, and the latter by the Kellogg Bridge Company, on the plan of Mr. Kellogg.

The benefit of the arrangements made by the present management for lessening the cost of fuel consumed in locomotives, which is one of the largest items of the daily cost of operations, is now being very sensibly felt, as is shown in the following statement of the cost of fuel during the five years last past: 1867, 22 cents per mile run; 1868, 18¼ cents per mile run; 1869, 18 cents per mile run; 1870, 10¼ cents per mile run; 1871, 10 cents per mile run.

All the arrangements made for securing to your road a sure and permanent business, and for an economical cost of operations, are beginning to have effect, and go to show that the policy of making the several expenditures with the view of securing permanent improvements, as specified in the last published annual report, is amply vindicated by the result. In conclusion, I have the pleasure of communicating the following report of a Special Committee, and a resolution of the Board of Directors:

At a meeting of the Board of Directors of the Erie Railway Company, held at the office of the Company, Dec. 28, 1871, the following report was submitted:

To the President and Directors of the Erie Railway Company.

GENTLEMEN: The Committee to whom was referred the subject of the earnings and expenses of the road for the current year ending Dec, 31, 1871, with the view of determining the expediency of declaring dividends on the preferred stock, having examined the statements submitted by the Auditor of the Company, find that for the first six months of the year there were no surplus earnings applicable to the payment of dividends on the preferred stock of this Company, but that for the last six months of the year the surplus earnings are such as to warrant the payment of dividends for that period, and give promise of such earnings as to justify the hope that the Company will be enabled to continue uninterruptedly the payments of dividends hereafter, and we would therefore respectfully recommend the resumption of dividends on the preferred stock from the 1st of July last, and that the first dividend of 3½ per cent be made payable on and after the 31st of January next.

Respectfully submitted,

JOHN HILTON,
HOMER RAMSDELL,
EDWIN ELDRIDGE.

And the following resolution was adopted:

Whereas, It appears to this Board, from an estimate of the earnings of the Erie Railway for the six months beginning July, 1, 1871, that a sufficient amount has probably been earned in that period to justify the resumption of dividends on the preferred stock; therefore,

Resolved, That the payment of dividends upon the preferred stock of the Erie Railway Company be resumed, and that a dividend of 3½ per cent, for the period of six months, ending December 31, 1871, be paid on and after January 31, 1872, upon demand of the preferred stockholders whose names shall appear upon the books of the Company as such, on December 31, 1871.

Resolved, That the transfer books of this corporation be closed, December 31, 1871, at 2 o'clock, p. m., to remain closed until the 31st day of January, 1872.

For full details of last year's operations I refer to the annexed statements made in the form prescribed by the Legislature of this State.

JAY GOULD, President.

New York, December 28, 1871.

☞ The Albany *Journal* says that next season the N. Y. Central railroad will lay down a third track the entire length of their line. Since the closing of the canals the management of the road find it quite impossible to forward the freight entrusted to them with dispatch, and not interrupt passenger travel. So much difficulty of the kind has never before been experienced. At Syracuse it is proposed to run the freight cars around the city on the north side, across the head of Onondaga Lake to Geddes, connecting there with the main line again.

☞ The St. Louis *Republican* says the manufactures of that city have produced in 1871, $142,308,135 against $109,513,950 in 1870; the receipts have increased from 23,908,918 bushels in 1870, to 26,261,728 in 1871; there has been 1,512,142 barrels of flour manufactured in the past against 1,251,773 in the preceding year; the iron production has increased from 72,000 tons of pig metal to 84,853 tons in 1871, and the railroad system has been increased by the completion of nearly 1201 miles of road.

☞ The total value of the exports from Baltimore to foreign countries for 1871 was $18,244,783, against $12,755,012 in 1870. The customs receipts on imports amounted to $8,909,688, against $9,193,498 in 1870.

☞ The earnings of the Providence and Worcester railroad for the year ending September 30, 1871, were $829,218, and the expenses $623,406—leaving net earnings $205,812.

☞ The first survey of the railroad route between North Bridgewater and Mansfield, Mass., is completed. The distance is 11 miles, and the estimated cost $350,000.

RAILROAD EARNINGS—MONTHLY.

Central Pacific (in gold):	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, January 13, 1872.

Stock Exchange and Money Market.

Though there has been a somewhat less urgent call for Money, yet the demand from speculative sources has been active, and, with no very marked increase in the offering either from bank or through private channels, rates on call have been kept up to from 7 per cent. currency to the Government houses, to 7 per cent gold, and, in many instances, a fractional commission to the Stock Exchange firms. In the line of discounts business has been comparatively slow, with the best grades of mercantile paper rated at from 9@12 per cent. per annum. Toward the close, the market seemed somewhat less stringent for the leading borrowers on call, though extreme rates were maintained. Considerable talk has been occasioned by the cable reports of the negotiation of $600,000,000 of new Five and Four-and-a-half per cent. bonds of the United States, said to have been completed by the Messrs Rothschilds, and Messrs Jay Cooke, McCulloch and Co.; but the dispatches relating thereto have been so conflicting that the actual facts of the case have been difficult to determine on the part of the general public. From Mr. Jay Cooke, himself, the information is said to have been received, to the effect that as early as December 21 the London house of Messrs Jay Cooke, McCulloch & Co., forwarded a proposition from the Rothschilds, acting with his firm, to negotiate for the United States Government $600,000,000 of the new bonds, one-half being the 5 per cents. and the remainder 4½ per cents., an essential condition of the proposition being that the interest on the greater part of the $600,000,000, all except $100,000,000, shall be made payable in London. The Secretary, who has had the proposition under consideration, is unable to accept that part of the proposition in regard to paying the interest abroad without further legislation; and, for the present, nothing can be done on that basis. These are said to be the essential facts of the case. The report of the negotiation, together with the diminishing prospects of a war with Spain, had a depressing effect on the price of Gold. The stringency in the discount line has led to considerable embarrassment in mercantile circles. A few suspensions have been announced, including one of some importance, in the domestic dry goods commission line.

The city banks, in their latest return, show a reduction of $244,300 of legal tender notes, with an increase of $3,771,100 of specie, and $5,427,400 of deposits; also an increase of $2,170,400 in their loan and discount averages, and a reduction of $50,600 in their item of circulation. The city bank exchanges, last week, averaged $134,255,866; and thus far, this week, 130⅛ millions daily. The banks now hold $10,299,000 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $28,820,600, against $26,358,191 same time last year. The city bank deposits are now $205,828,200, against $202,038,825 week ending Jan. 7, 1871. The legal tender reserve amounts to $40,058,500, against $49,031,410 same time last year. The circulation now stands at $28,492,200 against $32,114,718 same time last year. The loans are now $272,704,400, against $265,578,027 at this date last year.

The U. S. Sub-Treasury reduced its currency balance $2,483,902 and its coin reserve $6,557,447 as the result of the week's business. The receipts of the office were $4,684,925 in coin, and $2,200,128 in currency; payments, $11,242,073 in coin, and $4,684,030 in currency. The office received $2,335,000 in coin or its equivalent, from customs; and disbursed $3,266,820 of coin interest.

The U. S. Sub-Treasurer retired, last week, $2,049,984 of coin certificates, received for customs.

Government revenues have been on a moderate scale, since our last. The excises yielded last week about 2¾ millions, and thus far since July 1, about 70½ millions. The customs at the port of New York, last week were $2,257,984; and at the outports, equal to about $750,000 more, all in coin, or coin certificates.

The gold speculation, which was stimulated by the sensational rumors of impending trouble with Spain, closed on a less confident basis, and with less activity in the dealings. The offerings have been rather more liberal, with less buoyancy noted as to price, in the later transactions. The customs call has been moderate; and

the export drain unimportant. The range of the price during the week has been from 108⅝@109⅝ and the closing quotation on Wednesday was 108⅝@108¾ against 109⅛ the preceding Wednesday. The specie outflow, last week, was $3,414. The Gold Exchange Bank clearances have averaged about 51¾ millions a day during the week. Wednesday's clearance were $39,665,000.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from July 1, 1871 to Jan. 6, 1872 $49,572,632, against $52,654,551 same time in 1870-1871.

The customs demand for Gold last week, averaged $467,000 a day; thus far, this week, it has averaged $482,000 a day or equal to a weekly aggregate of $2,892,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $2,632, against $33,610 same time in 1871. The total customs revenue of the Government, in coin, at this port, from July 1, 1871, have been $79,695,221 against $73,950,768 same time in the preceding fiscal year 1870-71.

The export drain of specie was $3,414, last week, against $481,997, same week preceding year. The shipments since July 1, 1871 have been $22,660,523 against $42,668,875 same time in 1870-71.

Foreign Exchange has been less active and less firm. Bankers' sixty day bills on London closed on Wednesday at 109@109¼; sight bills on London, 109⅝@109⅞.

The produce exports from this port, week ending with Jan. 9, were to the currency value of $2,209,953.

Government securities have been in fair investment demand, mostly through the commission houses, at generally well supported prices. The offerings of the older issues have been on a limited scale.

Under the Treasury programme for January the U. S. Sub-Treasurer at the point proposed to sell, during the month, two millions of Gold, as follows: Thursday, January 11, $1,000,000; Thursday, January, 25, $1,000,000; and to buy in two million of U. S. bonds as follows: Thursday January 4, $1,000,000; Thursday January 18, $1,000,000.

London telegams of Jan. 9, report that Messrs. Seligman Brothers had introduced there and on the Continent four million of new bonds of the Territory of Columbia, at 87½. The loan was said to have been a great success; having been nearly all taken up before the books were regularly opened.

U. S. sixes of 1881 closed here on Wednesday of the current week at 115⅛@115⅜; U. S. Five-Twenties of 1862, (other than the bonds called in) 109⅝@110; U. S. Five-Twenties of 1864 at 110⅛@110½; U. S. Five-Twenties of 1865, 111⅜@111⅝; U. S. Five-Twenties of 1865 consolidated, 109¾@110; U. S. Five-Twenties of 1867, 111⅛@111¾; U. S. Five-Twenties of 1868, 111⅝@112; U. S. Ten-forties at 109⅝@109⅞; U. S. Fives of 1881 (Funding Loan) 109⅝@109⅞. Six per cent. currency bonds, 115⅝@115⅞.

noted for the better class of railway bonds, which have been generally firm in price. Central Pacific Sixes, have been in more request and higher, closing buoyantly at 102@102¼ ex the January coupon of 3 per cent. in gold. Chesapeake and Ohio Sixes have been more sought after by investment buyers on the basis of 94 per cent. and accured interest.

From the annual report of Messrs Fisk & Hatch, bankers of the Central Pacific Railroad and its Pacific coast connections, now being rapidly constructed by the same company, it appears that the earnings of the Central Pacific in 1871 were $9,546,000 as compared with $7,995,000 in 1870, with the expenses $4,325,000, against $4,194,000—reducing the ratio from 52⅞ per cent. of gross, to 45½ per cent. The interest account, (reduced to Currency,) $2,884,000—leaving $2,336,500 net for the company. The increase in overland freights in 1871 was enormous. As ascertained for nine months of the year, the gross was 14,116 tons of 2,000 lbs., against 4,007 tons for the same months in 1870. The California and Oregon branch of the main line when, completed will be 330 miles in length. It is now in operation 116 miles. The San Joaquin Valley Branch will embrace 152 miles, of which 58 miles are completed.

Railway and miscellaneous share property has been moderately active, and quoted much stronger in price. The dealings in Erie shares have been unusually extensive, during the week.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Dec. 27.	Jan. 3.	Jan. 10.
Consols	92½	92¾	93
U. S. 5-20's of 1862	92	92¼	91⅞
U. S. 5-20s, 1865	93⅞	94⅜	93¼
" 1867	93⅞	94⅜	93¼
" 10-40s	91¾	92⅛	92
Erie	27¾	30½	

State bonds have been comparatively quiet and irregular in price, closing rather weak.

A fairly active investment demand has been

General business has been somewhat brisker in the line of Domestic produce, with Flour, Wheat, Pork, and Lard quoted firmer in prices. Middling upland cotton closed on Wednesday at 21⅜ cts. per lb. The receipts at all the ports, since Sept. 1, have been 1,540,437 bales, against 1,816,797 bales same time in the preceding year; exports 728,511 bales, against 999,575 bales in the previous year; stock at the ports at latest dates, 515,656 bales, against 558,449 bales same date 1870.

At the Live Stock Markets, Beeves have been in more demand at from 9@13 cts.; Veals at 5@11 cts.; Sheep at 5½@8½ cts. Lambs at 6½@9½ cts.; Swine, at 5@5¼ cts. per lb., all live weight. The week's receipts were 6,266 Beeves, 1150 Veal Calves, 18,043 Sheep and Lambs; and 29,335 Swine.

Foreign goods have been comparatively slow of sale with values quoted essentially unchanged. The week's imports of foreign goods reached $6,062,984 including $1,432,623 of dry goods.

Ocean freights have been quoted firmer by steam, and depressed and irregular by sail. Steam room has been scarce. Sail room in fair supply. The demand for accommodation has been somewhat brisker.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—South Carolina 6s, new, Jan. and July, 24½; do., Apl. and Oct., 22; North Carolina 6s, special tax, 13; do. Fund Act, 1866, 24; California 7s, 108½; Brooklyn 6s, W. L., 94½; N. Y. State 6s, 1873@1874, 106; do. 7s, B. ☞ The Lynchburg tobacco trade for 1871 shows a large increase over that of 1870. The hhds. inspected were 7,367, against 3,718 in 1870—increase 3,649; of boxes 4,318, against 2,701—increase 1,619. There was also an increase in loose parcels. Reducing all descriptions to pounds, the increase in 1871 was 2,919,200 pounds.

☞ The stockholders of the Memphis and Charleston Railroad meet on the 17th inst. to vote on a proposition to lease that road to the Pennsylvania Railroad Company.

Susquehanna Canal.

We learn from the Philadelphia *Ledger* that the Philadelphia and Reading R. R. Co. have leased the Susquehanna Canal for 999 years, on the basis of the payment of an annual rent equal to the interest on the whole of the bonded debt of the Canal Company. One half the net earnings of the canal is to be paid in addition, as rent, with a guarantee that on and after the year 1880 this shall amount to at least 3 per cent. annually on the capital stock of the Company. The recent large purchases of coal lands by the Reading Railroad Company, their ownership of the Reading and Columbia Railroad, and the acquisition of the Susquehanna Canal, furnish abundant evidence of the intentions of the Managers of the Philadelphia and Reading Railroad Company to make Havre de Grace a great coal depot for Southern shipment, and to supply Baltimore and Washington with cheap anthracite coal.

☞ Suit has been commenced by the stockholders of the Rondout and Oswego Railroad against the company and directors of that road, enjoining and restraining the issue of first mortgage bonds in excess of $20,000 per mile of the finished road, the title of which has been acquired by the company. The parties to the suit claim that although the road lacks more than forty miles of being completed, and although for a number more miles of the road now in use the company has no title, bonds to the amount of $2,000,000 have been issued, which is all the company is entitled to issue were the road completed to Oneonta, its entire length.

☞ The message of the Governor of Maryland reports the State debt at $12,436,718, the State holding productive assets to the amount of $7,718,525. In addition the State hold over $20,000,000 productive stock and assets, more than $19,000,000 being in securities and interest due of the Chesapeake and Ohio Canal. It is believed, however, that this enterprise, which for nearly twenty-five years has been regarded as worthless, will soon yield the State a revenue of $500,000 annually.

☞ The receipts into the State Treasury of Maine during the past year, including $81,097 from the previous year, were $2,271,206; and the disbursements $2,115,911—leaving a balance in the Treasury of $155,295. The debt on January 1st was $7,227,900, a reduction of $840,000 during the year. The sinking fund was $798,295.

☞ The Directors of the Manchester and Claremont Railroad held a meeting in Manchester, N. H., on the 4th inst., and voted to build the road between Henniker and New Boston immediately; and the President was authorized to procure the necessary surveys. It is expected that the road will be leased by the Directors of the Concord Railroad as soon as it is finished.

☞ The Susquehanna Canal Company will pay the coupons due on the 1st instant on their coupon bonds on presentationat the First National Bank, Philadelphia and the interest on the Susquehanna Canal preferred bonds and the Tidewater priority bonds, maturing on the 1st proximo, will be paid at the company's office.

☞ WE RECOMMEND FOR INVESTMENT AND FOR EXCHANGES of U. S. FIVE-TWENTY BONDS, the FIRST MORTGAGE SIX PER CENT. GOLD BONDS of the CHESAPEAKE AND OHIO RAILROAD COMPANY, knowing them to be among the most satisfactory and substantial Securities known in the American and European markets.

The cost of the Road and equipment, when completed, will be about $30,000,000, and the value of its property and franchises within five years cannot be less than $50,000,000. The total amount of the Loan now in process of negotiation, and OF WHICH BUT A SMALL AMOUNT REMAINS UNSOLD, is $15,000,000.

A remunerative business for the CHESAPEAKE AND OHIO RAILROAD is not a matter of conjecture, or of slow future development, but is certain and immediate. It is believed, from most careful estimates, that the road will be completed in September or October, 1872, and that its net earnings, over operating expenses, in the first year after completion, cannot be less than $1,500,000 to $2,000,000, and that they will reach at least $6,000,000 per annum within five years.

We believe that the Bonds of the CHESAPEAKE AND OHIO are fully equal in value and security to those of the CENTRAL PACIFIC, and that when the road is completed they will command a like market price.

Present price, 94 and accrued interest. Interest and principal payable in gold in New York City. Interest May 1 and Nov. 1. Denominations $1,000, $500 and $100, coupon or registered.

We buy and sell, as usual, GOVERNMENT and CENTRAL PACIFIC BONDS, and receive them in exchange for CHESAPEAKE and OHIO BONDS. Accounts of Banks and others received, on which we allow interest at the rate of four per cent. Orders for Investment Stocks and Bonds executed at the Stock Exchange.

FISK & HATCH.

HARVEY FISK,
A. S. HATCH.

☞ The North Missouri Railroad Company has been reorganized under the General Railroad Law, with the following board of directors: T. B. Blackstone, President of the Chicago and Alton Railroad Co.; John J. Mitchell, a director of do.; Thos. A. Scott, Vice President of the Pennsylvania R. R. Co.; Hugh McCulloch, Superintendent of the Pittsburg, Cincinnati and St. Louis and Pittsburg, Ft. Wayne and Chicago Railroads; Adolphus Mier, President of the Kansas Pacific R. R. Co.; Solon Humphreys and J. A. Jamison, of New York; James H. Britton, James Beads and Wm. M. McPherson, of St. Louis.

☞ The Camden (Me.) *Herald* says the cost of the Penobscot Bay and Rockland Railroad will be at the rate of about $25,000 a mile, leaving $15,000 a mile to be raised by the sale of the balance of the bonds, by town aid and private subscriptions. The route is divided into six sections, and as each is completed the Knox and Lincoln will take a lease and put on rolling stock.

☞ The total funded debt of the City of Newark, N. J., is $291,900, against which the city hold a sinking fund credit of $260,696.

Journal of Railroad Law.

RAILROAD COMPANIES NOT LIABLE FOR INJURY TO PASSENGERS IN ABSENCE OF NEGLIGENCE.

The case of McPadden *vs.* The New York Central Railroad Company, (44 N. Y., 478,) was an action to recover for injuries sustained by the plaintiff, while a passenger upon the defendant's road. The cause was tried at the Rochester Circuit in January 1865, and it appeared, among other things, that on the 5th of January, 1864, the plaintiff took passage on a train at Rochester going westerly intending to go to Knowlesville. The train stopped at Brockport, and there met a train coming east. About half a mile west of Brockport, the two passenger cars of the train going west were thrown from the track, and the car in which the plaintiff was riding was overturned, and he was injured. The train going west was not under full head-way, going at the rate of about twenty-five miles per hour. The train going east passed the place of the accident at the rate of twenty-five to thirty miles per hour.

The accident was caused by a broken rail, a piece of the rail, about four feet in length, being broken in three or four pieces.

The following is the opinion of the Court delivered by—

EARL, C.—The General Term granted a new trial upon the ground that the judge, at the circuit, should have submitted to the jury the question whether the rail was broken before it was reached by the train going west, carrying the plaintiff; and it held, if it was thus broken that the defendant was liable, irrespective of any question of negligence within the principle of the case of Alden *vs.* The N. Y. C. R. R. Co. (26 N. Y. 102) upon the ground that it was bound to furnish a road adapted to the safe passage of trains, or in other works "a vehicle-worthy road."

I am obliged to differ with the General Term, for two reasons: first, if the rail was broken before it was reached by the train going west, it must have been broken by the train going east shortly before, and there is no evidence whatever, that it was broken by that train. All the evidence tends to show that it was broken by the train going west. Such is the evidence of the conductors and engineers of both trains, there is no presumption that the rail was broken before this train reached it. It is unquestioned that the accident was caused by the broken rail, and if the plaintiff claimed that the defendant was liable, because the rail was broken before the train upon which he was riding reached it, it was incumbent upon him to prove it. This he failed to do, and if the jury upon the evidence had found it, it would have been duty of the court to set the verdict aside as against the evidence. But there is another reason. It does not appear, that plaintiff's counsel, upon the trial, claimed that he had shown any negligence against the defendant, and he did not claim to go to the jury upon any such question, and the General Term did not grant a new trial upon the ground that there was any question of negligence in the case which ought to have been submitted to the jury, but upon the ground above stated.

In the case of Alden *vs.* N. Y. C. R. R. Co., the accident by which the plaintiff was injured was caused by the breaking of an axle of the car in which the plaintiff was riding, and it was held that a common carrier is bound absolutely, and irrespective of negligence, to provide road-worthy vehicles, and that the defendant was liable for the plaintiff's injuries caused by a crack in the axle, although the defect could not have been discovered by any practicable mode of examination. That case was a departure from every prior decision, and authority to be found in the books of this country or England, and so far as I can learn, has never been followed anywhere out of this State. It was in conflict with the previous case in the same court, of Hegeman *vs.* The Western R. R. Corporation (3 Kern. 9). The only authority cited to sustain the decision, was the English case of Sharp *vs.* Gray, (9 Bing. 457,) and yet the decision has been distinctly repudiated in England, the well considered case of Readhead *vs.* Midland Railway Co., first decided in the Queen's Bench (Law Reports 2 Q. B. 412,) and then on appeal in the Exchequer Chamber (Law R. 4 Q. B. 379), where it was unanimously affirmed in 1869; and the court held that the contract made by a common carrier of passengers for hire, with a passenger, is to take due care (including in that term the use of skill and foresight) to carry the passenger safely, and that it does not contain or imply a warranty that the carriage in which he travels shall be in all respects perfect for its purpose, and road-worthy. In the Exchequer Chamber, Mr. Justice Smith writing the opinion of the court alludes to the case of Alden *vs.* The N. Y. C. R. R. Co., and dissents from it, and comments upon the case of Sharp *vs.* Gray, relied upon in that case and he shows clearly that it was no authority for the broad doctrine laid down in that case. He says: "We have referred somewhat fully to this case, (Sharp *vs.* Gray) because it was put forward as the strongest authority, in support of the plaintiff's claim, which can be found in the English courts, and because it was relied on by the judges of the Court of Appeals of New York, in a decision which will be afterwards referred to. But the case, when examined, furnishes us sufficient authority for the unlimited warranty now contended for. The facts do not raise the point for decision." Hence the case of Alden *vs.* N. Y. C. R. R. Co. has no foundation of authority whatever to rest on, and the only reason given for the decision is, that the new rule adopted would be plainer and easier of application, than the one that had been recognized and acted upon for hundreds of years. It was always supposed that there was a difference founded upon substantial reasons, between the liability of the common carrier of goods, and the common carrier of passengers. The former was held to warrant the safe carriage of the goods except against loss or damage from the act of God or the public enemy, but the latter was held to contract only for due and proper care in the carriage of passengers.

I have thus commented upon and alluded to the case of Alden *vs.* The New York Central Railroad Company, with no design to repudiate it as authority, but for the purpose of claiming that it is a decision which should not be extended. I am unwilling to apply it to every case that apparently comes within its principle, nor will limit it to the car in which the passenger was riding. The whole train must be regarded as the vehicle, and the engine and all the cars attached together must be free from defect and road-worthy irrespective of negligence. So far, and no further, am I willing to regard that case as authority. Shall it be applied to steamboats and vessels, common carriers of passengers upon the ocean and our inland waters? Shall it apply to innkeepers, proprietors of theaters and other places of public resort, who invite the public into their buildings, for a compensation? And shall all such persons be held to an implied warranty that their buildings with the appurtenances are suitable and proper, and free from all defects which no foresight could guard against or skill detect? Shall it be applied to the road-bed of a railroad? If so applied, where shall it stop? It must also extend to the bridges, masonry, signals, and, in fact, to all the different parts of the system used in the transport of passengers by railroad. And, as railroad companies are responsible for the skill and care of all their human agents, such an extension of that decision would make them substantial insurers of the safety of all their passengers, and thus practically abolish the distinction between the liability of the carriers of passengers and the carriers of goods. While such a rule would "be plain and easy of application," I am not satisfied that it would be either wise or just. Railroads are great public improvements, beneficial to the owners, and highly useful to the public. There is a certain amount of risk incident to railroad travel, which the traveler knowingly assumes; and public policy is fully satisfied, when rail roadcompanies are held to the most rigid responsibility for the utmost care and vigilance for the safety of travelers.

If, therefore, the jury had found that the rail was broken by the eastward bound train, it would still have been a case of mere accident, caused without any want of proper care and vigilance on the part of the defendant, and the defendant would not have been liable.

I am therefore in favor of reversing the order of the General Term and ordering judgment upon the non-suit for the defendant with costs.

Ordered accordingly.

Finances of Maryland.

EXTRACTS FROM THE REPORT OF THE COMPTROLLER.

The total receipts into the treasury from all sources during the fiscal year ended 30th September, 1871, amounted to $2,672,998 78, which sum, added to the balance in the treasury 30th September, 1870, viz., $292,750 17, makes the entire amount in the treasury for the fiscal year $3,165,-748 95. Of this, the sum of $677,601 was raised from the sale of stock in the Baltimore and Ohio railroad, under the act of Assembly of Jan. session, 1870, chapter 275, and the sum of $94,367,-06 was derived from the investment of the increment of the "sinking fund" in the Maryland defense loan, under the act of Assembly passed at January session, 1868, chapter 235; leaving the ordinary receipts for the fiscal year to amount to $1,901,030 72, being larger than the receipts from ordinary sources for the fiscal year of 1870 by the sum of $28,088 60.

The total disbursements during the fiscal year amounted to $2,713,502 25. Of this amount the sum of $616,238 66 was for the redemption of the State stock falling due after 1870, leaving the disbursements for ordinary purposes to be $2 097,-263 89, being less than the disbursements for ordinary purposes during the fiscal year 1870 by the sum of $350,409 45, and less than those for the same purposes for the fiscal year 1869 by the sum of $797,569 24.

The balance in the treasury at the end of the

fiscal year 1871 was $452,246 90, of which the sum of $61,543 45 arises from the sale of the stock of the Baltimore and Ohio Railroad Company, and is applicable only to the redemption of the State debt falling due after the year 1870, leaving the sum of $390,703 45 applicable to the ordinary requirements of the treasury.

The funded debt of the State amounts in the aggregate to the sum of $12,436,718 68, on which the interest is to be paid. Of this sum, $5,985,444 44 is sterling debt, on which the interest is payable in London in gold and silver. The State has available assets in entirely reliable stocks to the amount of $6,553,250 90 which offset an equal amount of the funded debt, leaving $5,883,467,78, on which the interest must be provided by taxation. A large amount of indebtedness to the State on the part of various companies and institutions, as well as from collectors of taxes, and other officers whose accounts are in arrear, may be made available by proper legislation to reduce the debt probably to the extent of $1,500,000.

The debt of the State has been reduced during the fiscal year by the sale and exchange of the stock of the Baltimore and Ohio Railroad Company, to the amount of $1,050,073 24.

Upon the assumption that judicious legislation will result in realizing from the mass of indebtedness to the State, above mentioned, the sum of at least one and a half million of dollars, the real amount of debt for which the State may be said to have no reliable offset would be $4,383,467,78.

Under the new act, overdue bonds and certificates to the amount of $476,000, falling due after 1870, have been, during the fiscal year, exchanged for corresponding new bonds and certificates bearing interest at six per cent. per annum, and payable after the year 1885.

A demand being made for the payment of a large amount of the overdue bonds, a proposition was received to sell a portion of the common stock of the Baltimore and Ohio railroad held by the State, (the dividend being near maturity,) at $140 per share of $100, which was accepted, and a sale of the balance of the stock was subsequently effected at the same rate, deducting the dividend which had been already paid, and the proceeds of said sales have been applied to the payment of such of the bonds and certificates of indebtedness of the State as became due after the year 1870, and payment of which was demanded, amounting to the sum of $616,057, 55, and leaving, after payment of commissions, $61,543 45 in the treasury still liable to that purpose.

Finances of the State of New York.

ABTRACT FROM THE REPORT OF THE COMPTROLLER.

The total funded debt of the State on the 30th of September, 1870 and 1871, was as follows:

	1870.	1871.
General fund	$4,040,026 40	$4,040 026 40
Contingent	68,000 00	68,000 00
Canal	11,966,580 00	11,966,580 00
Bounty	22,567,000 00	22,047,000 00
	$38,641,606 40	$38,121,606 40

The amount of the State debt on the 30th of September, 1871, after deducting the unapplied balances of the Sinking Funds, was:

	Balance of Sinking Funds on the 30th Sept., 1871.	Balance of debt after applying Sinking Funds.
General Fund	$1,805,744 29	$2,234,282 11
Contingent	19,139 89	48,860 11
Canal	1,654,226 27	10,312,353 73
Bounty	5,159,792 43	16,887,206 57
	$8,638,903 88	$29,482,702 52

The State debt on the 30th of September, 1870, after deducting the unapplied balances of the Sinking Funds, amounted to	32,409,144 26
Showing a reduction of	$2,926,441 74

The following statement gives the items of the General Fund Debt on the 30th of September, 1871:

Astor stock, chapter 302, Laws of 1827, and chap. 86, Laws of 1832.	$561,500 00
Deficiency loans under chap. 216, Laws of 1848	3,237,887 77
Comptroller's bonds	66,443 76
Indian annuities	122 694 87
Not paying interest	51,500 00
	$4,040,026 40

The principal of the debt is payable as follows:

On demand	$30,443 76
1875	900,000 00
1878	800,000 00
At pleasure	2,258,082 64
Paying interest	$3,988,526 40
Not paying interest	51,500 00
	$4,040,026 40

The following statement gives the receipts and payment, on account of the General Fund Debt Sinking Fund for the fiscal year ending September 30, 1871:

Receipts:		
Balance in the Treasury Oct. 1, 1870		$439,001 13
Received from surplus canal revenues		569,974 61
Transferred from the General Fund, for interest on Money in the Treasury, during the year		43,552 78
		$1,052,528 52
Payments, viz:		
Interest on General Fund Debt	$211,440 46	
Premium on coin to pay interest on debt	9,129 10	
Indian annuities	7,261 66	
Premium on coin to pay annuities	441 69	
		228,372 91
Balance in Treasury September 30, 1871		$824,155 61

The contribution to the General Fund Debt Sinking Fund, for the fiscal year ending September 30th, 1871, under section 2, article 7, of the Constitution, amounting to $981,588 68, and since paid in, makes the actual balance as of that day $1,805,744 29. This contribution, it will be seen was $411,614 07 more than in the previous year, but still $518,411 32 less than the contribution contemplated by section 2, article 7. Another year, it is believed the contribution will come up to the full constitutional measure.

The aggregate of the Canal Debt on the 30th day of September, 1870, was $11,966,580, with an aggregate unapplied balance of Sinking Funds of $2,149,884 61, leaving the real balance unprovided for of $9,816,695 39. On the 30th day of September, 1871, the account stood as follows: aggregate debt, $11,966,580; aggregate of Sinking Funds, $1,654,226 27—real balance unprovided for, $10 312,353 73.

Of the principal of the Canal Debt, the sum of $1,562,900, is redeemable July 1, 1872, and $847,500 January 1, 1873.

The tolls collected for the year ending September 30, 1870, were $3,080,893 57; and for the year ending September 30, 1871, $2,813,686 29—showing a falling off of $267,207 28. The receipts from all sources for the year ending September 30, 1870, were $3,107,138 90, the expenses $2,537,164 29, and the net revennes $569,974,-61. For the year ending September 30, 1871, the receipts from all sources were $2,842,549 94, the expenses $1,860,961 26, and the net revenues $981,588 68—showing a falling off in receipts of $264,588 96, with a falling off in expenses of $676,203 03—making the increase in net revenue $411 614 07.

The only Contingent Debt of the State is that incurred for the Long Island Railroad Company, the interest of which is paid, and the principal of which will be provided for by that company. The amount Sept. 30th, 1871, was $68,000. The Sinking Fund for its payment on the same day amounted to $19,139 89.

On the 30th of September, 1871, the outstanding stocks and bonds representing the Bounty Debt, amounted to $22,047,000, classified as follows: Registered stock, $20,675,000; coupon bonds, $1,372,000.

The receipts and payments on account of the Bounty Debt Sinking Fund for the year ending September 30, 1871, were as follows:

Receipts:		
Balance in the treasury Oct. 1, 1870.		$2,704,287 99
Proceeds of 2½ mills tax levied in 1870, in pursuance of chapter 325, Laws of 1865		4,096,279 97
Interest on investments		88,193 82
Transferred from the general fund for interest on money in the treasury during the year		103,102 68
		$6,941,864 16
Payments, viz.:		
Interest on debt	$1,577,224 02	
Purchase of stocks and bonds for investment	657,000 00	
Interest on bonds purchased	2,104 47	
Premiums and commissions on stock purchased	43,164 13	
		2,279,492 62
Balance in Treasury Sept. 30, 1871.		$4,662,371 84

To the above balance should be added, as constituting a part of the capital of the fund, the sum of $883,244 09, making a total of $5,545,615 93.

This debt becomes due in April, 1877, and to keep up the Sinking Fund to a point adequate to its extinguishment at maturity, requires an annual contribution of $3,953,911 66.

The statement of revenue shows a nominal but not wholly real deficiency of $8,878,806 62 on Sept. 30, 1871, but taxes unpaid on that day and advances made for appropriations for 1872 are $6,550,881 89 leaving, an actual deficiency of $2,327,924 73, being $213,178 56 in excess of the estimated deficiency.

☞ The Hagerstown *Mail* says that great vigor is now manifested in the prosecution of the Western Maryland railroad, and it is anticipated that within a few weeks it will be open for travel and trade to Smithburg.

☞ The officers of the West Side Elevated Railway, recently elected are: President, William E. Wallace; Secretary and Treasurer, H. W. Taylor; Directors, W. L. Wallace, David Dows, George H. Marvin, E. C. Delevan, F. H. Tows, John F. Tracy; Inspectors of Election, D. W. Wyman, H. F. Lombard, J. R. Jessup.

Movements of Produce.

Receipts of certain articles of domestic produce at the port of New York for the year—

☞ From October 1st, 1870, to September 30th, 1871, there was brought to Baltimore by the cars of the Baltimore and Ohio Railroad 1,591,602 tons of coal (exclusive of the Company's supply), 1,077,649 barrels of flour, 42,300 barrels of coal oil, 68,747 tons of grain, 41,383 tons of lumber, 63,201 tons of live stock. The through merchandise over the road from the East to the West during the same time was 435,207 tons.

Finances of Pennsylvania.

EXTRACT FROM THE MESSAGE OF THE GOVERNOR.

After thorough examination of the reports from the accounting departments, the following statement is submitted:

RECEIPTS.

Balance in Treasury, Nov. 30, 1870.		$1,302,942 82
Ordinary receipts during the fiscal year ending Nov. 30, 1871		6,489,234 95
Extraordinary receipts from the United States government, on account of Pennsylvania war claims, applied to the payment of the State debt		708,710 67
Total in Treasury during year ending Nov. 30, 1871.		$8,500,888 44

DISBURSEMENTS.

Ordin'y expenses paid during the year ending Nov. 30, 1871	$3,018,819 35	
Loans &c., redeemed	2,220,224 59	
Interest on loans	1,785,035 91	
		7,024,079 85
Balance in Treasury, Nov. 30, 1871.		$1,476,808 59

PUBLIC DEBT.

The public debt on November 30, 1870 was		$31,111,661 90
Deduct amount paid by Sinking Fund Commissioners during the year ending Nov. 30, 1871	$2,113,228 63	
Amount paid by State Treasurer during the same time.	18,361 54	
		2,131,590 17
Total public debt, November 30, 1871		$28,980,071 73

The following statement shows the nature of the indebtedness of the Commonwealth, November 30, 1871:

FUNDED DEBT, viz:

Amount over-due loans	$2,502,695 16
Amount payable in 1872 and 1877, interest 6 per cent	3,786,530 00
Amount payable in 1872 and 1877, interest 5 per cent.	92,870 00
Amount payable in 1877 and 1882, interest 6 per cent	7,890,550 00
Amount payable in 1877, interest 5 per cent.	3,399,700 00
Amount payable in 1878, interest 5 per cent.	290,000 00
Amount payable in 1879, interest 6 per cent.	400,000 00
Amount payable 1882 and 1892, interest 6 per cent.	9,271,850 00
Amount payable in 1882, interest 5 per cent.	1,119,950 00
Amount payable in 1882, interest 4½ per cent.	112,000 00
Total funded debt.	$28,866,145 16

UNFUNDED DEBT.

Relief notes in circulation	$96,347 00	
Interest certificates outstanding	13,086 52	
Interest certificates unclaimed.	4,448 38	
Domestic creditors' certificates	44 67	
		113,926 57
Public debt, Nov. 30, 1871, as before stated		$28,980,071 73

The Commissioners of the Sinking Fund report assets remaining in their hands as follows, viz:

Bonds of the Pennsylvania Railroad Company, secured by lien on the Philadelphia and Columbia Railroad.		$5,900,000 00
Thirty-five bonds of the Allegheny Valley Railroad Company, each for $100,000, guaranteed by the Pennsylvania Railroad Company, Northern Central Railroad Company and the Philadelphia and Erie Railroad Company, payable $100,000 annually, beginning January, 1875, with 5 per cent. interest from January 1, 1872.		3,500,000 00
Amount of assets.		$9,400,000 00
Amount of public debt		$28,980,071 73
Deduct amount of assets.	$9,400,000 00	
Cash balance in the Treasury, Nov. 30, 1871.	1,476,808 59	
		10,876,808 59
Balance of public debt unprovided for		$18,103,263 14

In obedience to the sixty-seventh section of the Appropriation bill, approved May 27, 1871, the State has issued for the relief of the citizens of Chambersburg and vicinity, for war damages adjudicated under former acts, certificates of loan to the amount of $299,748 91, which sum bears interest at six per cent., payable semi-annually at the State Treasury.

The books of the Auditor General and State Treasurer show the total indebtedness of the Commonwealth, on the first day of December, 1866, was $37,704,409 77. Since then, and up to November 30, 1871, the sum of $8,724,338 04 has been paid. The reduction during the year ending November 30, 1871, is $5,131,590 17. The average reduction during the last five years is $1,744,867 75.

It will be observed, in the table exhibiting the nature of your indebtedness of the Commonwealth, the amount of the loans now overdue is $2,502,695 16. This sum can, without doubt, be paid as rapidly as the holders will present it to the Commissioners of the Sinking Fund. The bonds payable in 1872, and demandable in 1877, amount to $8,879,400. These can also be paid within the five years prior to their maturity, at an average of $775,880 per annum.

New Stocks.

At a meeting of the New York Stock Exchange, held on the 30th ult., the following reports of the Committee on Stock List were read, accepted and adopted;

The Pittsburg, Fort Wayne and Chicago Railway Company will issue on and after January 1, 1872, twenty thousand shares of new stock, to be designated as 'Guarantied Special Stock." The following is the official statement in regard to it:

This issue is made in conformity with article sixteenth of the lease of the railway of this company to the Pennsylvania Railroad Company, by which the latter agreed to place additional equipment upon our road and make certain other additions and improvements, and this stock represents the actual cash value of property so placed upon the railway of this company by the lessee, the title to which property is now in this company. The shares are to be one hundred dollars each, entitled to dividends at the rate of 7 per cent. per annum, payable quarterly, free of all taxes, and which dividend is guarantied to the holder of each certificate by the Pennsylvania Railroad Company, as expressed in the body of said certificate, and in accordance with the agreement of said company, a certified copy of which is indorsed upon each certificate. This stock will in no manner effect the rights of the holders of the stock heretofore issued by this company, the dividend upon which is provided by the rental received from and guarantied to be paid by the Pennsylvania Railroad Company to this company.

The committee recommend that the new stock be placed upon the regular list and called immediately after "Pittsburg Fort Wayne and Chicago guarantied stock" as "Pittsburg, Fort Wayne and Chicago guarantied special stock."

The Committee on Stock List also reported the official statement of the Toledo, Peoria and Warsaw Railway Company (Burlington Division) as follows: Length of road, 10 miles, from La Harpe, Illinois, to Lomax, Illinois, connecting with road running to Burlington Iowa.

First mortgage seven per cent. bonds, dated June 1, 1871; mature June, 1901; interest payable June 1 and December 1; principal and interest payable in New York city, $250,000; denomination, $1,000; numbered 1 to 250 inclusive. Trustee, James F. Secor. The committee recommend that the bonds be placed on the free list, and called immediately after the second mortgage bonds as "Toledo, Peoria and Warsaw, Burlington Division, seven per cent. bonds."

The Committee on Stock List also respectfully report that the Cleveland and Pittsburg Railroad Company, having been leased by the Pennsylvania Railroad Company, propose issuing a new stock to be called "Cleveland and Pittsburg guarantied stock," in place of "Cleveland and Pittsburg stock," at the rate of $142 85-100 of the new for $100 of the old; and they recommend that on and after January 5, 1872, the "Cleveland and Pittsburg stock" be dropped from the list, and the "Cleveland and Pittsburg guarantied stock" be called in place thereof, and in settlement of contracts $142 85-100 of the new stock be given for $100 of the old.

The same committee, also reported the official statement of "the Cincinnati and Springfield Railway Company," organized under the general law of the State of Ohio.

Length of road, including thirty-two miles of leased lines, 80 miles. Extending from Cincinnati, Ohio, to Springfield, Ohio, connecting at the latter place with the Cleveland, Cincinnati and Indianapolis Railway Company, the Cincinnati, Sandusky and Cleveland railroad, and the Springfield and Columbus railroad, and to be operated by the first-named company as soon as completed and under perpetual lease; thus forming a through route between Cincinnati and Buffalo, New York via Springfield, Delaware and Cleveland, Ohio.

First mortgage seven per cent. bonds, dated April 1, 1871, mature April 1, 1901. Interest payable April 1 and October 1. Principal and interest payable at office of the Union Trust Company, New York city. Principal and interest guarantied by the Cleveland, Columbus, Cincinnati and Indianapolis Railway Company:

No. 1 to 1,000, inclusive	$1,000,000
Principal and interest guarantied by the Lake Shore and Michigan Southern Railway Company, No. 1,001 to 2,000.	1,000,000
Total	$2,000,000
Denomination, $1,000, each. Trustee the Union Trust Company, of New York city.	
Capital stock ($5,000,000,) amount issued (Shares, $50 each.)	1,100,000
Total	$3,100,000

The committee recommend that the bonds be placed upon the Free List, and called in two series as "Cincinnati and Springfield first mortgage bonds, guarantied by the Cleveland, Columbus, Cincinnati and Indianapolis Railway Company," and "first mortgage bonds guarantied by the Lake Shore and Michigan Southern Railway Company." The resolutions as adopted, will take effect immediately.

Contract for BUILDING and OPERATING at any point required.

MACHINERY and APPLIANCES for RIVER, HARBOR and BANK IMPROVEMENTS, constantly on hand, and furnished on short notice.

CAMP'S IMPROVED DUMPING CAR.

RIGHTS FOR SALE BY

A. W. RHOADS & CO.,

Wilkes-Barre, Pa.

A. W. RHOADS, N. H. CAMP.

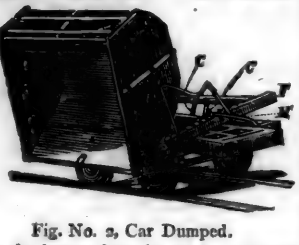

Fig. No. 1, Car Loaded & at Rest. **TO DUMP THE CAR.** Fig. No. 2, Car Dumped.

The Brakeman seizes the lever H, and raises it about a foot, thus releasing the hopper from the catch, C, and the tilting-frame, F, from the catch, C, when the hopper, K, yields to the force of gravity and rolls over to the position shown in Fig. 2.

To Replace the Hopper in Readiness for another Load.

The brakeman bears his weight on the up-end of the tilting-frame, F, forcing it down to its place, when the hopper rolls back to *its* place, where it is held by the catches, C and C.

Address, A. W. RHOADS & CO., Wilkes-Barre, Pa. Lock Box 131.

ENGLISH AND SCOTCH FIRE BRICK

In Store and to Arrive

AT NEW YORK, BOSTON AND PHILADELPHIA.

INVESTING MONEY.

THE NORTHERN PACIFIC RAILROAD offers to investors the tangible and perfect security of a first-class railroad bond and a real estate mortgage combined, where the holder has no anxiety about the title to the property on which his bond is secured. Its 7-30 bonds are exempt from United States taxation, at all times readily negotiable, and make the highest return of profit on the investment compatible with undoubted safety. The bonds pay $78 interest in gold on each $1,000 invested, which becomes a first lien on the great railroad, and a first and only mortgage on the finest land in the country, at the rate of 500 acres for each $1,000 bond. These 7-30 Gold Bonds of the Northern Pacific Railroad Company are issued in denominations of from $100 to $10,000 each, making them equally convenient as 5-20s, just as safe and much more profitable to the holder.

Full particulars furnished by JAY COOKE & Co., New York, Philadelphia, and Washington, and by Banks and Bankers throughout the country.

The Lexington and Big Sandy Railroad.

We learn from reliable sources that the work on the Elizabethtown, Lexington and Big Sandy railroad is being pushed forward between Lexington and Mt. Sterling in a very gratifying manner.

The subscriptions to the road have been: Lexington, $250,000; Fayette county, $250,000, Clarke county, $200,000, and Montgomery county, $250,000. Total, $950,000. The subscriptions of Lexington and Fayette county have been paid and the bonds issued. The subscriptions of Clarke and Montgomery counties are paid by installments as the work progresses.

The Big Sandy road has not been sold to the Chesapeake and Ohio Railroad Company, but great capitalists who control the Chesapeake and Ohio road have now a controlling interest in the Big Sandy road; and as they also own a controlling interest in the road from Lexington to Louisville and from Cincinnati to Louisville, it is not likely that the projected extension from Lexington to Elizabethtown will be built at once.

From Lexington to Mt. Sterling is a distance of thirty-three miles, upon which there were, just before Christmas, seven hundred men and two hundred and twenty carts at work; but the number has fallen off a little. There is, however, no scarcity of labor, and as there can be got from Tennessee and Virginia as many hands as may be needed, there will not be fewer than a thousand hands at work on the road between Lexington and Mt. Sterling by the end of this month.

The contractors for the work between Lexington and Mt. Sterling are Messrs. BIBB, KABLER and HOUSTON, for twenty-four miles, and JAMES KERR, for nine miles. As four hundred and twenty-six thousand dollars have been already expended on the graduation of this portion of the Big Sandy road, it is believed that two hundred thousand dollars will be amply sufficient to complete it for putting down the iron. The trestle-work, of which there is considerable, is being prosecuted energetically. The track laying will be begun on the first of April, 1872. The cars will certainly be running from Lexington to Mt. Sterling by July 1st. East of Mt. Sterling the work is entirely undetermined, although surveys are progressing, just as surveys have been made on the north side of the Ohio, from the mouth of Sandy to Cincinnati, and also from Big Sandy to Cincinnati by way of Simms' creek. The people of Kentucky, and especially of Louisville, will be glad when the parties owning the controlling interest in the Chesapeake and Ohio road set to work energetically to extend the Big Sandy road from Mt. Sterling to the mouth of Sandy, a distance of ninety miles by the shortest possible route. When that part of the great through-line eastward is built, and advantage taken of projected cut-offs, the distance from Lexington to Washington will be the same as from Lexington to Richmond, five hundred and fifty miles.—*Louisville Courier.*

The Trans-Continental Railroad.

Arrangements have been completed between the Louisville and Nashville and the Atlantic, Mississippi and Ohio Railroad whereby the Louisville and Nashville Road will assume, in part, the building of the gap in the Atlantic, Mississippi and Ohio Road between Bristol, Virginia, and Livingston, Kentucky, a distance of one hundred and sixty six miles. The work will be put under contract immediately, and pushed forward with all possible energy to a speedy completion. The first work to be put under contract will be the tunnel at Cumberland Gap, 4,200 feet in length, 3,000 feet of which are in Kentucky, and will be built by the Louisville and Nashville Road, while the balance of the tunnel and the road thence to Bristol, will be built by the Virginia Company.

This road is known as the Norfolk route or the Trans-continental Railroad, and already four hundred and eight miles of it, from Norfolk to Bristol, are completed and being operated. The completed portion of the road is divided into the Norfolk and Petersburg Division, the South Side Division and the Virginia and Tennessee Division, and the road is an almost air line from Norfolk by way of Petersburg, and is an air line, as near as possible, from Bristol to Louisville.

This road is a most important one to the commercial interests of Louisville, inasmuch as it will be the shortest and most direct all-rail route from Louisville to the Atlantic seacoast at both Norfolk and New York. The completion of the road will make Louisville independent of the present trunk lines east, giving her cheap freights, the shortest routes, and immunity from the damaging freight-rate discriminations made against that city by the present lines east. It gives to Louisville a most decided advantage in the way of a line to New York over Cincinnati and all other Western cities.

The completion of this road to Louisville, and the completion of the Louisville, New Albany and St. Louis Air Line Railway, completes the great Trans-Continental Railroad of America, and reunites in one unbroken chain the Atlantic at Norfolk with the Pacific at San Francisco. The enterprise is most truly a grand one, and the building of the gap between Livingston and Bristol will consummate it, for before that gap can be built the Air Line Road will be finished to St. Louis.

☞ The Utica, Clinton and Binghamton and Rome and Clinton Railroads were formally opened on the 13th inst.

Monongahela Navigation.

The receipts of the Monongahela Slack Water Navigation Company for the year ending December 31, 1871, were $175,119 70, of which $100,338,-64 was from coal, coke and slack, $62,239 18 from freights, boats, barges, etc., $11,672 82 from passengers, and $869 11 from interest. The disbursements amounted to $85,783 71, of which $29,634-02 were for expenses, $32,996 55 for repairs, $6,600 for interest, and $16,553 14 for United States taxes. The total net earnings were $89,335 99, upon which dividends of nine per cent. have been declared. The total amount of coal shipped during the year was 48,621,300 bushels, a decrease, compared with the previous year, of 8,975,100 bushels. The decrease of receipts from coal was $18,367 04; from freights, $17,880 15; from passengers, $7,394 65—total $43,641 84.

Louisville and Nashville Railroad.

The following is a condensed statement of the earnings of the Main Stem and Branches for the year ending June 30, 1871:

	Memphis Branch.	Knoxville Branch.	Main Stem.
Passengers	$115,139 75	$103,254 41	$803,118 21
Freight	160,476 46	174,960 68	1,485,536 87
Express	9,906 48	11,769 78	79,833 30
Mail	7,650 00	5,163 72	32,655 00

		2,098,371 84
Net earnings		$1,054,635 56
Add balance from previous year		748,976 97
Sundry credits during the year		41,359 76
		$1,844,972 29

From which deduct—

Improvement extraordinary, rolling stock, buildings & grounds	$561,651 46	
Interest account	295,202 89	
Discount account	58,052 82	
Dividend No. 16	260,894 00	
Dividend No. 17	354,940 00	
Sundry charges	73,333 08	
		1,603,573 75
Balance to credit June 30, 1871		$241,398 54

The following is a comparative statement of the earnings, expenses and net earnings of the Main Stem and Branches during the years—

	1869-'70.	1870-'71.
Gross earnings	$2,954,658 80	$3,153,006 90
Operating expenses	1,812,525 47	2,098,371 84
Net earnings	$1,142,133 38	$1,054,635 56

This shows an increase in gross earnings of $198,348 10; with an increase in expenses of $285,845 87—making the decrease in net earnings $87,497 77.

Included in the operating expenses is the sum of $104,584 88 expended in "improvements." Deducting these expenditures the operating expenses proper were $1,993,786 46, and the net earnings $1,159,220 48.

A comparison of the profit and loss account of the past with the preceding year shows that there has been a reduction of $507,578 43. The report says:

To this account has been charged the cost of the additional rolling stock, shop, depot grounds, and new buildings, amounting to $561,651 46. The value of the road has been increased to that extent, and this amount should properly come under the head "Cost of Road;" but as by resolution of the board of November 16, 1867, the construction account was closed, it has been charged, in accordance with this resolution, to profit and loss account, and does not therefore appear under the head of "Resources." The same is true of the sum of $593,107 09, which was expended in the previous year for the same purpose, and charged in the same way. Adding these two amounts to the "Cost of Road,"

That account would be increased to	$15,119,146 82
Add to this the cost of Memphis and Ohio Railroad	2,621,091 47
Bonds held for the purchase of M., C. and L. R. R	1,228,330 57
Other resources after deducting liabilities	53,168 70
Total cost of property to the Co	$19,021,737 56

The cost of the Memphis and Ohio, and Memphis, Clarksville and Louisville Railroad, will be about twenty thousand dollars per mile, while these roads could not be built for less than about thirty thousand dollars per mile, or about two million dollars more.

The cost of the company property, including the Memphis and Ohio, and Memphis, Clarksville and Louisville Railroad, may therefore be estimated at $21,000,000, while the liabilities in stock and bonds, the only liabilities of the company, as shown in the above account, are only $17,625,-580 47.

The bonded debt June 30, 1870, was		$8,478,000
Consolidated mortgage bonds issued during the year		450,000
		$8,928,000
Redeemed—Main Stem mortgage bonds	$131,000	
Memphis Branch	13,000	
Bardstown and Louisville Railroad bonds	1,000	
Paid to sinking fund in consolidated mortgage bonds	31,000	
		176,000
Total bonded debt June 30, 1871		$8,752,000
In this sum is included city of Louisville bonds without mortgage		849,000
Making total debt for which the road is mortgaged		$7,903,000

During the year 7 per cent. dividend on the capital stock has been paid.

The great increase in the business of the road made it necessary to add greatly to the rolling-stock, and depot and shop accommodations. The sum of $561,651 46 was spent for that purpose. In the former year the amount of $593,107 09 had been expended for similar purposes.

The reports of the general superintendent for the past five years' business show a steady increase in the volume of the business transacted over the road, but at the same time there is a steady decrease in the rate at which freight is carried. In the past year there has been an increase of 24.23 per cent. in the tonnage, and only an increase of 7.21 per cent. in the gross earnings from freight. Had the company been able to realize the same pay for the work done as in the previous year, the net earnings would have been increased nearly $300,000; the cost of transportation having remained the same.

Under these circumstances the directors have not felt justified in making further reductions in the local tariff. The tariff on through freights being regulated by competing lines, it is not under the control of the company.

A strong pressure is continually brought by shippers for the reduction in rates. The directors prefer that the stockholders will take the responsibility of making further reduction in the local tariff; and for that purpose the information is given that a reduction of 13 per cent. in the local tariff will necessitate a reduction of 1 per cent. in the dividends, and in that proportion.

The directors have always been ready and willing to lower the rates on freights whenever it could be plainly shown that the development of the country would thereby be aided, and the revenue of the company would be increased ultimately, if not at once. But many demands are made for reductions in rates, and always will be made, no matter how low the rates are, the object of which is merely to increase the profit of the shipper and decrease the dividends of the stockholders.

The directors believe that the dividends of the stockholders (7 per cent.) are not excessive, and for this reason have not been able to satisfy the clamor for reduced rates. We, however, submit this subject to the stockholders for their action.

The Memphis, Clarksville and Louisville Railroad has been operated during the past year, under the contract with the receiver of the State of Tennessee, under the same conditions as formerly; and negotiations for the purchase of the road have been continued, and have resulted in an agreement between the two companies by which the Louisville and Nashville Railroad will get full control of the road at an early day.* The business of the road is constantly increasing, and the value of the property has been much improved by application of the earnings to the repairs of the road, and the renewal of bridges and iron. For further details see the report of the general superintendent.

The company has now acquired a controlling interest in the Memphis and Ohio Railroad by purchase of stock, and by carrying out an agreement, made some years ago with that company, looking to the consolidation of the two roads. At present a separate organization of the Memphis and Ohio is kept up; but when the Memphis and Louisville Railroad has become the property of the Louisville and Nashville Railroad, the consolidation of the two roads with the Louisville and Nashville Railroad Company can be completed, in accordance with the charters of the three companies and the orignal design of the projectors of this important enterprise.

In the meanwhile the mortgage bonds of the Memphis and Ohio Railroad of $3,500,000, guaranteed by the Louisville and Nashville Railroad (the guarantee was approved at the stockholders'

*Since this report was written the purchase of the Memphis, Clarksville and Louisville Railroad property and franchises, and the interest, debt, and mortgage of this State, has been consummated. October 2, 1871.

meeting on the 2d of May last), have been issued, the proceeds of which will not only reimburse the company for the money expended in the purchase of that road, but leave some surplus to be applied to other purposes.

The gross earnings of the Memphis and Ohio Railroad have increased over the previous year 16.9 per cent., and over the year ending July, 1869, 51 per cent. (The gross earnings last year were $924,207 20, and in 1869, $610,275 55.) The net earnings during last year have been sufficient to add greatly to the value of the property in the way of permanent improvements, and at the same time to pay 8 per cent. interest on the cost of the road.

The net earnings on the Main Stem and Memphis Branch, derived from business which we would not have obtained had it not been for the connection with these two roads, are estimated by the general superintendant for the past year at $223,657 65, and for the past five years at $815,426 99.

The stockholders of the Louisville and Nashville Railroad Company have reason to be satisfied with these results, while at the same time the State of Tennessee and the stockholders of the Memphis and Ohio, and Memphis, Clarksville and Louisville Railroad have been greatly benefited. The liberal aid extended by the Louisville and Nashville Railroad company to these two roads at a time when they were without means to operate the same has resulted in making these roads valuable to the original owners, as well as to this company.

The Glasgow Branch road has been completed and in operation since the 26th of September last. The road is operated by this company under a contract with the Barren County Railroad Company. The result of the operation since its opening is given in the general superintendant's report, which shows that the road will be able to pay expenses, the interest on the money advanced by this company, and at the same time be a useful feeder to the Main Stem.

The Elizabeth and Paducah road has been completed ninety-three miles beyond Elizabethtown, and has made itself already felt in the increased earnings of the Main Stem.

The Lebanon Branch has been extended to Rockcastle River (eleven miles beyond Mount Vernon), to which point it has been operated since the 8th of September last. The work on the extension from Rockcastle south has been suspended. The directory do not think it advisable to prosecute this work any further until such time as southern connecting roads give satisfactory assurance that they will meet us at the Kentucky and Tennessee State line.

The directory have at present no authority from the stockholders to go beyond the State line, nor do they think it advisable to do so as long as it is the interest of other parties to build roads to this point for the purpose of getting the advantage of a connection with the Louisville and Nashville Railroad.

The great importance of extending this road to a connection with the East Tennessee railroad system is fully appreciated. The Company has so much money invested, which is not now as productive as it can be made by additional outlay of a comparatively small amount, to exclude the idea of a permanent suspension of the work. But the Directors think it too much of an undertaking for this Company to assume to build a road beyond the state of Kentucky, even if they had authority to do so, involving an outlay on the shortest line of from two to three million of dollars, in addition to what is required to complete the road to state line. From the nature of the country through which this road passes it can not be very valuable as a local road, but it is mainly valuable as a through line; and it is but right that those roads that wish to profit by this connection with our road should also contribute part of the expenses, and assume part of the risk, connected with this enterprise. The Louisville and Nashville Railroad should not be required to bear the whole burden while others share equally the advantages.

There are three roads which ultimately will have to connect with the Extension of the Lebanon Branch; the Knoxville and Kentucky with the southern terminus at Knoxville; the Charleston and Cumberland Gap road, crossing the East Tennessee and Virginia Railroad at Morristown; and the extension of the Atlantic Mississippi and Ohio Railroad from Bristol to Cumberland Gap. The latter road, from present indications, will be the first to meet the Louisville and Nashville Railroad at Cumberland Gap. A committee of that Company visited Louisville during last summer to ascertain the views of the Directory of this road, and the following resolutions expressive of these views were passed in reply to the inquiry made by the committee:

Resolved 1. That the extension of the Lebanon Branch of the Louisville and Nashville Railroad to Cumberland Gap, if ever reliable assurances should be received of its being there met by some road that would afford a safe and suitable outlet to the ocean, has long been a cherished purpose of the Louisville and Nashville Railroad Company, and this purpose has not been relinquished, but is still entertained as strongly and firmly as at any previous time.

Resolved 2. That this Board accept with satisfaction the assurance now given by the Atlantic, Mississippi, and Ohio Railroad Company of its readiness to meet us, without any unnecessary delay, with an extension of its road to said Gap; and this Board can point to the fact that the Louisville and Nashville Railroad Company has already made a large expenditure of money on this branch of its road, looking to this connection, which expenditure can only be made profitable by completing these lines of railway as affording the strongest guarantee that the connection now proposed will be made on its part at as early a day as its means and existing engagements will allow.

Resolved 3. That while this Board of Directors claims no authority or power to bind the Stockholders of its Company by any engagement to have this branch of its road completed at any specified time, it feels free to express the opinion that should the Atlantic, Mississippi and Ohio Railroad Company proceed to execute and complete the extension proposed on its part, its road will be met at Cumberland Gap by the Louisville and Nashville extension, and the desired connection effected not later than December, 1874.

Since the time this action was taken the Atlantic, Mississippi and Ohio Railroad Company have surveyed the line to Cumberland Gap, and are now preparing for active operation in its construction.

At a special meeting of the Stockholders, on the 2d of May last, the following preamble and resolution were passed:

Whereas, with a view of establishing a leading line of railway from Louisville, Kentucky, to Montgomery, Alabama, to be under the control of the Louisville and Nashville Railroad Company, negotiations were entered into between the President and Directors of said Company and the Nashville and Decatur Railroad Company for the lease of its railroad, other property, rights, and franchises, and with the South and North Alabama Railroad Company; and the President and Directors of this Company have laid before this meeting a proposed lease of the Nashville and Decatur Railroad, and proposed contracts with the South and North Alabama Railroad Company, and SAM TATE and associates, for the approval, ratification, or rejection of the Stockholders of the Louisville and Nashville Railroad Company; and while the said Stockholders approve of measures looking to the establishment of said line of railway, if they can be accomplished upon terms just and fair to all parties interested, yet not having such facts before them as would justify them, in their opinion, in approving or ratifying said proposed lease and contracts, they decline to approve said contracts with the South and North Alabama Railroad Company, and SAM TATE and associates. But it is hereby

Resolved, by the Stockholders of the Louisville and Nashville Railroad Company, that it be left to the discretion of the President and Directors of said Company to execute and carry out in behalf of the Stockholders the proposed lease of the Nashville and Decatur Railroad, and to their discretion to make such contracts with the South and North Alabama Railroad Company, and SAM TATE and associates, in reference to the completion and control of the South and North Alabama Railroad, as they may deem best for the interests of the Stockholders of the Company.

In accordance with this resolution, the contract, copies of which are annexed to this report, were entered into between this Company, and the Nashville and Decatur, and South and North Alabama Railroad, and SAM TATE and associates.

These contracts are now being carried out, and it is expected that not later than in September next the uncompleted part of the South and North Alabama Railroad will be finished, so that trains can run through between Louisville and Montgomery. The importance of this line of road to the Louisville and Nashville Railroad Company, and the country at large, was fully discussed at the special Stockholders' meeting, and it is not deemed necessary to call further attention to this subject.

The total length of the roads operated during the past year is as follows: Main Stem to Nashville, 185 miles; Bardstown Branch, 17.8 miles; Knoxville Branch, 110.82 miles; Richmond Branch, 33.46, miles; Memphis Branch, 46.37 miles—total length of road owned by the company, 392 45 miles. Including the Memphis, Clarksville and Louisville Railroad, (operated for the Receiver,) 82.6 miles, the Glasgow Branch, (leased,) 10.19 miles, and the Memphis and Ohio Railroad, (leased,) 130.8 miles, the total length of road operated is 615.54 miles. Including the above roads, the following is the result of last year's operations:

Gross earnings of Louisville and Nashville Railroad and Branches		$3,153,006 90
Gross earnings of Glasgow Branch (9 months)		14,240 80
Gross earnings of Memphis, Clarksville and Louisville Railroad		462,570 88
Gross earnings of Memphis and Ohio Railroad		924,207 20
Total gross earnings		$4,554,025 28
And total expenditures—		
Louisville and Nashville Railroad and Branches	$2,098,871 34	
Glasgow Branch	11,349 88	
Memphis, Clarksville and Louisville Railroad	450,173 18	
Memphis and Ohio Railroad	718,461 53	
		3,278,355 88
Total net earnings of 615.54 miles of road		$1,275,669 85

As compared with the previous year, there has been on the Main Stem and Branches an increase of 6.71 per cent. in the gross receipts, and an increase of 15.77 per cent. in the expenditures, resulting in a decrease in the net earnings of 7.66 per cent. On all the lines operated by the company the increase in gross earnings has been 9.61 per cent., and in expenditures 16.56 per cent., resulting in a decrease in the net earnings of 4.95 per cent.

The following statement contains in a condensed form the general results of the operations of the Main Line and Branches during the years ending June 30, 1870 and 1871;

	1869-70.	1870-'71.
Gross earnings	$2,964,668 80	$3,153,006 90
Operating expenses	1,812,525 47	2,098,371 84
Net earnings	$1,142,133 33	$1,054,635 56
Proportion of expenses to earnings	61.34 per ct.	66.55 per ct.
No. of miles run by trains	1,229,056	1,349,350
Earnings per mile of train	$2.37	$2.27
Expenses " "	1.47	1.56
Net earnings " "	$0.90	$0.71
Av. length of road in use.	381.63 m.	392.45 m.
Earn'gs per mile of road.	$7,742 20	$8,034 16
Expenses " "	4,749 48	5,346 85
Net earnings " "	$2,992 77	$2,687 31
Mileage of freight cars	10,625,964	12,841,742
" passenger cars	2,528,106	2,595,112
Number of tons carried	438,413	535,711
Do. carried one mile	57,885,740	71,912,950
No. of passengers carried	456,065	466,427
Do. carried one mile	27,330,015	26,053,598

The results of the operations of the Main Stem and Branches are shown separately in the annexed statement:

	Main Stem.	Bardstown Branch.	Knoxville Branch.	Memphis Branch.	Richmond Branch.
Gross earnings	$2,505,909 42	$24,008 84	$296,078 89	$293,399 49	$33,520 26
Operating expenses	1,532,341 02	21,804 75	233,665 53	265,681 82	44 878 22
Net earnings	$973,658 40	$2,204 09	$62,413 36	$27.717 67	Loss.
Proportion of exp. to earnings	61.14 per ct.	90.82 per ct.	78.92 per ct.	90.55 per ct.	133.88 pr ct.
Number of miles run by trains	983,470	11,916	142,379	167,848	44,227
Earnings per mile of train	$2 44	$2.01	$2.07	$1.75	$0 75
Expenses per mile of train	1.56	1.83	1.64	1.59	1.01
Net earnings per mile of train					Loss.
Length of road in operation	185 miles.	17.3 miles.	110.32 miles.	46.37 miles.	33.46 miles.
Earnings per mile of road	$13,545 94	$1,387 79	$2,683 82	$6,327 85	$1,001 80
Expenses per mile of road	8,282 92	1,260 39	2,118 07	5,729 60	1,341 25
Net earnings per mile of road	$5,263 02	$127 40	$565 75	$597 75	Loss.
Passengers carried one mile	21,529,385	272,473	2,660,578	3,190,556	410,644
Tons of freight carried one mile	58,671,965	215,440	4,600,809	8,069,189	355,517
Earnings per passenger per mile.	3.73 03 cts.	3.95 47 cts.	6.98 09 cts.	3.62 01 cts.	3.73 84 cts.
Earnings per ton per mile	2.53 cts.	5.398 cts.	3.802 cts.	1.988 cts.	4.82 cts.

The company have 87 locomotives, 45 passenger, 16 baggage, 3 postal, 11 express, 664 box, 199 rack, 96 gondola, 258 flat, 84 stone, 13 boarding, 1 wrecking and tool, and 12 caboose cars. Miles run by locomotives with passenger trains, 619,326; with freight trains, 1,137,949; distributing trains, 102,435—total, 1,859,710.

Number of local passengers carried north, 194,283; do., south, 187,602—total, 381,885. Number of through passengers carried north, 41,278 do., south, 43,264—total, 84,542. Total local and through, 466,427. Total mileage of through passengers, 14,651,669; do., local, 13,402,029—total, local and through, 28,053,598. Miles traveled by each passenger, 60.14; do., by each local passenger, 35.09. Revenue from through passengers per mile, 3.6372 cents; do., local, 3.8407 cents. Number of tons of freight carried, 535,711; do., carried one mile south, 43,196,303; do., north, 28,716,647—total tons carried one mile, 71,912,950.

Vice President.—THOS. J. MARTIN.

Directors.—For one year—B. F. Guthrie, Geo. H. Hutchings, P. J. Potter. For two years—H. D. Newcomb, Thos. J. Martin, W. H. Smith. For three years—R. A. Robinson, W. B. Caldwell, James Whitworth.

Secretary.—WILLIS RANNEY.

Vice Pres't and Gen'l Sup't.—ALBERT FINK.

Railways in San Paulo.

The San Paulo line stops at Jundiahy, which terminus does not of itself tap the great producing districts of the province. Thence there is a line onward to Campinas, 27 miles in length, which will be in operation early in 1872. But not even at Campinas are the finest agricultural districts reached. Another local Company is carrying a railway onward 100 miles to the Rio Claro, which will pass through the richest coffee plantations. There is laterally a line of 40 miles long to Itu, the completion of which is expected in the course of next year, also locally made. These three lines are, we repeat, already in hand, and more or less advanced. Then there are other two lines projected; one of 75 miles from the City of San Paulo to the fine cotton district of Sorocabo, the other, 120 miles in length, from the same point of departure to join the Dom Pedro Segundo railway, and so to form a line from the capital of the province to the metropolis of Rio De Janeiro; and this last will, of course, to some extent be a competing line with the San Paulo railway, and dispense with a sea voyage and transport from San-

tos to Rio de Janeiro. Thus, it will be seen, there is a certainty of three independent railway Companies in the province of San Paulo, and the prospect of five.—*Brazil and River Plate Mail.*

Bridge over the Hudson River at Albany.

The Albany *Evening Journal*, in noticing the completion of the new bridge across the Hudson River at that place, says:

The bill authorizing the construction of the bridge passed the Legislature in 1869, and the first stone of the superstructure was laid June 25, 1870. The main bridge is 1,525 feet long from Quay street to Van Rensselaer Island, and the whole length, including approaches, 2,250 feet. It is 30 feet in the clear above low water mark, and eight feet above the high water mark of 1857. There are two bridges over Van Rensselaer creek, first comprising three spans 62 feet 6 inches each one connecting with the New York and Boston Railroads, and the other for Troy local trains, the in length, and the latter 4 spans 60 feet each. The portion of the bridge across the basin, descends three feet from the pier to Quay street. The trusses in the superstructure are 26 feet apart. All the tension bars of the bridge are of double refined iron, and it is calculated that the bridge will stand a load of 6,000 pounds per lineal foot, exclusive of the weight of the structure, the stain of which will not exceed one-sixth of the breaking weight. Of the materials used the following summary is given: Piles used in pier and abutments, 110,000 lineal feet; timber, board measure, 1,100,000 feet; stone in piers and abutments, 16,000 yards; iron in superstructure, mostly wrought, 2,000 tons. The draw weighs 700,000 pounds, and is to be worked by a ten-horse power engine placed beneath the roadway. Clark, Reeves & Co., of the Phœnixville Bridge Works, Phœnixville, Pa., were the contractors for the superstructure.

Housatonic River Bridge.

The new Iron Bridge over the Housatonic River, at Stratford, Conn., on the New York and New Haven Railroad, is completed. In undergoing the final tests of its strength and efficiency, every running foot was subjected to a test of two and a half tons, and stood the ordeal in a most satisfactory manner. This bridge is one of the handsomest in the State, and is a part of the grand system of improvement inaugurated some years ago by the present management of the road. The Naugatuck railroad joins the New York and New Haven track on the eastern shore of the river, and in addition to the immense business of the latter road all the Naugatuck trains must also pass over this bridge. It was commenced in March, 1871, and has been pushed, in spite of the cold weather of the early winter, to completion in a wonderfully brief time. The bridge is 1,091 feet long, 27 feet wide, with two tracks, and the height of the iron work is 24 feet. It has five spans, three on the east side of the draw and two on the west, and the draw is 206 feet long. Five piers and two abutments of solid masonry support the iron-work of the spans, and the height of the piers, except the draw pier, is 36 feet 8 inches, they being 7 feet wide at the top and at the bottom. The draw pier is 30 feet wide at the top and 35 at the bottom, and rests upon 427 piles, sawed off by divers level with the river bottom. The bridge has been built four feet higher than the old bridge, which makes easier grading to and from Bridgeport, both on the New York and New Haven and Naugatuck roads. It is estimated that the ordinary pressure which the bridge will be required to sustain will not exceed one and a half tons to the foot. The total cost of the bridge, including the change of grade, will be about three hundred thousand dollars. The contractors were F. C. Lowthorp, of Trenton, N. J., patentee; John Beattie, of Stony Creek, stone work; S. A. Hammond, of Bridgeport, piling and timber work, and George Everett, of Allentown, Pa., superintendent of the iron work. The frame work of cast iron came from Birmingham, Conn., and the tension rods from Trenton, N. J.

Important Quarry Blasting with Nitro-Glycerine at Quebec.

On Wednesday last, Mr. MOWBRAY of the Hoosac Tunnel Nitro-Glycerine Works, with his agent Mr. H. H. PRATT, gave a number of very interesting experiments with Nitro-Glycerine at Hamel's Quarry, about four miles outside of Quebec. The object was to convince Quarrymen, Building Contractors and Engineers, of the facility with which building stone could be thrown out of a quarry in masses, as distinguished from blasting on railroad contracts, where Nitro-glycerine has been preferred, not merely for its economy, but on account of its breaking the stone into pieces suitable for embankment and ballasting. The quarry chosen consisted of a very hard rock, very resistent to the drill, and in layers of strata varying from two feet to three feet in thickness. Three holes commencing at the top with 2 1-4 inch drill, and terminating in a hole 1 3-4 inch diameter, were drilled to a depth of from 10 to 12 feet each. Into these charges of seven pounds each were inserted, and fired simultaneously by means of a peculiar exploder and a small portable electric machine, thus avoiding the use of the Acid Voltiac battery, caps, &c. A leading wire to the first drill hole, and a returned wire from the last or third charge were connected with the friction machine, and a few turns being given explosion ensued. The report did not sound much heavier than a rifle shot, but instantly trees upon the bluff of the quarry. toppled, and with the subjacent stone facing the spectators, glided down into the pit. Some half a dozen boulders were probably hurled perhaps fifty feet from the quarry, but the mass simply fell over into the pit. On measuring the face from which the stone had been detached, it was found the explosion had extended in a wide fissure 15 feet beyond, on the east side, besides the 30 feet of face actually removed. The three holes had been set back fully eight feet from the face, and being each ten feet apart, the extreme distance between the first and last hole was 20 feet. The blast had separated a line of 43 feet from the face of the rock to a depth of 15 feet, or four feet below and beyond the bottom of the drill holes, with an average thickness of about eight feet, measuring 191 cubic yards, or about 400 tons in weight. The rock was very tough, hard, and homogeneous, and resists powder-blasts, necessitating a repetition of charges to fracture the rock. Standing on the bluff of the quarry and looking down, the blocks were chiefly square or longitudinal, requiring but little labor to cut into building stone, and the problem has been solved by this experiment that Nitro Glycerine judiciously applied is as suitable for quarrying measured stone for building, as it has been found by the contractors on the Intercolonial R. R. at the Hoosac Tunnel for blasting it into fragments that may be readily removed by the shovel. The operations of handling, charging, and firing were performed by Mr. H. H. Pratt. After the quarry blast, two pieces of 5-16 boiler plate were placed parallel to each other, about six inches apart, and four ounces of Nitro-Glycerine exploded between them, the full violence of the explosion was thus appreciated by the parties present. With a deafening explosion, the fragments of the boiler plate were sent up to a height apparently of 200 feet, and gave rise to some hurried movements, as they came showering down in close proximity to the spectators. The last experiment was the application of a light charge to an oak tree, a report, a crash, and down fell the tree. On going up, the stump was found split to the root in five divisions, a terrible proof of the irresistible force of this explosive. And yet the cool and thorough handling of this explosive by Mr. Pratt and his two assistants, the promptitude of the firing, convinced every one on the ground that in proper hands there is no more danger than gunpowder. A contractor who had used powder and gun-cotton emphatically asserted that Nitro Glycerine far exceeds in its economical results anything he had ever witnessed either with powder or gun-cotton.—*Montreal Herald, Dec.* 30.

Lands Granted to Railroads.

The Secretary of the Interior has transmitted to Congress, in compliance with request contained in House resolution of March 14, 1871, a tabular statement exhibiting land concessions by Congress to States and corporations for railroad purposes. It is as follows:

States.	Estimated quantity in grant, Acres.	Estimated quantity will receive. Acres.	Quantity patented. Acres.
Illinois	2,595 053	.....	.....
Mississippi	2,062 240	1,108 680	908,680
Alabama	3,729,120	2,783,135	2,288 138
Florida	2 360,114	1 760,467	1,760,468
Louisiana	5 578,720	2,672,405	1,072,405
Arkansas	4,804,871	2 803,171	1,793,167
Missouri	2,985,160	1,949,175	1,820 645
Iowa	6,526,727	3,993,100	3,510,243
Michigan	4,931,361	3,449,791	2,851,034
Wisconsin	5,778,360	3,143 458	1,642,978
Minnesota	9,783,403	7,288,000	2,602,833
Kansas	9,370 000	4,897 000	.....
California	3,520,000	8 200.000	.....
Oregon	3,500,000	3,500,000	152,854
States, total	67,525,180	45,143,426	22,998,476
Corporations.			
Union & Central Pacific	85,000 000	24,320,000	1,686,442
Sioux City and Pacific	580,000	60 000	.....
Centr'l Branch Union Pacific	245,166	200,000	.....
Northern Pacific	47,000,000	47,000,000	.....
Atlantic and Pacific	2,330,000	2,330,000	.....
Southern Pacific in California	3.520.000	3,000 000	.....
Texas Pacific.	18,000,000	17,000,000	.....
Corporations, total	148,675,166	138,910,000	1,686 442

The grand total granted to States for railroad purposes and to railroad corporations is as follows:

	Granted. Acres.	Will probably receive. Acres.	Already Patented. Acres.
	216,200,296	179,053,436	23,684,919
Less for lands reverted and lapsed	8,740,264	6,314,005	5,689,011
Net grand tot'l	207,460,032	172,739,431	18,995,908

☞ The City Passenger Railway Company of Baltimore reports that during 1871 the aggregate distance run by the cars was 2,010,806 miles, and the passengers carried amounted to 14,189,473. The company owned 672 horses, each costing forty-two cents a day to feed. The proportion of receipts paid to the Park Fund amounted to $134,798.

☞ The tunnel of the Baltimore and Potomac Railroad, 1,550 feet long, under the southern part of Capitol Hill was completed on the 18th last. Cars will soon be running over the road between Washington and Baltimore.

RAILROAD EARNINGS—MONTHLY.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterick (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, January 20, 1872.

Stock Exchange and Money Market.

Money has been in much better supply, and the market has been working more favorably for borrowers, throughout the week, call loans closing comparatively easy at from 6@7 per cent. as the prevailing rates to the leading street firms. There has also been a freer currency noted for the best grades of mercantile paper within the range of from 7@10 per cent per annum. The city banks have been more liberal of accommodation, having added some 2½ millions to their loan and discount average, on a return, showing an increase of about 3⅛ millions in their legal tender reserve, and nearly nine millions in their deposit line. The pressure for aid, from all sources, has been less urgent, particularly on speculative account. The U. S. Sub Treasury augmented both its coin and currency balances, last week, the addition to the latter having been about 1⅛ millions, making the total currency reserve of the office $8,271,614 at the close of the week. The coin balance at the close of the week was $63,-714,283.

The city banks, in their latest return, show an increase of $3,640,500 of legal tender notes, with a reduction of $337,700 of specie, and an increase of $8,995,800 of deposits; also an increase of $2,-548,800 in their loan and discount averages, and a reduction of $52,900 in their item of circulation. The city bank exchanges, last week, averaged $114,057,538; and thus far, this week, 123¼ millions daily. The banks now hold $10,866,075 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $27,982,900, against $28,-990,404 same time last year. The city bank deposits are now $214,824,000, against $213,403,774 week ending Jan. 14, 1871. The legal tender reserve amounts to $43,699,000, against $50,575,911 same time last year. The circulation now stands at $28,439,300 against $32,049,804 same time last year. The loans are now $275,253,200, against $269,211,022 at this date last year.

The coin revenue of the Treasury department on Monday was $103,248,419, including $38,269,-500 represented by outstanding coin certificates. The currency reserve was $12,156,056.

The U. S. Sub-Treasury increased its currency balance $1,736,191 and its coin reserve $253,889 as the result of the week's business. The receipts of the office were $6,245,803 in coin, and $3,910,268 in currency; payments, $5,991,915 in coin, and $2,174,078 in currency. The office received $2,780,000 in coin or its equivalent, from customs; and disbursed $2,835,311 of coin interest.

The U. S. Sub-Treasurer retired, last week, $2,-406,446 of coin certificates, received for customs.

Government revenues have been fair in the line of customs, and light in that of excises, since our last. The excises yielded last week about 1¼ millions, and thus far since July 1, about 72 millions. The customs at the port of New York, last week were $2,608,446; and at the outports, equal to about $885,000 more, all in coin, or coin certificates.

There has been a less active movement in gold, with more steadiness and less buoyancy in the price. The speculative call has been less confident. The export drain has been rather more extensive, but the effect on the market rate was slight and transient. The customs call has been on a moderate scale. The range of the price during the week has been from 108¾@109⅛ and the closing quotation on Wednesday was 108⅞@109 against 108¾ the preceding Wednesday. The specie outflow, last week, was $572,-827. The Gold Exchange Bank clearances have averaged about 41¾ millions a day during the week. Wednesday's clearance were $23,593,000.

The "specie payment" resumption prospect before Congress has been discussed with much earnestness, and generally in an adverse temper, in the street, during the week.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from July 1, 1871 to Jan. 18, 1872, $52,407,943, against $56,474,484 same time in 1870-1871.

The customs demand for Gold last week, averaged $463 340 a day; thus far, this week, it has averaged $430,000 a day or equal to a weekly aggregate of $2,580,000. The arrivals of specie from Europe, Havana and other foreign ports

last week were $48,070, and since Jan. 1, 1872, $45,702 against $79,945 same time in 1871. The total customs revenue of the Government, in coin, at this port, from July 1, 1871, have been $82,877,360 against $76,930,758 same time in the preceding fiscal year 1870-71.

The export drain of specie was $569,413, last week, against $495,373, same week preceding year. The shipments since July 1, 1871 have been $23,239,936 against $42,339,014 same time in 1870-71.

Business in foreign exchange has been rather light, and rates have been without remarkable alteration. Bankers' sixty day bills on London closed on Wednesday at 109@109¼; sight bills on London, 109⅝@109⅞.

The produce exports from this port, week ending with Jan. 16, were to the currency value of $4,006,015.

Government securities has been in more demand and on the advance, with a limited offering of all issues reported.

Under the Treasury programme for January the U. S. Sub-Treasurer at this point proposed to sell, during the month, two millions of Gold, as follows: Thursday, January 11, $1,000,000; Thursday, January, 25, $1,000,000; and to buy in two million of U. S. bonds as follows: Thursday January 4, $1,000,000; Thursday January 18, $1,000,000.

U. S. sixes of 1881 closed here on Wednesday of the current week at 115⅜@115½; U. S. Five-Twenties of 1862, (other than the bonds called in) 110⅛@110¼; U. S. Five-Twenties of 1864 at 110⅛@110¼; U. S. Five-Twenties of 1865, 111⅛@111⅜; U. S. Five-Twenties of 1865 consolidated, 110⅛@110⅜; U. S. Five Twenties of 1867, 111⅞@112; U. S. Five-Twenties of 1868, 112@112⅛; U. S. Ten-forties at 110⅛@110¼; U. S. Fives of 1881 (Funding Loan) 109⅞@110. Six per cent. currency bonds, 115½@115⅝.

The latest quotations at the London Stock Exchange compare as follows with former returns:

" 10-40s	92⅛	92	92¼
Erie.	27¾	30½	

State bonds have been in rather better demand, closing rather more firmly.

There has been an unusually good investment demand for the better class of Railway bonds, and all the older issues of the more substantial loans have been strong in price. Central Pacific Sixes, have been actively sought after, closing at 102¾@103 ex the January coupon of 3 per cent. in gold. Chesapeake and Ohio Sixes have been in good request for investment purposes on the basis of 94 per cent. and accrued interest.

Of the Chesapeake and Ohio Trunk line of railway, from Richmond on the James, to Huntington on the Ohio River, a distance of 427 miles, 322 miles have already been completed, and are in actual operation, 227 miles of which, or more than half the main line, extend westward from Richmond through some of the most fertile Corn, Wheat and Tobacco producing sections of Virginia, to the famous White Sulphur Springs, a favorite Summer resort, which attracts a liberal patronage from pleasure and health seekers, and brings to the road an important contribution of passenger traffic. The other ninety-five miles of the main line, now in working order, and yielding an income to the Company, extend eastward from the Ohio River through the rich and well-settled agricultural and pasture lands of West Virginia to the Falls of the Kanawha, and the inestimably valuable coal, iron and other mineral resources of the Virginias, the early development of which, through the agency of the road and its connections, will add vastly to the revenues of the Company, and to the enhancement of its credit. On the connecting link of 105 miles between the White Sulphur Springs and the Falls of the Kanawha, work is being vigorously prosecuted, giving assurance of the completion of this great enterprise by the running of trains through from the present eastern to the extreme western end of the whole line before the close of the coming Summer.

Railway and miscellaneous share property has been quite active, and quoted generally higher and buoyant as to price.

General business has been more active, with more liberal dealings reported in Breadstuffs, Provisions, Naval Stores, and Cotton, though at variable prices. Pig iron has been unusually brisk and has advanced sharply. Domestic Cotton and Woolen fabrics have been more freely purchased at higher figures. Middling upland cotton closed on Wednesday at 21⅝@21¾ cts. per lb. The receipts at all the ports, since Sept. 1, have been 1,652,674 bales, against 1,969,306 bales same time in the preceding year; exports 808,809 bales, against 1,097,637 bales in the previous year; stock at the ports at latest dates, 506,464, bales, against 612,099 bales same date 1870.

At the Live Stock Markets, Beeves have been in fair demand at from 9½@14 cts.; Veals at 4½@11 cts.; Sheep at 5¼@8½ cts. Lambs at 6½@9½ cts.; Swine, at 4⅞@5¼ cts. per lb., all live weight. The week's receipts were 6,741 Beeves, 917 Veal Calves, 25,547 Sheep and Lambs; and 16,223 Swine.

Foreign goods have been moderately dealt in within the previous range as to price. The week's imports of foreign goods reached $6,249,201 including $1,617,996 of dry goods.

Ocean freights have been moderately active. Steam room scarce and higher. Sail room in fair supply at about former rates.

Northern Pacific Railroad.

The Northern Pacific Railroad First Mortgage Bonds, we learn, are coming into favor, not only with large capitalists, but with those of more moderate means, who are desirous of investing their savings from earnings or from profits, to the best advantage, both as regards the safety of the security, and the amount of income to be derived from the investment. Holders of all series of 5-20 bonds are especially interested, as the Treasury Department having just called in an additional twenty million dollars of 1862 bonds, renders it uncertain which of the four series of bonds may next be called, and makes it to the interest of holders to change the form of their investment, and convert their bonds into a first-class railroad security. The Northern Pacific Company offers the advantage of interest at the rate of 7-30 per cent. per annum in gold, and the security of a first and only mortgage on the great railroad itself, and also 500 acres of the finest lands in the country to secure every $1000 invested.

Rensselaer and Saratoga Railroad.

The earnings of the Rensselaer and Saratoga Railroad for the year ending September 30, 1871, were:

From passengers	$632,973 44
" freight	828,705 11
" other sources	115,015 68
Total	$1,576,694,23

And the payments were:

Transportation expenses	$1,035,572 36
Interest	107,839 53
Dividends, including U. S. Rev. tax	187,125,00
Other payments	83,951 20
Total	$1,414,488 09

Capital stock, $6,000,000; funded debt, $1,925,000; total cost of road and equipment, $6,990,985,06; length of road operated, 181 miles; number of engines, 36; passenger coaches, first class, 46; second class cars, 20; baggage 17 and freight 850.

Business for 1871; Mileage of passengers, 16,868,835; movement of freight in tons, 22,146,373 during the year.

Albany and Susquehanna Railroad.

The earnings of this road for the year ending September 30, 1871, were:

From passengers	$341,099 23
" freight	637,042 35
" other sources	91,854 82
Total	$1,069,996 40

And the payments were:

Transportation expenses	$802,509 27
Interest	305,000 00
Dividends	39,250 00
Rent of Cherry Valley R. R.	12,671 92
Total	$1,209,431 19

This road is leased to the Delaware and Hudson Canal Company. The amount of capital stock is $3,280,000; Funded debt, $4,399,000; Floating debt, $83,440. Total cost of road and equipment, $8,530,663 45.

Length of road, 142 miles; length of branches, 22 miles: number of engines, 31; number of first-class passenger cars, 24; baggage cars, 12; freight cars, 316; coal cars, 700; gravel cars, 142.

It will be observed that the receipts were $139,434 79 less than the payments. This sum was, however, more than made up to the Delaware and Hudson Canal Company, in the superior facilities afforded them in transporting the thousands of tons of coal passing to new markets over the road. So that even this road made money for its lessees.

☞ A very full meeting of the stockholders of the Framingham and Lowell Railroad was held at South Framingham on the 13th inst., at which it was voted to lease the road to the Boston, Clinton and Fitchburg Company for the term of twenty years, the stockholders to receive thirty per cent. of the gross receipts. If this action is ratified by the Legislature, the lease will be assumed in April.

Consolidated U. S. 5s, 4½s, and 4s, or Chesapeake and Ohio Sixes.

Holders of Five-Twenties and other maturing or high-priced securities can exchange them or reinvest their capital with great safety and advantages of profit and income by substituting in their place the Chesapeake and Ohio Gold Bonds. Only one-eighth part of this loan remains unsold, which is being rapidly taken, with every prospect that the future demand will increase their market price far above the limit fixed by the Company (94 and interest) for the remainder.

Among the Directors of the Company are Messrs. C. P. Huntington, William H. Aspinwall, A. A. Low, David Stewart, Jonas G. Clark, and others, of New York City, whose personal attention to its affairs insures honorable and successful management.

We offer them with the same confidence with which we have recommended to our friends and customers the bonds of the Government and the Central Pacific Railroad Company, and have no doubt that they will command a like confidence and price with the latter in home and foreign markets.

Principal payable in 1899, interest May and November. They are issued as registered or coupon bonds in denominations of

$100, costing with accrued interest, to-day..... $95 18
$500, costing with accrued interest, to-day.....$475 92
$1,000, costing with accrued interest, to-day.....$951 84

We buy and sell, as usual, Government and Central Pacific Bonds, and receive them in exchange for Chesapeake and Ohio Bonds. Accounts of Banks and others received, on which we allow interest at the rate of four per cent. Orders for Investment Stocks and Bonds executed at the Stock Exchange.

FISK & HATCH,
Bankers, &c., No. 5 Nassau-st.
Harvey Fisk,
A. S. Hatch.

New York, Jan. 12, 1872.

☞ The engineers engaged in surveying the route of the Baltimore and Drum Point Railroad have reached Mount Harmony. The line of survey will deflect to the eastward of Colonel Hughes's route at a point near All Saints' Church, and run through the lands of Dr. J. J. Allnutt, John A. Cox, Esq., to Sandy Bottom; and thence in nearly a direct line to Port Republic, at which place it will join the route of the first survey. Should the road be located on this line, it will pass a short distance east of Prince Frederick.

☞ The Ohio Falls Car Works, at Jeffersonville, Ind., are among the most extensive in the West. They were established in 1864, with a cash capital of $300,000; have since increased to $600,000. Th company has 26 acres, five under cover. The works have the capacity for building and furnishing 10 freight cars per day, and 100 passenger cars per year. The railroad track within their inclosure will reach several miles. They employ daily over 700 men, paying out every month $30,000.

☞ The total tonnage of the Maryland Coal mines in 1871 was 2,345,153 tons, against 1,717,075 tons in 1870, an increase of 628,078 tons. The total shipment of gas coal from the Maryland mines last year was 1,672 tons.

Journal of Railroad Law.

RAILROAD COMPANIES—RULES IN DETAIL AS TO DELIVERY OF GOODS TO CONSIGNEES.

The facts in the late case of Fenner *vs.* The Buffalo and State Line Railroad Company, (44 N. Y., 505,) are fully and clearly stated in the following opinion by—

EARL, C.—It is well settled in this State, that an intermediate carrier, one who receives goods to be transported over his route, and thence by other carriers to their place of destination, generally remains liable as a common carrier until he has delivered the goods to the next carrier. Miller *vs.* Steam Navigation Co., 10 N. Y., 431). It was deemed wise policy that the principles of the Common Law should be so expounded and applied, that the liability of one carrier should continue until that of the next carrier commenced. Chief Judge Johnson, in Gould *vs.* Chapin, says: "No owner can be supposed to have an agent to superintendent each transhipment of his goods, in the course of a long line of transportation; and if the responsibility of each carrier is not continued until delivery in fact to the next carrier or at least until the first carrier, by some act clearly indicating his purpose, terminates his relation as carrier, we shall greatly diminish the security and convenience of those whose property is necessarily abandoned to others, with no safe guards save those which the rules of law afford." In Mc Donald *vs.* The Western Railroad Corporation, Judge Smith, speaking of the carriage of goods over successive lines, says: "The owner loses sight of his goods when he delivers them to the first carrier, and has no means of learning their whereabouts till he or the consignee is informed of their arrival at the place of destination. At each successive point of transfer from one carrier to another, they are liable to be placed in warehouses there perhaps to be delayed by the accumulation of freight or other causes, and exposed to loss by fire or theft, without fault on the part of the carrier or his agents. Super-added to these risks, are the dangers of loss by collusion, quite as imminent while the goods are thus stored at some point unknown to the owner as while they are in actual transit. As a general rule, the storing under such circumstances should be held to be a mere accessory to the transportation, and the goods should be under the protection of the rule which makes the carrier liable as an insurer, from the time the owner transfers their possession to the first carrier till they are delivered to him at the end of the route." I have extracted this much from the opinions of these learned judges to bring into view the grounds upon which the decisions were based and to show that they apply only to intermediate carriers, and not to carriers who transport the goods to their final destination. That the principles laid down in these decisions should be thus limited, were held in the Court of Appeals, in the case of Northrop *vs.* Syracuse, B. and N. Y. R. R. Co., decided in 1867. In that case the defendant agreed to transport for the plaintiff, a certain quantity of wheat from Tully, in the County of Onondaga, to Chenango Forks, and did so transport the same. The wheat was in bags and was marked directed to the plaintiffs, at Chenango Forks, although they resided fifteen miles from there at Chester village, where they intended to carry the wheat. No one being present for the plaintiffs to receive the wheat, on its arrival at Chenango Forks, it was deposited there in the freight house of the defendant, at four o'clock in the afternoon, August 8, 1859. The plaintiffs on the afternoon of the next day received notice that the wheat had been sent from Tully to Chenango Forks, and the following night the wheat was consumed by fire; and on the 10th of August, the plaintiffs sent for, and demanded the wheat. It was held that the defendant was not liable as a common carrier for the wheat, and that the plaintiffs could not recover. The rule was laid down in that case that when a railroad carrier safely transports goods to their place of destination, and, finding no one there to receive them, or to whom notice can be given of their arrival, places them in its freight house, and keeps them there uninjured for a reasonable time, ready for delivery, it ceases to be liable as a common carrier; and that it is not necessary for the carrier to give notice of the arrival of the goods to a consignee, who, as in that case, did not reside at, or in the immediate vicinity of, the place to which the goods were consigned.

The courts below defeated the defendant in this case, upon the erroneous assumption that it was an intermediate carrier within the meaning of the cases first above cited, and hence that this case was controlled by the principles laid down in those cases. The contract of an intermediate carrier is to carry the goods to the end of his route, and there delivered them to the next carrier for further transportation. The contract of the final carrier is to transport the goods to their place of destination, and there deliver them to the consignee or owner; and such was the contract in this case. Here the goods were consigned to F. P. Fenner, Dunkirk, and defendant undertook to carry them to Dunkirk, and there deliver them to the consignee, and had no duty whatever as to their further transportation. It was the duty of the plaintiff, or her consignee, to take the goods at Dunkirk, and see to, or arrange for their further transportation. The defendant, in this case, was no more an intermediate carrier, than the defendant in the case of the Northrup *vs.* Syracuse, B. and N. Y. R. R. Co. The rule to be applied to the case, then, is the one that is applicable to carriers who carry goods to their final destination. This rule is not very definitely determined in this State. In Massachusetts, and some of the other States it is settled that the moment a railroad carrier carries goods to their final destination, according to its contract, and deposits them in its freight-house, ready for delivery, its liability as carrier ceases, and it remains liable simply as a warehouseman, but this rule has not been adopted in this State, and should not be. It is not always, or generally practicable for the consignee to be present, on the arrival of the goods, to receive them; and it is just as important that the carrier should continue to be liable, as an insurer of the goods, for a reasonable time after their arrival, until the consignee can have an opportunity to take charge of them, as that it should thus be liable during the transit of the goods to their place of destination.

At an early day, when all goods were carried on land in wagons, it was generally the duty of the carrier to deliver the goods to the consignee personally, or at his place of residence or business. This was so because the carrier could go anywhere with his wagons and make the delivery. But carriers upon water, as they were confined by their means of transportation to the water, were bound only to deliver their goods upon the wharf or pier, and if the consignee was present, it was his duty at once to take charge of the goods. If he was not present, but lived at the place of destination it was the duty of the carrier to give him notice of the arrival of the goods. If he was absent, dead, or could not be found, the carrier discharged his duty by depositing the goods in a warehouse, subject to the order of the consignee. It seems to me, that substantially the same rules, and for the same reasons, should be applied to a railroad carrier; it is obliged to stop at the depot as the water carrier is at the wharf, and unless the consignee is present on the arrival of the goods to take them from the cars, it must, as is the well known and uniform custom, place them in its freight house. From the drift of this decision in this State, I think we may fairly infer the following rules as to the delivery of goods at their place of destination by railroad carrier: If the consignee, is present upon the arrival of the goods he must take them without unreasonable delay. If he is not present, but lives at or in the immediate vicinity of the place of delivery, the carrier must notify him of the arrival of the goods, and then he has a reasonable time to take and remove them. If he is absent, unknown or cannot be found, then the carrier can place the goods in its freight house, and, after keeping them a reasonable time, if the consignee does not call for them its liability as a common carrier ceases. If, after the arrival of the goods, the consignee has a reasonable opportunity to remove them, and does not, he cannot hold the carrieras an insurer. The carrier's liability thus applied and limited I believe will be found consonant with public policy and sufficiently convenient and practicable. (Roth *vs.* Buffalo and State Line R. R. Co. 34 N. Y. 548).

Within these rules of law I think the defendant in this case was not liable for the loss of the goods in question. The teamster, Austen, was plaintiff's agent. He had notice of the arrival of the goods and paid the freight and gave the defendant a receipt for them. Just at that time the railroad employee was engaged in delivering other freight, but there was no refusal to deliver these goods, and, so far as appears, no unwillingness to deliver them; and I think we are bound to infer, that if Austen had demanded the goods, they would have been delivered to him. It was getting late, and as Austen intended to return again the next day, for his convenience the goods were permitted to remain. I say for his convenience. It matter not that it was also for the convenience of the railroad employee, or fortheir mutual convenience. It is sufficient that Austen could have had the goods and that they were left under an arrangement in which he participated, and to which he assented, as much for his convenience as for the convenience of the other party. Suppose the arrangement had been to leave the goods there a week, or a month for their mutual convenience would the railroad company have remained liable as a common carrier? Here, then, there is a case, where the consignee's agent had notice of the arrival of the goods and had an opportunity to remove them and he left them in the defen-

dant's freight-house because it was more convenient for him to call for them the next morning. Under such a state of facts when the goods were thus left in the freight-house for the mutual accommodation of both parties, should the law impose upon the one party the responsibility of an insurer? I think not, and that neither justice nor public policy require that, upon the facts existing in this case the defendant should be held liable as a common carrier.

I am therefore in favor of reversing the judgments and granting a new trial, costs to abide the event.

Ordered accordingly.

Philadelphia and Reading Railroad.

At the annual meeting of the stockholders of this company, held in Philadelphia on the 8th inst., the following report was presented:

To the Stockholders of the Philadelphia and Reading Railroad Company:

The managers submit the following report of the receipts and expenditures for the year ending November 30, 1871, together with the Treasurer's general balance sheet, exhibiting the financial condition of the company at that date.

[Here follow the usual transportation and income accounts, which we omit, as they are given below in condensed form.]

The following tabular statement in detail, for each branch of traffic, shows the comparative results of the year's business:

1870.

Travel, 446,328 passengers	$1,205,539
Merchandise, 1,754,943 tons	1,690,444
Coal, 3,750,990 tons	6,498,871
Mail	34,242
Miscellaneous	142,271
Gross receipts	$9,571,367
Gross expenses	6,508,786
Net profits	$3,062,581

1871.

Travel, 719,845 passengers	$1,641,395
Merchandise, 2,305,234 6-20 tons	2,306,643
Coal, 4,584,450 4-20 tons	8,287,293
Mail	86,678
Miscellaneous	290,834
Gross receipts	$12,562,843
Gross expenses	7,555,903
Net profits	$5,006,940

Gross expenses, including renewal fund, rents of lateral roads, taxes, &c., in the year 1870, were 68 per cent. of gross receipts. Year 1871, were 60 1-10 per cent. of gross receipts.

The receipts and expenses, per passenger and per ton, including renewal fund, rents of laterals, taxes, interest, &c., based upon coal tonnage of main line only, have been as follows:

1870.

Per passenger	cost $1 84.8	received	$2 70.1
Mdse., per ton	cost 68.1	received	96.8
Coal, per ton	cost 1 35.2	received	1 73.3

1871.

Per passenger	cost $1 68.5	received	$2 28.0
Mdse., per ton	cost 68.9	received	1 00.0
Coal, per ton	cost 1 21.4	received	1 80.8

Including renewal fund, rents of laterals, taxes, interest, &c., based upon entire coal tonnage of the company, on main line and on the branches or laterals:

1870.

Per passenger	cost $1 84.8	received	$2 70.1
Mdse., per ton	cost 68.1	received	96.8
Coal, per ton	cost 1 09.5	received	1 40.8

1871.

Per passenger	cost $1 68.5	received	$2 28.0
Mdse., per ton	cost 68.9	received	1 00.0
Coal, per ton	cost 92.7	received	1 38.1

The result of the year's business, as condensed from transportation and income account, may be stated thus:

Receipts over cost of working the road		$5,006,940 47
Add:		
Amount heretofore deducted from income for account of sinking fund of loan matured and paid off July 1, 1871		$56,980 00
		$5,063,920 47
From which deduct:		
Int. on bonded debt	$733,162 00	
Int. on bonds & mort.	79,112 05	
S. F. loans, 1872, '74, '77	25,000 00	
		837,274 05
		$4,226,646 42
Cost of sundry new bridges	$112,772 22	
Cost of sundry new depots and workshops	97,871 87	
Cost of extension of wharves Nos. 7 and 8, Richmond	17,729 51	
		228,373 60
Dividend Fund of 1871		$3,998,272 82
Amount to credit of reserved fund, 1870		201,914 57
Total reserved fund 1871		$4,200,187 39
Out of which has been paid, in July, 1871, five per ct. dividend on $31,554,075 28	$1,577,703 76	
United States & State taxes	118,063 53	
		1,695,767 29
		$2,504,420 10
There has been declared a dividend payable in cash on the 15th of January, 1872, of five per cent. on the preferred and common stock $31,567,075 28	$1,578,353 70	
United States & State taxes on dividend and on excess of net profits over divid'ds declared	136,510 44	
		1,714,864 20
Balance of reserved fund		$789,555 90

From the above statements it will be seen that the year just closed has been a very successful one, the tonnage, gross receipts, and net profits being greater than those of any previous year. During the year the labor question again assumed a troublesome aspect. The difficulties between the Workingmen's Benevolent Association and the coal operators culminated in a general strike throughout the Anthracite coal regions of Pennsylvania, and from the 10th of January to the 16th May but little coal was carried to market. After four months of idleness the workingmen accepted the proposition of their employers to submit all questions at issue to the decision of an umpire. The Hon. William Elwell, President Judge of the Twenty-sixth Judicial District of Pennsylvania, who was suggested by the workingmen as an umpire, and accepted by the coal operators, decided upon a basis of wages for the year 1871, under which work was resumed in the Schuylkill, Mahanoy and Shamokin regions, upon the 16th day of May last. The entire anthracite coal tonnage of the company during the seventeen weeks of the strike was only 563,164 06 tons, and for the remaining thirty-five weeks of the year it amounted to 4,898,316 18 tons.

The workingmen suffered more than the company from results of this disastrous strike, and those of the regions above mentioned must have lost at least two millions of dollars, which can never be regained. It is a gratifying fact, however, that the present officers of the Workingmen's Association are disposed to profit by the experience of their predecessors, and to agree with their employers upon a fair basis of wages for the ensuing season, under which it is believed the trade will move on continuously throughout the year.

The repeated and serious interruptions of the business of the company, caused by strikes in the coal region during the last few years, and the many fluctuations in the coal trade, produced by alternate periods of expansion and depression resulting therefrom, have directed the attention of the Managers of the company to the necessity of exercising some control over the production of coal, so as to prevent a recurrence of the difficulties heretofore experienced, and it was believed that the best way of accomplishing this result without injuriously affecting individual interests was for the company to become the owners of coal lands situate upon the line of its several branches.

In order to provide the means to make these purchases, a loan of twenty-five millions of dollars was authorized, and secured by a mortgage dated the first day of June last executed to the Fidelity Trust and Safe Deposit Company of Philadelphia, a copy of which mortgage is annexed to this report. Of the loan thus authorized $6,000,000 of bonds will be retained to retire the previous mortgage bonds of the company, amounting in the aggregate to $5,801,200, and of the balance $11,962,000 have already been issued for the purchase of coal lands. Up to this time about seventy thousand acres of the best anthracite coal lands in Pennsylvania have been acquired and will be held by an auxiliary company, known as the Philadelphia and Reading Coal and Iron Company, of which the Philadelphia and Reading Railroad Company is the only stockholder.

The result of this action has been to secure and attach to the company's railroad a body of coal land capable of supplying all the coal tonnage that can possibly be transported over the road for centuries. This result has been obtained without imposing any serious financial burden upon the company, for the lands purchased are already so far developed that it is estimated they will produce in rents during the year 1872, $1,200,000, and it is believed that in less than three years the net annual revenue arising from the lands will be greater than the interest payable upon the loan issued to secure them.

The entire coal tonnage of the year has been 6,002,573.03 tons. During one week in the month of June 187,767.17 tons of coal were transported, and the average weekly coal tonnage for the four weeks ending July 1 was 179,360.07 tons.

The increase of the passenger and merchandise business has kept pace with the increase of the coal traffic, and the aggregate railroad receipts of the company from other sources than coal have been $4,275,550, against $3,072,496 for the previous year, showing an increase of $1,203,054; of which amount, however, $708,408 62 is due to the business upon the Philadelphia, Germantown and Norristown Railroad, which was not worked by the company in 1870.

During the year the extensions of the Lorberry Creek Branch and the Pickering Valley Railroad have been completed. The Perkiomen Railroad has been extended to Green Lane, and numerous branches and laterals to new collieries have been constructed in the coal region. The number of miles of railroads now controlled and worked by the company, when reduced to single track, is 1,266.3. For further details of the working of these lines, the stockholders are referred to the accompanying reports of the general superintendent and chief engineer.

The production of rails at the company's rolling-mill during the year amounted to 19,113 tons at a cost of $64 69 per ton, including in the cost the old rails rerolled at an estimated value of $45 03 per ton.

The following table shows the product of the mill for each year since its erection, with the number of tons of each year's production since removed from the track:

Years.	1868. Tons.	1869. Tons.	1870. Tons.	1871. Tons.	Total. Tons.
Product.....	8,971	17,037	17,557	19,113	62,678
Worn out in '68.	5				5
" '69.	175	2¼			177¼
" '70.	904	164¼	1¼		1,070
" '71.	1,418	614	240	3¼	2,275¼
Total worn out.	2,502	780¾	241¼	3¼	3,527¾
Per cent.....	.278	.046	.014	.00018	.056

From this statement it will be seen that of the 62,678 tons of rails rolled by the company and laid in the track during the last four years, but 5 6-10 per cent. have yet been worn out. Of the production of 1868, 27 8-10 per cent. have been removed up to this time, showing that 72 2-10 per cent. of the first year's manufacture are still in use, although a tonnage of over 20,000,000 has been moved over them at speeds varying from ten to forty miles an hour.

The gross receipts of the six steam colliers during the year were	$264,855 16
And the total expenses, including $13,912 15 carried to credit of insurance fund, was.....	230,135 53
Leaving a net profit of.....	$34,719 63

The business of the Schuylkill Canal, including the transportation line, shows a loss for the year of $15,446 25, after charging to expenses, $41,881 90, for sinking fund of the Schuylkill Navigation Company Improvement bonds. The result of the year's business upon the canal has been much more satisfactory than was anticipated, and henceforth it is believed that the lease of the works of the Schuylkill Navigation will be a source of revenue to the company. The boat stock has been much improved and enlarged, and is believed to be in better condition now than it has been for several years. The coal tonnage of the canal for the season was 1,010,170.17 tons, and it will be fully equipped for a business of 1,400,000 tons next year.

The business of the Philadelphia, Germantown and Norristown Railroad, during the year, has been very satisfactory, the net earnings of the line having been more than enough to pay the rent and all expenses, so that during the first year of the term the lease has been a source of profit to the company.

Upon the 25th of March last the Mahanoy and Shamokin Railroad Company was merged into the Philadelphia and Reading Railroad Company, and upon the 8th of May last the Northern Liberties and Penn Township Railroad Company and the Lebanon and Tremont Railroad Company, the latter previously formed by the merger of the Pine Grove and Lebanon, Lorberry Creek and Good Spring Railroad Companies, were also consolidated with the Philadelphia and Reading Railroad Company, and the investments of the company, which in last year's balance sheet appeared under the several heads of Willow Street Railroad, Mahanoy and Shamokin Railroad stock, Lorberry Creek Railroad stock, Good Spring Railroad stock, Union Canal Railroad, Good Spring Railroad extension, Lebanon and Pine Grove Branch, Lorberry Creek Railroad bonds, Pine Grove and Lebanon Railroad stock, Lorberry Creek Railroad extension, Shamokin Valley and Pottsville Railroad purchase, and Greenwood Coal Company's Railroad are now added to, and this year appear under the head of "Railroad" in the general balance sheet herewith submitted. Since the close of the year's business the managers have authorized the lease of the Susquehanna Canal, extending from Columbia to the tidewater of the Chesapeake Bay, and forming, with the Reading and Columbia Railroad, an outlet for the western part of the Schuylkill Coal Field, and upon the first of the present month a formal lease and contract was entered into by which the possession of the canal passed to this company, at an annual rent equal to the interest upon the debt of the canal company, and one-half of the net profits of operating the canal after deducting rents and the cost of all improvements, provided that after the year 1880 the rent to be paid in addition to the amount of interest shall not be less than a sum equal to three per cent. upon the present capital of the canal company. The possession of these works seemed to be necessary to the proper development of the western coal fields, and it is believed that with the increased coal tonnage of the Reading and Columbia Railroad, and the great addition to the traffic which must result from the enlargement of the Pennsylvania canals, the business of the canal will soon become large enough to reimburse the company for the annual outlay.

This report must be closed in the same manner as that of last year, by alluding to the death of one of the officers of the company. Mr. Charles E. Byers, the late chief engineer, died upon the 10th of July last after a short illness. Mr. Byers had been in the service of the company for many years and had filled the position of chief engineer since November, 1866. His professional ability, personal integrity and unswerving fidelity to the company were always recognized and appreciated by all who knew him. The position of chief engineer made vacant by his death has been filled by the appointment of Mr. William Lorenz, late principal assistant engineer, and for many years resident engineer at Lebanon.

By order of the Board of Managers,
FRANKLIN B. GOWEN, President.

After the reading of the report the following resolutions was unanimously adopted:

Resolved, That the report of the Board of Managers, this day presented and read, be and the same is hereby approved, accepted and adopted, and that the action of the Board in relation to the several matters therein mentioned, and the lease and contract with the Susquehanna Canal Company, are ratified and approved.

2. *Resolved*, That the execution and delivery by this company of the mortgage to the Fidelity Insurance, Trust and Safe Deposit Company, dated the first day of June, 1871, for twenty-five millions of dollars, to secure the payment of the bonds therein mentioned, is hereby ratified and approved.

3. *Resolved*, That the Board of Managers be and they are hereby authorized, at their discretion, to carry into effect any of the measures proposed in their report, and if in their opinion needful, to enter into any contracts or agreements for that purpose.

4. *Resolved*, that the powers and authorities conferred upon them, and granted to, the Board of Managers by the resolutions passed at prior annual meetings be, and the same are hereby continued.

5. *Resolved*, That a vote of thanks be and the same be presented to the President and Board of Managers for the able manner in which the business of the road has been conducted during the past year.

At the annual meeting of the stockholders of the Philadelphia and Reading Railroad Company held Jan. 8, 1872, the following gentlemen were unanimously elected officers for the ensuing year;

President.—FRANKLIN B. GOWEN.
Managers.—H. Pratt McKean, A. E. Borie, R. B. Cabeen, J. B. Lippincott, John Ashhurst, Charles E. Smith.
Treasurer.—SAMUEL BRADFORD.
Secretary.—J. W. JONES.

☞ The receipts of the Lehigh Valley Railroad for the year ending November 30, 1871, including interest on investments, income from coal lands, etc., were $5,902,382 23; and the operating expenses, $3,462,029 78—leaving net income, $2,440,352 45. The total coal tonnage for the year was 2,889,074, against 2,622,433 in 1870, and 2,331,407 in 1869. From July 31, to November 30, 1871, 1,715,220 tons were carried—showing a carrying capacity of over five millions of tons if the trade could be evenly distributed throughout the year.

Western Railroad Sinking Fund.

The Treasurer of Massachusetts has submitted the final annual report of the Commissioners of the Western Railroad Sinking Fund for the year ending Dec. 31, 1871.

The amount of the fund January 1, 1871, was	$707,445 13
Amount of income received in 1871..	34,264 31
Amount received of Boston and Albany Railroad Company	49,498 85
Total.....	$791,208 29

—which has been disbursed in the redemption of Massachusetts bonds issued in aid of the Western Railroad Corporation due April 1, 1871, as follows:

To Baring Brothers & Co., London, for £113,400.....	$547,041 60
For bonds paid in Boston, £11,400..	55,022 40
For bonds held by the fund, surrendered, £32,600.....	156,480 00
For premiums paid for Exchange....	32,664 29
Total.....	$791,208 29

It will be seen that these transac ions of the Commissioners are final. The fund is disbursed, the account closed; and the last dollar of liability of the Commonwealth on its bonds issued thirty years ago in aid of the Western Railroad Corporation extinguished. No losses have occurred on any of the securities in which the fund was invested for the last twenty years, and but a small amount before that time; nor has the fund ever been subjected to any expense whatever for its management. By reason of the disarrangement of financial matters consequent upon the late war, the result is less satisfactory than it would otherwise have been, more than $620,000 having been paid out of the earnings of the fund in premiums over and above the coin value of exchange purchased and remitted to pay the bonds. But notwithstanding this heavy and unexpected item of expense, the object for which the fund was created has been substantially and fully accomplished.

☞ The earnings of the Chicago and Northwestern Railway for the twelve months ending December 31, 1871 were $10,997,868, against 12,203,408 for the corresponding twelve months of the previous year—a decrease of $1,205,540. For the first six months of the company's fiscal year (June 1, to November 30, 1871,) the earnings were..... $6,239,211
Operating expenses, taxes, interest on bonds, sinking funds and rent of leased roads..... 4,318,673
Net income six months..... $1,920,538
Balance of income account, May 31, 1871. 333,559
Total income December 1, 1871... $2,254,097

☞ The Bristol (Tenn.) *Courier* says that during the present week two locating corps will start out upon the line of the Virginia and Kentucky Road. One will begin locating at and from this point. The other will proceed to Cumberland Gap and locate the tunnel through the same. This tunnel will be over four thousand feet in length, and will be let to contract at once and work commenced on it at four different points. As soon as this corps is done locating the tunnel it will return to Clinch river, thirty-five miles from Bristol, and locate this way till it meets the corps starting out from Bristol. The line from Bristol to

Clinch river will be let to contract early in the spring.

☞ The Smyrna (Del.) *Times* says: "Mr. Ambrose Pierson, chief engineer of the Smyrna and Delaware Bay railroad, will commence the survey of a route from Clayton to Massey's this week or next. The object is to connect the 'Bombay Hook road' with the Kent County road, which is expected to terminate at or near Deep Landing, on the Chesapeake, opposite Baltimore. Such a route would form the most direct line across the Peninsula, between the two bays, and would be shorter than the proposed road between Cambridge and Lewes."

☞ The engineers engaged by the St. Croix and Penobscot Railroad Company to make a survey for the proposed extension of their line to Grand Lake have completed their work, and are now engaged in making estimates. They have obtained a better line than expected, and have met but a few natural obstacles. The deepest cut necessary is but 15 feet, while the only grade that is at all heavy is but 90 feet in a distance of three miles. It is their opinion that the road can be constructed at a very reasonable cost.

☞ The supervisors of Brooke county, West Virginia, on the 8th inst. subscribed to the Pittsburg, Wheeling and Kentucky Railway Company (the new link to connect Wheeling with the Pennsylvania railroad) the remaining $40,000 authorized by the people of that county in November, 1868. This makes the subscription by the county $100,000. The county will issue 7 per cent. five-twenty bonds free of county and township taxation.

☞ The gross earnings of the West Chester and Philadelphia Railroad for the year ending October 31, 1871, were $315,449 33; and the expenses, including taxes, $188,631 52—net earnings, $126,817 81. The number of passengers carried was 737,473. During the year the company have consolidated their seven and eight per cent. mortgage bonds and floating debt into one seven per cent. mortgage loan, clear of taxes.

☞ The Helena (Ark.) *Clarion* says that H. Van Vleek, chief engineer, and R. W. Rogers, division engineer of the Mobile and Northwestern railroad, are making arrangements for commencing work at that point immediately. The contract requires that thirty miles shall be completed and in running order by June 1, 1872. The iron will be there about the 26th of January.

☞ The amount of the Sinking Fund of the Norwich and Worcester Railroad January 1, 1871, was $285,141 90; interest received during the year, $25,584 60; annual payment, $10,000—total, $316,762 50; from which deduct premium paid on purchase of bonds, and salaries, $6,029,99—leaving amount of Fund January 1, 1872, $310,696 51.

☞ The Huntingdon and Broad Top Railroad reports a coal tonnage for the year 1871 of 319,845 tons, a decrease on the tonnage of 1870 of 971 tons.

☞ The Groshen and Pine Island railroad was leased to the Erie Railway Company on the 9th inst.

☞ O. H. P. Archer has been elected Vice President of the Erie Railway Company in place of James Fisk, Jr., deceased. The office of comptroller has been abolished, and an auditing committee, composed of Henry Thompson, H. N. Otis and John Hilton, appointed instead.

INVESTING MONEY.

THE NORTHERN PACIFIC RAILROAD offers to investors the tangible and perfect security of a first-class railroad bond and a real estate mortgage combined, where the holder has no anxiety about the title to the property on which his bond is secured. Its 7-30 bonds are exempt from United States taxation, at all times readily negotiable, and make the highest return of profit on the investment compatible with undoubted safety. The bonds pay $73 interest in gold on each $1,000 invested, which becomes a first lien on the great railroad, and a first and only mortgage on the finest land in the country, at the rate of 500 acres for each $1,000 bond. These 7-30 Gold Bonds of the Northern Pacific Railroad Company are issued in denominations of from $100 to $10,000 each, making them equally convenient as 5-20s, just as safe and much more profitable to the holder.

Full particulars furnished by JAY COOKE & Co., New York, Philadelphia, and Washington, and by Banks and Bankers throughout the country.

☞ THE ST. JOSEPH AND DENVER CITY RAILROAD.

BANKING OFFICE OF TANNER & Co.,
No. 11 WALL-ST.
NEW-YORK, JAN. 22, 1872.

To the Editors of the Evening Post:

In your special dispatch from Washington it is stated that the St. Joseph and Denver City Railroad Company are prosecutors before the House Judiciary Committee in the controversy for the transfer of the Hannibal and St. Joseph Railroad Company to the Atchison and Pike's Peak Rail road Company; that the St. Joseph and Denver City Railroad Company have issued unauthorized bonds and the amount of land claimed is not represented in the General Land Office as being under the grant. Upon inquiry from the officers of the Company we are directed to say that they have never appeared as prosecutors of the above-mentioned case; nor have they ever authorized any one to so appear; nor do they claim any lands from any Company. We are also directed to state, and of which we have full knowledge, that the amount of lands granted to the St. Joseph and Denver City Railroad Company, as withdrawn and certified in the General Land Office, exceed the amount claimed by the St. Joseph and Denver City Railroad Company, and form no part of the lands in controversy before the House Committee, which lands were granted to the Hannibal and St. Joseph Railroad Company, and not to the St. Joseph and Denver City Railroad Company, consequently the Denver Company have no interest in them whatever.

TANNER & CO.,
Financial Agents St. Jo. and D. C. R. R. Co.

☞ The certificate of incorporation of the Ohio and Kentucky Railroad was filed at Columbus, Ohio, on the 16th inst. The termini of this road are Lancaster, Fairfield County, and a point directly north of Maysville, Kentucky, on the Ohio river, in Brown county, Ohio. The railroad will pass through the counties of Fairfield, Pickway, Ross, Pike, Highland, Adams and Brown. The capital stock is $2,000,000. The road will connect at Maysville with the railway system of Kentucky and the South.

Massachusetts Railroads.

On another page we give a compilation of the material statistics of the railroad system of Massachusetts, taken from an advance copy of the Report of the State Railroad Commissioners. We presume that full copies will be in circulation in a few days, and then we shall be able to chronicle the names of said commissioners whose courtesy has enabled us to lay before our readers so valuable an abstract. Massachusetts has always been a leading State in the publication of exact statistics of public affairs; but in the present report on her railroad matters, which for fullness in every sense of the word not only exceeds all former published reports, but also sets an example that ought to be demanded from every other State, on so important a subject, the State has attained an eminence that cannot be gainsaid.

The railroad reports of New York are, on the contrary, essentially defective. They report in fact nothing. The Pennsylvania reports, though in form almost identical with those of New York, are more explicit chiefly in describing the nature of bonds and debentures issued by the companies respectively. Ohio also issues a very respectable report. But Massachusetts, as above stated, makes the best report, in the best form, of any we have had from any State. In naming the reports of Maine, New Hampshire, Vermont, New Jersey, &c., we can only name them as a disgrace to each. What the public requires is positive information, and with exception of Massachusetts, Ohio and Pennsylvania the reports published tend rather to be-cloud than to impart information.

There are many things in the Massachusetts reports that have never appeared in others, and all is given in a concise, proper form. Especially in the description of bonds and other securities, the report before us is intelligible. We have also a specific item showing the personality of the several companies reporting; the exact length of track; the cost in gross and per mile, and a large number of other items not heretofore looked for in such reports, and for the first time in reporting on railroads, we find statements in relation to the progress of steel and steel-capped track in the State. In some instances we find that the use of steel rail is as yet an experiment, in other cases

we see that the improvement has become a fixed idea in railroad economy. The following table shows to what extent it has been adopted in Massachusetts, the Mother of American Railroads, and on the whole the best managed Railroad State in the Union :

	Main Line. miles.	Steel. miles	Steel Capped miles.
Boston and Albany	201.65	62.80	0 25
Boston and Maine	74.25	10.75	2.25
Boston and Providence	44.09	23 00	2.00
Cheshire	53.62	0.10	0.52
Connecticut River	50.00	3 25	0.50
Eastern	44.20	4.50	1.00
Fitchburg	50.00	.....	5.50
Hartford and New Haven	62.00	48.00	15.00
Norwich and Worcester	59.40	1.50	.....
Old Colony and Newport	130.50	9.00	.....
Providence & Worcester	43.41	6.00	.....
Worcester and Nashua	45.69	.....	1.00

It thus appears that in the 858.81 miles of main line 196.92 miles, or 22 per cent., is already laid with steel or steel capped superstructure. Taking into consideration the very recent Bessemer discovery, this is doing exceedingly well. In ten years from date we expect that every first-class road in the country will have adopted the policy of using the best material in railroad construction following in the wake of the small but great State of Massachusetts.

Railroads in Kansas.

No State in the Union can probably show a more rapid railway development during the past six years than Kansas, being from 38 to 1,800 miles. This estimate does not include any portion of the various lines lying without the State.

The Kansas Pacific Road, under the stimulus of the munificent land grant and loan by Congress, has been completed since 1865, and has now in operation, including main line and branches, nearly 800 miles.

The Missouri, Kansas and Texas road has in operation 480 miles, and will be completed to Red river by June of the present year.

The Leavenworth, Lawrence and Galveston Road is 186 miles in length, and the Missouri River, Fort Scott and Gulf Road 161 miles.

The Atchison, Topeka and Santa Fe has 136 miles in operation, having constructed 75 miles during the past summer.

The Mission Valley Road is to be completed from Wyandotte to Lincoln, Nebraska, during 1872, and the St. Joseph and Denver Road is pushing forward to Fort Kearney.

The subsidies and land grants to these railroads have enabled the companies to push their enterprises in advance of the tide of population, and at the same time secure control of vast quantities of the best lands in the State.

☞ The Toronto and Nipissing Railroad is now open to Woodville (65 miles from Toronto), where it makes a valuable connection with the Midland running from Port Hope to Lake Simcoe. Its extension to Coboconk, on Gull River, 88 miles from Toronto, will be vigorously prosecuted in the spring.

☞ During the year 1871 there were 167 miles of railroad completed in the State of Connecticut. The total mileage in the State in January, 1871 was 742 miles; and at the beginning of this year 909 miles.

Fitchburg Railroad.

The receipts from operations of this road for the year ending September 30, 1871, were :

From passengers		$510,126 41
" freight		755,836 80
" express		27,937 44
" mails		9,676 81
" rents		18,013 21
" interest		6,350, 49
		$1,327,841 16
Expenditures, viz :		
Repairs of road	$148,749 11	
" bridges	16,544 95

Oil and waste	10,313 55	
Passenger department	92,884 63	
Freight department	148,564 15	
Switchmen	17,938 68	
Removing ice and snow	1,962 41	
Gratuities and damages	8,586 42	
Taxes, insurance, etc	82,357 97	
Salaries, office exp., etc	27,680 11	
		1,010,603 23
Net earnings		$316,737 93

The company have 36 locomotives, 43 passenger, 11 mail and baggage, 435 eight-wheel and 312 four-wheel merchandize, and 36 gravel cars. Number of miles run by passenger trains, 334,-138 ; by freight trains, 320,206 ; by other trains. 11,713—total, 666,057. Number of passengers carried, 1,793,222; do. carried one mile, 22,705,-034. Length of main line, 50.68 miles ; length of Watertown Branch Railroad, 6.60 miles ; length of Lancaster and Sterling Branch Railroad, 12.42 miles ; length of Peterboro' and Shirly Railroad, 23.62 miles ; length double track (main line) 50.68 miles ; length of side and other tracks 32.63 miles—total length of tracks belonging to the company, 176.63 miles. The report says :

Our last annual report was made for a period of only ten months, and as the amount of the receipts and expenditures for the different months show considerable variation, we are unable to make a very accurate comparison with the business of the past year ; but considering both expenditures and receipts to be directly in proportion to the number of months included in each report, we find that the gross income has increased $24,216 44,—that the expenditures are likewise $10,221 09 greater than those of the preceding year, and consequently the net earnings have increased $13,995 35.

In comparing the number of passengers carried, and the receipts of the years 1870 and 1871, we find after deducting the Lexington and Arlington Railroad, and the State Encampment business, an increase of 109,503 in the number of regular passengers carried, and of $11,587 53 in the passenger receipts.

The gross receipts for freight transportation during the year,—are also $54,604 50 in excess of the like receipts of the preceding year.

During the year the Union Cattle Market at Watertown has been completed ; it was opened for use in March last, and has proved to be admirably adapted for the purposes for which it was designed.

This market has enabled us to retain cattle and other business upon our road, which would otherwise have been diverted therefrom ; but as an investment alone, has not as yet been remunerative.

One object in establishing this market, was to enable us to perform the increased cattle business which will come over our lines after the completion of the Hoosac Tunnel.

As soon as this tunnel line is opened, it will probably be necessary to increase the number of cattle yards, &c., and this can be done at a comparatively small expense, as the grading is all completed, and the corporation owns sufficient land adjoining the market to extend it to at least three times its present size.

Some of the large expenditures for the year have been for the following purposes :—

At Boston, four new draw bridges—three for trains, and one for vehicles—have been constructed over the channel of Charles River ; a new pile bridge, forming a part of our new avenue to the freight-houses and yards, has also been built over the property purchased of the Commonwealth for that purpose ; the old pile bridge built in 1847, and extending from Boston to Charlestown, has been cut down and rebuilt.

The flats adjacent to our bridge over Miller's River have been dredged out, making a safe and convenient channel for vessels, about two thousand feet in length, with ten feet of water at low tide.

At Marlboro', on the Marlboro' Branch Railroad, the High Bridge some three hundred feet in length, and eighty feet in height, has been replaced by a permanent earth embankment.

At Croton Junction, land has been purchased, and a large passenger station erected by our corporation and the Worcester and Nashua Railroad Company.

Many improvements have been made in our road bed, tracks, and equipments ; they are all in good order, and their condition improves with every succeeding year.

An increase has been made in the number of trains, and the miles run by them. We are now running daily, six through trains, several of them express, and running at high speed. These have added considerably to our expenses, and will still continue to do so.

Work upon the Hoosac Tunnel is steadily progressing, and the time is rapidly approaching when this important route to the West will be in active operation. In order to provide properly for the large increase of business which we may reasonably expect from this source, and likewise to furnish better facilities for other connecting railroads, considerable expenditures should be made during the ensuing year for new freight avenues, new freight stations, elevators, and other important improvements.

The assets of the corporation on the 30th of September last were as follows :

Cash	$17,646 25
Notes receivable	25,207 62
Uncollected freight	39,153 17
Stock materials	107,852 11
Fuel	30,922 00
Real estate	204,939 77
Renewal fund	95,280 90
	$521,001 82

And the liabilities were :

Due connecting roads	$1,655 06	
Unclaimed dividends	5,916 00	
Unclaimed State tax	2 81	
		7,573 87
Total surplus		$513,427 65

At the close of the present year, twenty-three hundred shares of the issue authorized by vote of the stockholders June 29, 1870, remained unsold, and were debited at their par value to renewal fund, and credited to capital stock, that the capital of the company might represent the full number of shares issued ; therefore, renewal fund will be entitled to the proceeds of these shares, par and premium when sold, which will give at present prices, a balance of $200,000 to the credit of that account.

The present balance to the debit of renewal fund account is equivalent to a loan in anticipation of the sale of the above stock, hence its appearance as an asset.

TRIAL BALANCE SEPTEMBER 30, 1871.

Construction accounts	$4,000,000 00
Real estate	204,930 77
Cash	17,646 25

Insurance and taxes	30,543 12	31,309 76
U. S. tax	24,816 49	.....
	$1,018,039 14	$1,158,219 65
Balance	$768,230 62	$705,745 36
Rent of B. & M. R.R.	$3,215 04	$3,215 04
Int. paid and accrued	203,785 67	255,648 18
Total rent and int	$207,000 71	$258,863 22
Net income	$561,229 91	$446,882 14

From the foregoing statements it will be seen that the actual receipts from the business of the railroad, exclusive of property account, have been $1,841,324 09, against $1,718,755 16, for the preceding year, an increase in ordinary revenue of $122,568 93. Our expenses for the same period were $1,158,219 65, against $1,018,039 14, being an increase of $140,180 51, showing that although our business has largely increased, every dollar of that increase and more too, has been expended upon the road itself, in its operation, in repairs and improvements, of which the public rather than the stockholders have the immediate benefit.

We have laid down within the year 2,724 tons of rails, 450 tons of welded rails, and 56 697 sleepers, upon our road and branches. The cost of iron and sleepers used in repairs amounting to about $250,000.

We have built at various points on the line new side tracks and turnouts, to the extent of 17,546 feet, about three and a quarter miles.

Our gravel trains have been in constant service in raising and improving road bed and embankments; the pay-rolls for labor amounting to $88,736 99.

During the year we have added to our stock twenty new passenger cars, of the value of about $95,000, of which twelve have been built in our own shops; we have also added new, six baggage cars, thirty long box cars, forty platform cars, and fifty coal cars, of the value of about $80,000.

We have added during the year to our motive power nine new first class engines of the value of about $100,000; of which three have been built in our own shops, and we have rebuilt three.

In the carpenters' department a very large amount of work has been done; new passenger depots have been built at Marblehead and at Amesbury, and very considerable repairs made on many others; an additional shop has been built at the car factory at Salem.

At Newburyport a new brick engine house has been built; a new turn-table has been put in there, and also at Middleton. Our engine house at Prison Point is being enlarged.

At Portsmouth we have put in a new turn-table, and are building a new engine house and coal sheds, on the land purchased for that pu pose. We have also filed a location under the laws of the State of New Hampshire, over a strip of the Portsmouth Mill Pond, adjoining our track, 400 feet wide, and have commenced filling for additional track room there; and in settlement of land damages therefor have found it expedient to purchase the mills and the whole of the mill pond.

At Lynn—where there have been for a long time deep seated complaints about the passenger accommodations, but where our facilities for freight business in its present magnitude are so limited that we send trains away to distant side-tracks to wait their turns to be hauled back and discharged—we have negotiated for the purchase and acquisition of a valuable tract of land for station purposes, both passenger and freight, extending from Market Street to Pleasant Street on both sides of our railroad, and comprising nearly four acres, at a cost of $200,000. A passenger station is already well advanced in progress of erection thereon. We have also bought about a half acre additional, westward of Pleasant Street, for $16,398, for the purpose of additional extension of freight tracks and accommodations. Improvements of an enlarged character are also in progress at the old passenger station on Exchange Street.

We have filled with solid embankment a large portion of the bridge between the Fitchburg Railroad crossing and Somerville, at an expense in addition to use of train, of about $14,642 25.

We have also covered with a pile wharf structure, under authority heretofore given by the Legislature, a space, adjoining our bridge between the Charles River draw and Miller's River, of 48,268 square feet, giving us so much additional accommodation for side tracks and station purposes at a cost of about $41,468 73.

The extension of our double track has been continued from Beverly eastward, and will soon be completed into Ipswich, nine miles. The total expenditure for that work so far has been about $118,471.

The joint lease of the Portland, Saco and Portsmouth Railroad, to the Boston and Maine Railroad, and the Eastern Railroad Company, having been terminated according to the notice referred to in our last Annual Report, a separate contract has been made between the Portland, Saco and Portsmouth Railroad and this Corporation, embodying substantially the same provisions as in the former joint contract, but increasing the rent or dividends to the Portland, Saco and Portsmouth stockholders to ten per cent. currency annually, instead of six, as before. The net earnings since the contract have exceeded the rate of ten per cent., in addition to other advantages. A contract for twenty years has been entered into between this Company and the Portland, Saco and Portsmouth Railroad Company, and the Maine Central Railroad Company, by which it is hoped the great and growing eastern business will be facilitated and cheapened by being directed or allowed to flow in its natural channel to and from Boston.

The large outlays heretofore made, and which will hereafter be required for new rolling stock, for new side tracks and depots, and depot grounds and accommodations at various points on the line, and especially at the terminal stations, and also for the second track, make a further addition of capital necessary, either in the form of bonds or stock.

It will be remembered also that our '72 bonds, to the amount of $380,000, gold, will be due in a few months.

Previously to the accident at Revere, we had issued 2000 shares of new stock under authority heretofore given, but did not think it expedient to continue the issue under the depression caused by that disaster.

We recommend that authority be given to the Directors to issue bonds according to the provisions of the statutes on that subject, to an amount not exceeding $1,500,000.

The work upon the extension of the Portsmouth, Great Falls and Conway Railroad, has been pressed forward with energy. The extension was opened for travel to Ossipee, seventeen miles, in August; and to West Ossipee, twenty-eight miles, in October; and to Conway, forty miles, on the 8th day of December, 1871.

When it is remembered that the work, though partially commenced in November of 1870, was not fully entered upon with adequate force until the following month, this result cannot but be deemed most satisfactory. Forty miles of railroad, through the difficult mountain regions of New Hampshire, have in fact been constructed and put in operation within the period of about twelve months; and it has been well and thoroughly constructed, as a first class railroad, with suitable side tracks, turn-tables, engine-houses, and tasteful and convenient depot buildings, both for passengers and freight at every station, and with the telegraph line, the property of the Corporation, extended and in use the whole length of the road. This result reflects credit upon the chief engineer, T. Willis Pratt, Esq., and his efficient corps of assistants, and on Mr. G. F. Hitchings, the contractor for the permanent way, and also upon those in charge of each department of the work.

Between Conway and North Conway the work is well advanced, and will doubtless be completed early next season.

The total expenditures to the present time for construction have been about $860,000, of which about $600,000 has been paid in on stock issued a year ago; the remainder has been chiefly advanced by this Company, to be replaced by a further issue of stock of that Corporation in due time.

Preliminary arrangements have been made for the lease and construction of the Wolfboro Railroad, under authority heretofore given.

The number of miles run by locomotives has been 1,189,811. Number of passengers carried, 4,635,482. Tons of freight carried, 378,199.

New York, West Shore and Chicago Railroad.

Among the great railway projects of the country, is one known as the West Shore and Chicago road, the general route of which is given as up the west shore of the Hudson from New York city, thence it will take a westward course to Buffalo, and thence by the most practicable route to Chicago. The company has purchased the New York and Fort Lee railroad, which gives an entry to the city and locates the lines as far as Hoboken. Surveys for the balance of the route have been made as far as Buffalo, but the announcement of the route most favored by the company would be inadvisable at the present time, as they are negotiating for the right of way. The company is said to be composed of some of the most prominent business men of New York, and it is reported that Mr. Courtney, the President, has recently returned from Europe, whither he has been for the purpose of negotiating the sale of the bonds of the company. His trip was successful; the company now have no bonds upon the market, and it is proposed as early as possible in the spring to commence the construction of the road. This seems to be entirely different from the Canada Southern railway, of which Mr. Milton Courtwright is the President, and the progress of whose line between Buffalo and Chicago has repeatedly been referred to in the Commercial during the past three months. The negotiation of the bonds of Mr. Courtney's road indicates solidity on the part of its projectors and managers; and, as in all other enterprises promising increased transportation facilities, the people of the West have a deep interest in its success.—*Toledo (O). Commercial.*

New York Canals.

EXTRACT FROM THE REPORT OF THE AUDITOR.

The following exhibit shows the entire amount of revenues from all sources, other than taxation of all the canals of the State, for the last fiscal year. The expenditures and payments are also given for the same period, and the application of the surplus revenues in accordance with the requirements of the constitution.

Statement of the revenues of the canals, with the expenses of collecting the tolls and ordinary repairs, during the fiscal year ending September 30th, 1871.

Receipts:

Tolls	$2,813,686 29
Rent of surplus water	1,267 50
Interest on current revenues	23,661 00
Miscellaneous receipts	3,935 15
	$2,842,549 94

Payments, viz:

To canal commissioners for ordinary repairs	$185,697 83	
To contractors for repairs	549,049 34	
To superintendents for ordinary repairs	731,920 28	
To collectors for salaries, clerk hire, pay of inspectors, and expenses of collector's office	89,054 49	
To weigh-masters and assistants	14,044 12	
For salaries chargeable to the annual revenues, refunding tolls, printing, and other miscellaneous payments	88,851 19	
		1,658,617 25
		$1,183,932 69
Reserve for payment of appropriations under act chapter 653, laws of 1871		202,344 01
Surplus revenues of the canals for the fiscal year ending Sept. 30th, 1871		$981,588 68

This surplus revenue has been appropriated and set apart in accordance with the provisions of article seven of the constitution, to sinking fund under section two.

The financial condition of the canals for the last fiscal year is as follows:

Balance in the treasury and invested, Oct. 1, 1870		$2,743,441 87
Received from all sources during the fiscal year ending Sept. 30, 1871	6,956,867 40	
	$9,700,809 27	
Paid during the same period	5,200,692 25	
Leaving a balance Sept. 30, 1871 of		$4,499,617 02

Said balance is invested and deposited as follows, viz:

Amount deposited in banks	$4,445 818 02	
Amount invested in U.S. 10-40 bonds	50,000 00	
Real estate, etc., Bank of Corning	3,799 00	
		$4,499,617 02

The Canal debt paying interest September 30, 1871 is as follows:

	Principal.	Am't int.
Under article 7, section 1, of the constitution	$1,106,420 00	$55,321 00
Under article 7, section 3 of the constitution	9,285,000 00	557,100 00
Under article 7, section 12 of the constitution	1,575,000 00	94,500 00
	$11,966,420 00	$706,921 00

The application of the balances of the several sinking funds which are now in the treasury and temporarily invested, to the payment of the canal debt reduces it as follows:

Total Canal debt September 30, 1871, $11,966,580; balance of sinking funds September 30, 1871, including temporary investment, $2 010,992 92—leaving a balance of $9,955,787 08; to which add deficiency in sinking fund under act. 7, sec. 8, $356,766 65—debt after applying all the sinking funds, $10,312,853 73.

The unpaid and outstanding Canal debt, on the 30th of September last, and for which certificates of stocks have been issued, is $11,966,580, maturing as follows: in

1837	$160 00	
1872		$2,257,900 00
1873		5,150,100 00
1874		3,205,420 00
1875		473,000 00
1877		880,000 00
Amount paying interest		$11,966,420 00
Amount not paying interest		160 00
Total debt		$11,966,580 00

The average rate of interest on this debt is 5 91-100 per cent.

These stocks were on the 30th September, 1871, held as follows, viz:

In the United States	$9,917,120 00
In foreign countries	2,049,300 00
	$11,966,420 00
The annual interest on the stock debt, under article 7, section 3, of the constitution, is	$557,100 00
Amount required to purchase coin for the payment thereof, estimating coin at ten per cent. premium	55,710 00
	$612,810 00

On the 30th September, 1871, the sinking fund, under this section, was overdrawn $356,766 65, in payment of the interest on this debt.

In addition to the above stock indebtedness, the canal revenues are chargeable with a portion of the general fund debt of the State, known as the General Fund Debt, for which the canals are liable. This debt is now, in accordance with the provisions of section 2 of article 7 of the Constitution, the first lien on the "*surplus revenues*," and on the 30th Sept. 1871, was $4,040,026 40. The Sinking Fund applicable to payment thereof, amounted to $1,805,744 20.

It will be seen from the preceding statements that, on the 30th day of September last the aggregate amount of canal and General Fund indebtedness, for which certificates of stock have been issued, and now bearing interest, was $16,006,606 46.

The interest on this debt is payable quarterly, on the first days of January, April, July and October, in gold.

The sum required annually to pay the interest on the above debt, estimating the premium on gold at ten per cent., is $1,020,671 52.

The following statement shows the aggregate receipts and payments on account of the ordinary expenses of the canals for the last two years:

	1870.	1871.
Re'ipts from tolls, etc.	$3,107,138 90	$2,842,954 94
Payments to superintendents and repair contractors	$1,846,262 71	$1,280,969 62
Payments by Canal Commissioners for repairs	421,455 87	185,697 83
Payments to collect'rs and their assistants and weigh-masters.	104,406 39	103,098 61
Refunding tolls, salaries of officers, etc.	73,421 45	88,851 19
Advanced by deposit banks or reserved for ordinary repairs prior to 30th September	591,528 87	202,344 01
Total expenses for yr.	$2,537,164 29	$1,860,961 26
Net receipts	$569,974 61	$981,588 68

This statement shows a falling off in the toll receipts of the last fiscal year as compared with with those of 1870, of $264,588 96; but included in the receipts for tolls in 1870 (which has reference to the fiscal year from October 1st, 1869, to September 30th, 1870), and the collection of tolls at the higher rates then in force, from and including September to the close of navigation in 1869, it being about three-sevenths of a year's collections, which accounts for the excess of tolls for 1870 over those received in 1871. There is quite a gain in the net receipts owing to the large decrease in the cost of maintaining and repairing the canals, viz.:

Decrease in expenditures	$676,203 03
Less decrease in receipts	264,588 96
Increase in net receipts	$411,614 07

The repair trust fund is composed of deposits made by repair contractors, to secure the faithful performance of their several contracts.

The balance of this fund on hand, as per last report was	$36,826 01
Interest on same during the year	1,656 64
Balance 30th September, 1871	$38,482 65

The requirements of section 1 of article 7 have been complied with by making provisions for the payment of that portion of the Canal Debt provided for in that section. The Sinking Fund is amply sufficient to meet that debt when it matures. The next charge in order of pricrity upon the surplus earnings of the canals is an annual contribution of $1,500,000 as a sinking fund to pay the interest and redeem the principal of the General Fund Debt. The first contribution to this sinking fund after provision was made for the payment of the Canal Debt mentioned in section one was in 1869, when the full amount called for by the section was contributed. At the close of the fiscal year in 1870, the surplus earnings applicable to the General Fund Debt Sinking Fund were

but $569,974 61, leaving a deficiency of $930,025 39. The surplus revenues applicable to the General Fund Debt for the year ending September 30th, 1871, were $981,588 68, less by $518,411 32 than the amount called for by the Constitution. The General Fund Debt charged upon the canal revenues, and for which no other provision is made, after the application of the above amounts of surplus revenues, amounted, on the 30th day of September last, to $2,234,282 11, and is redeemable at different periods between this date and 1878.

Estimating the surplus earnings of the canals by the results of the season of navigation just closed, they will suffice to discharge the entire debt charged upon them by April 1st, 1886.

With a wise management of the canal revenues, it is believed that there need be no falling off in the annual contribution to this object; and if the Legislature and the administrative and financial canal officers co-operate to accomplish the payment of the debt, there can be but little doubt it will be extinguished by the day named.

The portion of the canal debt for which the surplus earnings of the canal are pledged by section three of the same article, and known as the "Enlargement Debt," amounted at the close of the last fiscal year, to $9,285,000. The sinking fund to provide for interest and principal of this enlargement debt, was overdrawn in payment of interest during the last fiscal year. The deficiency on the 30th day of September, 1871, amounted to $356,766 65.

A portion of this debt, amounting to $1,562,900, becomes due on the 1st day of July, 1872, and with the deficiency above mentioned, is to be provided for.

The provisions of the Constitution give ample power to the Commissioners of the Canal Fund for that purpose. The provision is that if the "said Sinking Fund shall not be sufficient to redeem any part of the principal at the stipulated times of payment, or to pay any part of the interest of such loans as stipulated the means to satisfy any such deficiency, shall be procured on the credit of the said Sinking Fund." This is but making a new loan on the same pledge to redeem the old. It is only when means cannot be procured upon a credit of the Sinking Fund to satisfy the claim of creditors, that a resort is to be had to taxation by virtue of section four of the same article. So long as the canals yield a surplus after the payment of the expenses of collection, superintendence and ordinary repairs, this pledge, aside from the credit of the State and the power of taxation, furnishes ample security for any loans that may be needed to satisfy the claims of creditors under this section. The credit of the State, without a pledge of the prospective revenues of the canals, is abundant to enable its financial officers to obtain the means for any purpose for which money may be borrowed under the Constitution. There will be no necessity for legislation upon the subject, the Commissioners of the Canal Fund having ample power to do all that is required to raise the means to redeem the principal about to become due, and make good the Sinking Fund, and by the instrumentalities thus providently prescribed, this portion of the State debt can with ease be extended until the revenues, properly charged with its payment, will be sufficient for that purpose.

The constitutional provisions are wise and abundant, for the occasion, and any legislation, not necessary, might be mischevious in its consequences.

The debt under article 7, of section 12, of the Constitution, created for the payment of the floating debt of the State, by a vote of the people in 1859, amounted to $1,575,000, on the 30th day of September, 1871. The sinking fund, applicable in payment of the principal and interest on the same day, amounted to $877,401 35. The amount of $695,000 of this debt becomes due July 1st, 1872, and can be paid from the sinking fund.

The Canal Debt on 30th of September, 1871, was:

Debt of 1846, under art. 7, sec. 1..		$1,106,580 00
Enlargement, under art. 7, sec 3..		9,285,000 00
Floating debt, under art. 7, sec. 12		1,575,000 00
		$11,966,580 00
General fund debt, Sept. 30, '71...		4,040,026 40
Total amount of canal and general fund debt.....		$16,006,606 40
Balances in sinking fund, 30th September, 1871:		
Under art. 7, sec. 1..	$1,138,591 56	
Under art. 7, sec. 12.	877,401 36	
	$2,010,992 92	
Less overdraft on sinking fund, under art. 7, sec. 8, to pay interest.....	356,766 65	
Net balance in canal debt sinking fund..	$1,654,226 27	
Balance in sinking fund for general fund debt.....	1,805,744 29	
Total balance in sinking fund		3 459 970 56
Total canal and general fund debt, after applying sinking fund		$12,546,635 84

New Railways in Illinois.

In the report of the Railroad Commissioners of Illinois, we find that the length of railroad lines in this State, December 1st, 1871, was 5,490¼ miles. There was, on December 1st, 1871, in course of construction, but not completed, 1,208 miles, which, when completed, will make a grand total of 6,698¼ miles. The railways now in process of construction are stated to be the following:

Bloomington and Ohio River railroad, 70 miles of grading completed, whole finished probably in 1872.

Chicago, Pekin and Southwestern railroad, 162 miles from Chicago. Grading nearly completed, and 20 miles of track to be laid in December.

Chicago, Danville and Vincennes railroad, 210 miles from Chicago to Vincennes, Indiana. Road completed to Danville, Vermillion county.

Champaign, Monticello and Decatur railroad, 42 miles from Champaign to Decatur. Road about half completed.

Cairo and Vincennes railroad, 150 miles from Cairo to Vincennes, Ind. Grading partly done.

Cairo and St. Louis railroad, 135 miles from East St. Louis to Cairo, via Waterloo, Sparta, Murphysboro, and Jonesboro. Gauge 3 feet.

Chicago and Iowa railroad, 83 miles from Aurora to Forreston. Commenced in 1871, and track laying completed Nov. 25th, 1871.

Decatur, Sullivan and Mattoon railroad, 40 miles from Decatur to Mattoon. Most of the iron laid.

Decatur and State Line railroad, 129 miles from Mokena to Decatur. Grading and bridging completed.

Fairbury, Pontiac and Northwestern railroad, 30 miles from Fairbury to Streator. Commenced business in July, 1871.

Gilman, Clinton and Springfield railroad, 110 miles from Springfield. Grading and bridging completed in 1870. Track laying commenced May, 1871. Road completed for business Nov. 22, 1871.

Indiana and Illinois railroad company, 15 miles from Indianapolis, 72 miles of line in Illinois. Work now progressing.

Illinois Farmers' railroad, 30 miles from Jacksonville to Virden; 18 miles in operation.

Lafayette, Bloomington and Mississippi railroad, 79¼ miles from Bloomington to Indiana State line; track laying began September, 1871, and 50 miles completed December 1.

Plymouth, Kankakee and Pacific railroad, from Plymouth, Ind., to Hennepin, Ill., 100 miles from State line to Hennepin. Grading completed, and work progressing on the bridge over the Illinois river, at Hennepin.

Peoria, Atlanta and Decatur railroad, 70 miles from Peoria to Decatur. Grading under contract.

Peoria and Rock Island. Last rail laid July 7th, and road in operation.

Pekin, Lincoln and Decatur railroad, 75 miles from Paris to Decatur. Grading and bridging progressing, and 15 miles of track laid.

Quincy, Alton and St. Louis railroad, 22 miles completed and in operation.

Springfield and Northwestern railroad, 72 miles from Springfield to Lewiston. Grading and bridging progressing and 22 miles of track laid.

Springfield and Illinois Southeastern railway, 226 miles from Shawneetown on the Ohio river to Beardstown on the Illinois river. Opened for business from Shawneetown to Beardstown, 139 miles; Springfield to Beardstown, 45 miles; under construction from Pana to Altamont, 42 miles. Whole to be completed February, 1872.

Michigan Town Railroad Bonds.

In the United States Circuit Court yesterday morning, the cases of George H. Taylor vs. The City of Battle Creek, and Edward B. Talcott vs. The Township of Pine Grove were decided. These cases involved the question of the validity of municipal bonds issued in aid of railroads under the general railroad aid laws of Michigan. The former case arose in the Eastern district of Michigan and the latter in the Western district. Both were argued together a few days ago in this city before Judges Emmons, of the Circuit Court, Withey, of the Western District Court, and Longyear, of the Eastern District Court. All these judges participated in the decision, and all concurred.

The opinion of the court was read by Judge Emmons, and was a very learned and exhaustive discussion of all the points raised. He reviewed the decisions upon the question of the authority of the Federal courts to go behind the decisions of State courts upon the construction of State constitutions and statutes. He discussed at considerable length the public character of railroad corporators, and dissected the decision of the Michigan Supreme Court in the case of the People vs. Salem, in which they held the Railroad Aid law unconstitutional.

He held that the bonds issued by municipalities in aid of railroads, having been issued in good faith and transferred to the hands of innocent purchasers, are valid contracts, as between the citizens of Michigan and other States, which the Federal courts will enforce. But this only applies to bonds issued before the law was declared unconstitutional by the State court. Contracts made subsequent to that decision will not be enforced by this court.

Judge Withey and Longyear read concurring opinions.

The result of this decision, if it is confirmed, as it will doubtless be, in the United States Supreme Court, is that the railroad aid bonds are valid in the hands of non-residents of Michigan, and can be collected through the United States courts. It will not then take long to transfer every bond from the hands of Michigan holders to those of non-residents, when their collection can be enforced. As this can only be done by a process of the courts, which process would have to be invoked to collect any instalment of interest, it will be seen that some trouble and considerable expense will still accrue to municipalities before these bonds can be got rid of. But by this decision they are saved from repudiation, and innocent bondholders are made whole. Doubtless it would be better for the municipalities to confess judgment at once on the whole amount of their bonds and thus save the costs of going through litigation in each case.

It is estimated that the amount of bonds issued by cities and townships in Michigan in aid of railroads, and which are covered by this decision, is $1,500,000. Very many of these are now held outside the State, and the balance will soon find their way out.—*Detroit Post, Jan. 17.*

RAILROAD EARNINGS—MONTHLY.

	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

RAILROAD JOURNAL

| | | |

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, January 27, 1872.

Stock Exchange and Money Market.

Money has been fairly active through the week, the demands having been stimulated to some extent, by the reports of financial trouble among some of the saving institutions, of late organization, and more or less questionable connections and management. The speculative inquiry for accommodation has been brisk on the basis of the full legal rate of seven per cent, to the more prominent of the Stock Exchange firms; with 6@7 per cent. quoted as the ruling figures to the Government houses, whose wants were provided for, with comparative promptness. The mercantile call for aid has been fair, and strictly first-class business paper has been rated at from 7@9 per cent. per annum. The U. S. Sub Treasury augmented its coin balance, last week, nearly 2¾ millions, while reducing its currency reserve about 1⅜ millions, making the total of the latter $6,887,191 at the close of the week. The coin balance at the close of the week was $66,425,206.

The city banks, in their latest return, show an increase of $1,720,500 of legal tender notes, with a reduction of $289,600 of specie, and an increase of $5,537,500 of deposits; also an increase of $3,779,700 in their loan and discount averages, and a reduction of $68,100 in their item of circulation. The city bank exchanges, last week, averaged $119,346,694; and thus far, this week, 122 millions daily. The banks now hold $10,929,625 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $27,693 300, against $28,520,495 same time last year. The city bank deposits are now $220,361 500, against $211,690,030 week ending Jan. 21, 1871. The legal tender reserve amounts to $45 419,500, against $49,774 557 same time last year. The circulation now stands at $28,371,200 against $31,988 274 same time last year. The loans are now $279,032,900, against $270,853,791 at this date last year.

The coin reserve of the Treasury department on Tuesday was $104,500 000 including $37,500,000 represented by outstanding coin certificates. The currency reserve was $11,500,000.

The U. S. Sub Treasury reduced its currency balance $1,384,423 and increased its coin reserve $2,710,923 as the result of the week's business. The receipts of the office were $6,339,371 in coin, and $1,689,078 in currency; payments, $3,628,450 in coin, and $3,073,502 in currency. The office received $3,819,000 in coin or its equivalent, from customs; and disbursed $1,870,242 of coin interest.

The U. S. Sub-Treasurer retired last week, $3,487,466 of coin certificates, received for customs.

Government revenues have been on a more liberal scale since our last. The excises yielded last week about 1¾ millions, and thus far since July 1 1871 about 73½ millions. The customs at the port of New York, last week were $3,740,466; and at the outports, equal to about $1,250,000 more, all in coin, or coin certificates.

The gold movement has been comparatively tame and the price has been remarkably steady, throughout. The speculative inquiry has been spiritless. The customs call has been somewhat brisker. The export drain has been lighter than has been anticipated. The range of the price during the week has been from 108⅞@109¼ and the closing quotation on Wednesday was 108⅞ against 108⅞@109 the preceding Wednesday. The specie outflow, last week, was $372,465. The Gold Exchange Bank clearances have averaged about 25⅝ millions a day during the week. Wednesday's clearance were $21.001,000.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from July 1, 1871 to Jan. 20, 1872, $54,278,185, against $58,824,080 same time in 1870-1871.

The customs demand for Gold last week, averaged $636,500 a day; thus far, this week, it has averaged $525,000 a day or equal to a weekly aggregate of $3,150,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $15,838, and since Jan. 1, 1872, $61,540 against $159,416 same time in 1871. The total customs revenue of the Government, in coin, at this port, from July 1. 1871, have been $86,196,043 against $80,227,409 same time in the preceding fiscal year 1870-71.

The export drain of specie was $372,465, last

week, against $807,363, same week preceding year. The shipments since July 1, 1871 have been $23,602,401 against $43,196,377 same time in 1870-71.

Foreign Exchange has been in moderate request at about previous quotations. Bankers' sixty day bills on London closed on Wednesday at 109@109¼; sight bills on London, 109 5/8@109 7/8.

The produce exports from this port, week ending with Jan. 23, were to the currency value of $5,150,172.

Among the negotiations of American securities, recently brought to a most successful issue in Frankfort, was that of the $6,080,000 loans of the San Joaquin branch of the Central Pacific Railroad Company, through the agency of Messrs. Fisk & Hatch, who marketed the Central Pacific bonds, and are the financial agents of that company, and who are now marketing the loan of the Chesapeake and Ohio, which company is practically under the same management as the Central Pacific.

Under the Treasury programme for January the U. S. Sub-Treasurer at this port proposed to sell, on Thursday, January, 25, $1,000,000 Gold.

Government securities has been in fair request at generally well supported prices, with the chief dealings reported through the commission houses, for investment purposes.

U. S. sixes of 1881 closed here on Wednesday of the current week at 115 3/8@115 5/8; U. S. Five-Twenties of 1862, (other than the bonds called in) 110 1/8@110 3/8; U. S. Five-Twenties of 1864 at 110 1/8@110 1/4; U. S. Five-Twenties of 1865, 111 @111 3/8; U. S. Five-Twenties of 1865 consolidated, 110 5/8@110 3/4; U. S. Five Twenties of 1867, 112 1/8 @112 1/4; U. S. Five-Twenties of 1868, 112 1/4@ 112 3/8; U. S. Ten-forties at 110 1/2@110 3/4; U. S. Fives of 1881 (Funding Loan) 110 1/8@110 1/4. Six per cent. currency bonds, 114 3/8@114 3/4.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Jan. 10.	Jan. 17.	Jan. 24.
Consols	93	92 7/8	92 5/8
U. S. 5-20's of 1862	91 7/8	92 3/8	92 1/4
U. S. 5-20s, 1865	93 1/4	93 1/4	93 1/4
" 1867	93 1/4	93 5/8	93 5/8
" 10-40s	92	92 1/4	92
Erie	30 1/2		

State bonds have been in fair demand, closing steadily.

There has been an active investment inquiry noted for the better class of Railway loans, with a firm market for the favorite of the older issue. Central Pacific Sixes, have been taken as freely as offered at the ruling figures, closing at 102 1/8 @102 1/4. Chesapeake and Ohio Sixes have been in better request for investment purposes on the basis of 94 per cent. and accrued interest.

The way traffic on the portions of the through Chesapeake and Ohio line at present in actual running order affords a handsome percentage of net earnings, serving as an indication of the liberal revenues which must accrue on the working of the entire roadway, from the Ohio River to the sea-board, and the consequent large, active, and very lucrative freight and passenger business, which must inevitably result from the establishment of direct, short, cheap, and otherwise advantageous communication between the teeming valley of the Ohio and the great producing States of the West, and the Atlantic sea-board, which will secure easy access to the markets of the world. Based on this important East and West trunk line, and constituting an absolute lien on this productive railway property, is the First Mortgage Loan of the Chesapeake and Ohio Railroad Company, of which Loan the original authorized limit was $15,000,000, but of which less than two millions now remain to be disposed of. The bonds, which cover and comprise all the obligations of the corporation, are recommended as constituting a first-class form of lucrative investment, being protected by the pledge of the entire line of railroad from Richmond to the Ohio River, with its franchises, equipments and all other property, and with the additional guarantees afforded by the eminently responsible management and financial agency of the Company, which include the names of some of our most successful business men, bankers and railroad builders. Intimately identified with this enterprise as its President and controlling chief is Mr. C. P. Huntington, who, as Vice President of the rich and prosperous Central Pacific Company, has so largely contributed to the efficiency and success of the latter road. Messrs. Fisk & Hatch, the well-known bankers of the Central Pacific, are also the bankers and financial agents of the Chesapeake and Ohio Company.

Messrs Tanner & Co., bankers and financial agents of the St. Joseph and Denver City Railroad Company's First Mortgage Sinking Fund Land Grant Bonds, report the very satisfactory progress of the work of marketing the small remainder of this loan, which is a thirty year obligation, with interest at Eight per Cent., free of tax payable in February and August in each year, and both principal and interest payable in gold. Messrs Tanner & Co., in a special card, very emphatically contradict a Washington rumor unfavorable to the St. Joseph and Denver corporation, in regard to the ownership in dispute between two or three companies, to certain Land Grant territory in the West. The subject was last week, or the week before, referred to the Judiciary Committee of the House. Messrs. Tanner say that the facts are grossly misrepresented by the special dispatch to the *Evening Post*; and, on the authority of the officers of the company they state that the St. Joseph and Denver corporation have never appeared as prosecutors in the case; nor have they ever authorized any one to so appear; nor do they claim any lands from any company. They further state, of their full knowledge, that the amount of lands granted to the St. Joseph and Denver City Railroad Company, as withdrawn and certified in the General Land Office, exceed the amount claimed by the St. Joseph and Denver City Railroad Company, and form no part of the lands in controversy before the House Committee, which lands were granted to the Hannibal and St. Joseph Railroad Company, and not to the St. Joseph and Denver City Railroad Company.

Railway and miscellaneous share property has been quite active, opening strong and buoyant, but through the later half of the week showing marked depression, weakness, and irregularity, under urgent realizations at the Stock Board, on the part of speculative operators.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

THE SIX PER CENT. BONDS OF THE CHESAPEAKE AND OHIO RAILROAD COMPANY having still twenty-eight years to run, with interest payable May 1 and Nov. 1, both principal and interest payable in gold coin in the City of New York, are recommended by us for safe and permanent investment for the following reasons, viz:

1. **They are thoroughly secured.**
2. **Like the Central Pacifics they will be widely known, very popular and always marketable.**
3. **They will be dealt in at all the prominent Stock Exchanges in this country and Europe, and have the advantage of both a home and European market.**
4. **They should largely advance from the present price of 94 and accrued interest, when all sold by the Company, as Central Pacifics have done.**

The total issue is $15,000,000, OF WHICH LESS THAN **$2,000,000** NOW REMAIN UNSOLD.

They are in denominations of $100, $500 and $1,000, Coupon or Registered.

THE CHESAPEAKE AND OHIO being under able and honorable management, partly identical with that of the CENTRAL PACIFIC, there securities should take equal rank in popularity and market value.

For exchange of Five-Twenties or for new investments, we cordially recommend either the Central Pacific or Chesapeake and Ohio Six Per Cent Gold Bonds.

We continue to deal in Government securities, buy and sell investment Stocks and Bonds at the Stock Exchange; open accounts with depositors, upon which we allow interest at the rate of four per cent., make collections in all parts of the country, and transact a general Banking business.

FISK & HATCH.

HARVEY FISK.
A. S. HATCH.

☞ Messrs. GILEAD A. SMITH & Co. have leased the Rolling Mill, at Danville, Pa., known as the "Danville Iron Works," and are now prepared to execute orders for Light Rails for Railroads, Collieries, Furnaces, Mills, &c. See Advertisement in another column.

☞ Mr. S. B. Stimson has been appointed Superintendent of the West Wisconsin Railroad, in the place of Mr. J. B. G. Roberts.

☞ ST. JOSEPH AND DENVER CITY RAILROAD COMPANY'S

FIRST MORTGAGE SINKING FUND LAND GRANT BONDS,

BEARING EIGHT PER CENT. (8 p. c.) INTEREST. PAYABLE IN GOLD, FREE OF TAX,

AND IN DENOMINATIONS OF $1,000, $500 AND $100, can be obtained from the undersigned, or through the principal banks and bankers throughout the United States.

The attractive features of these securities are recognized in the fact that, although they have been but a short time on the market, they are nearly all absorbed, and but a small amount are now for sale.

They combine a perfect security with a liberal rate of interest. This interest account is made light for, and easily borne by; the Company, through the operation of the Sinking Fund created from sales of the Company's land, which, in many cases, draw interest at the rate of ten (10) per cent. per annum. The security behind them is ample in every particular, as they constitute a first and only mortgage on a trunk line of railroad which will soon connect the City of St. Joseph, Mo., (an important railway centre.) with the Union Pacific Railroad at Fort Kearney, materially shortening the distance between the Atlantic and Pacific coasts. In addition to this, the bonds have further security in the fact that there is included in the Mortgage the Company's magnificent Lands, amounting to 1,500,000 acres, known to be among the best in the United States. The Mortgage Indenture prohibits the sale of these Lands at less than Four (4) Dollars per acre, and payable to the Trustees under the Mortgage, for the clear and express purpose of retiring these Bonds. The amount thus realized exceeds the entire amount of Bonds which can be issued, and leaves the road, property and franchises free.

The Bonds have thirty years to run, with interest at Eight per Cent., free of tax, payable in February and August in each year.

Both principal and interest are payable in gold.

The principal in New York. The interest in either New York, London or Frankfort-on-the Main, at the option of the holder, without notice, and in the gold currency of the country in which they are presented. They are coupons or registered.

Trustees—Farmers' Loan and Trust Company.

The present price of these Bonds is 97½ and accrued interest in *currency*, from Aug. 15, 1871. But they are receivable at par and accrued interest in payment for lands sold by the Company. The right is reserved to advance the present selling price without notice.

Maps, circulars, documents and full information furnished on application.

Though acting as agents for the sale of this loan, our firm buy and sell in their regular business the Bonds of the St. Joseph and Denver City Railroad Company, those of the Eastern Division eight per cent. (8s.) *recently placed by us at* 97½, *being now quoted at from* 101½ *to* 102½ *and accrued interest.*

TANNER & CO.,
Bankers, No. 11 Wall-st

Journal of Railroad Law.

RAILROAD COMPANIES HAVE SUPERIOR RIGHTS OVER CITIZENS AT CROSSINGS—NO LEGAL RESTRICTION AS TO RATE OF SPEED AT CROSSINGS.

The late case of Warner *vs.* The New York Central Railroad Company, (44 N. Y., 465,) was an action to recover damages for an injury sustained by the plaintiff in November, 1863, from an alleged collision of the cars of the defendants with the plaintiff's carriage. The plaintiff and his son were driving in a single wagon, on a highway approaching the City of Rochester from the West. The highway crossed the railroad about two miles west of the city, and in passing over the railroad crossing at that point, the plaintiff alleges that his carriage was struck by the cars, overturned and himself severely injured.

The jury rendered a verdict for $5,000 for the plaintiff, which was affirmed by the General Term.

The following is the opinion of the Court delivered by—

LEONARD, C.—The judge, in the course of his charge, made the following observations, viz: "The defendants have a right to construct a railroad to run through the country and to cross all highways that intervene along the course of their track; they have nothing more than a right to cross the highways; they do not own them, they belong to the public. Every man has a common right with all others, to pass along the highway, and the railroad has no more right in crossing the highway than a person has, in passing along the highway. In crossing the highways, the railroad has the same rights that citizens have in crossing two roads that cross each other in right angles. They are bound to exercise care and prudence in crossing, and neither has superior rights." The defendants' counsel asked the court to charge that a railroad has a right to cross the highways at such speed as it deems proper, so far as the public are concerned, and that there is no negligence to be inferred from the rate of speed at which the trains are run across the country. The court charged, that they may run at such rate of speed as they may think proper, subject to liability to respond for damages they may cause, when not restrained by municipal laws. Ordinarily they are governed as to speed only by the consideration of prudence.

The defendants' counsel said: it is not a fact that bears on the question of negligence, and negligence is not imputable from it.

The court then charged: they unquestionably have a right to run at such rate of speed as they please, outside the city limits, and when no municipal law interferes, but if they do damage by their extreme speed they are subject to respond for it, they are bound to exercise such care and prudence as will guard against injury to persons on the highway. The defendants' excepted to the refusal to charge as requested, and to charge as given.

The defendants' counsel then requested the court to charge his proposition in a more simple form, that the railroad had a right to cross the highways at such rate of speed as they chose, of hich the public are bound to take notice.

The court charged as requested, subject to the same qualification and added: no doubt the pub lic must take notice of the right of the railroad company to run trains at a high rate of speed.

It is difficult to say what idea was finally left on the minds of the jury, from the observations of the court, taking together the charge and the responses to the requests made by the defendants' counsel.

The charge conveyed the opinion that a high rate of speed at the crossing was a fault of the railroad, which would subject them to responsibility for such damages as they should occasion to the citizen who might be injured at the crossing. The court responding to the request of counsel, conceded the right to run at such a rate of speed as the railroad thought proper, when not restrained by municipal law, and again added, if they do damage by their extreme speed they must respond for it. And on the renewal of the request, repeated the same instructions with the like qualifications. The instructions requested were exceedingly important to the defendants' case.

The evidence was conflicting as to the ringing of the bell and the blowing of the steam whistle as the train approached the crossing. There were acts of prudence required by law to be observed, and more than usually necessary when the train was run at a high rate of speed. The statute prescribes that a sign shall be posted at the crossing, calling attention to the fact that it is a railroad crossing, and that the bell shall be rung for a certain distance before the train reaches it. The defendants were alleged to be negligent as to the precaution of ringing the bell as required by law. The rate of speed increased the danger and the negligence, in case any precaution was omitted.

If the whistle was blown and the bell rung the engineer in charge might reasonably assume that the plaintiff, who was in sight, approaching the crossing on the public highway on a line diverging from the rail track but a few yards, for a distance of several hundred feet, would be notified of the danger and stop in season to avoid it. There was no want of humanity or care, on the part of the engineer, in continuing the high rate of speed at which the train was running, after he saw the plaintiff on the highway, if he gave the proper signals. The law places no restrictions upon the rate of speed at which the trains may run across the country, at the crossings of the highways or elsewhere; nor is the train required to stop or reduce the speed at such places. Nor does the law subject the railroad company to liability for damages occurring from the rate of speed, if the signals required by law are observed. It is true that municipal corporations may regulate the rate of speed within their corporate limits; but that fact had no relation to this case, as the accident appears to have occurred at some distance from any city. The qualification suggested was inappropriate to the occasion. It has been held in numerous cases, that the traveler must look out for the trains at the crossings, before driving on to the rail track, and if one is seen to be approaching, it is his duty to wait until it has passed (Ernst *vs.* The Hudson R. R. R. Co. 39 N. Y. 66.

The citizen must yield to right of way at the crossings. The traveler who should drive his carriage on to the track when he saw the approach of a train would bring the injury on himself, if a collision occurred, and would have no just claim for the recovery of damages. A train of cars running at a high rate of speed as it appears was done in this instance, can not be stopped until it runs several hundred feet after the signal to stop has been given. It would be impracticable to require them to stop when the citizen intending to pass was nearer to the crossing than the train, or for any other reason. The object of the signals is to notify the traveler, so that he can look out for his safety, and allow the train to pass the crossing before he exposes himself to danger by a possible collision. If the traveler prefers to pass the crossing when the train is approaching, he does it at his own risk, and it is not true that the railroad company is subject to the damages which may be occasioned by the rate of speed, or by refusing to stop and yield the right of way to the private citizen where the company have carefully observed the requirements of the law as to signals.

The instructions asked for were correct in principle and the defendent was entitled to have the law so declared.

The qualification, as to the liability of the company, for damages occasioned by the rate of speed at which they run their trains, was incorrect, and the reference to city limits and the municipal law was inappropriate. The idea, or principle of law, as presented by the request of counsel, was changed and confused by the qualifications of the Court. It is impossible to determine that no injury was occasioned by the refusal to give the instructions demanded, without any qualification. The conduct of the defendents' as presented by the charge, was highhanded and lawless. It improperly carried the suggestion that the company claimed to own the highway at the crossing, and that the public, and the plaintiff, had been illegally deprived of the enjoyment of the rights secured by law.

I am satisfied that an error was committed in this respect, and that the exception was well taken.

The judge also instructed the jury, that the plaintiff will be presumed to be free from fault, if nothing else appears in the case, because it cannot be supposed that a man would bring an injury upon himself. There is no presumption of negligence against either party. It is the duty of the plaintiff to prove, and the right of the defendant, who is charged with negligence causing an injury, that he should prove by satisfactory evidence, that he did not contribute to the injury by any negligence on his own part. This proof, in some form, constitutes a part of the plaintiff's case herein. It must appear, either from the circumstances of the case, or from evidence directly establishing the fact, to the satisfaction of the court and jury, that the plaintiff is free from any fault contributing to the injury.

It may be assumed that the plaintiff, or the party injured, is anxious for his own safety; but it cannot be presumed that the plaintiff is free from fault, if nothing else appears in the case, for the reason that some evidence is required to overcome such presumption, and the plaintiff would be thereby relieved from proving, either by direct evidence or the surrounding circumstances that he is not in any fault. (Johnson *vs.* H. R. R. R. Co. 20 N. Y. 65).

The circumstances may show without other evidence, that there was no contributing negligence

on the part of the injured party ; but that is not a mere presumption.

The evidence was conflicting in this case, as to the exercise of proper care on the part of the plaintiff, arising in part from the circumstances under which the accident occurred, as well as from the direct testimony of witnesses. The instruction was wholly without warrant or application to the facts of this case, and was duly excepted to by the counsel for the defendants.

The court admitted evidence on the part of the plaintiff, proving that the flagman employed by the defendants at this crossing where this accident occurred, had been intoxicated on several occasion previous to the happening of this injury, and that his intemperate habits were known to the officers of the railroad company. In my opinion this was an error, tending to inflame and mislead the jury.

The flagman was proven to have omitted to give the usual signal when a train was approaching, and to have been intoxicated when he ought to have performed that duty on this occasion. The facts necessary to determine the question of negligence arising from the conduct of the flagman at the time when this accident occurred, were before the jury. Had he exhibited the customary signals, no negligence could have been predicated upon his intoxication. His previous habits of intemperance had nothing to do with the case. If the signal was omitted, the negligence was the same, whether the flagman was drunk or sober. His neglect on a former occasion, or his former intemperate habits, would not be sufficient to create negligence, or be any evidence of it, when this accident happened.

The evidence objected to tended, like the suggestion that the railroad company did not own the highway, to create a prejudice in the mind of the jury, and invite punitive damages, not directly arising from the occurrence.

The judgment should be reversed, and a new trial ordered.

Judgment reversed.

Railroads of Wisconsin.

EXTRACT FROM THE MESSAGE OF THE GOVERNOR.

Among the causes which have led to the rapid development of the materal interests of the State, railroads may be regarded as the most important, and the past year has witnessed the construction of a greater number of miles of railway than any previous year.

The completion of the Western Wisconsin Railroad to Hudson has opened out a region of country greatly in need of such a line of communication, and the large and increasing business that it is transacting, shows that its construction was not in advance of the business by which it is to be supported.

The Central Wisconsin, which has built and placed in operation sixty-six miles this season, from Menasha to Steven's Point, is rapidly pushing forward to Bayfield on Lake Superior, which point, it is expected, will be reached during the present year, and will open up a vast country to settlement, which hitherto has echoed only to the sound of the lumberman's axe or the rifle of the huntsman, while the Northwestern Railroad has pushed with energy its northern extension from Green Bay until it has reached the Menominee river, and in a few months will be in connection with Lake Superior ; and its northwestern extension now completed to Reedsburg, it is expected will reach the Mississippi river at La Crosse within twelve months. The Milwaukee and Northern Railroad passing through a rich and populous country, and one greatly in need of such facilities, will soon be in connection with Fond du Lac and Menasha.

Oshkosh has joined hands with Ripon, and Fond du Lac will soon do so. Green Bay is rapidly constructing a line to the Mississippi, while the Madison and Portage is being extended up the valley of the Wisconsin to Grand Rapids and Stevens Point.

The rapid and easy transit of passengers and freight by rail has given that mode of conveyance the preference over all other systems, and so strongly impressed is every community with this fact, that they are often induced to grant aid, to secure near at hand, this most desirable method of transportation, greatly in disproportion to their ability to pay, and greatly in excess of the advantages to be obtained.

On the first day of January, 1871, there were in operation within the limits of the State 1,238 miles of railway, and on the first day of January, 1872, 1,588 miles, representing a cost either actual or fictitious of nearly one hundred millions of dollars This vast concentration of capital in one interest alone affects every other interest in the State, and it may with truth be said, that there is no branch of industry within the State that is not dependant upon railway facilities, and which unfriendly action on the part of railway managers may not at any time crush out.

The railway interests of the State have grown to their present proportions without any general system and with little responsibility to the people of the State, and the opinion among railway managers seems generally to prevail that their will is the supreme law. This is an error which ought to be corrected.

Railroads are public corporations and as such are authorized to take private property on making just compensation, a right which can only be given where property is taken for public use.

If then, railroads are public highways, the public are entitled to the fullest benefits to be derived therefrom, after allowing the stockholders a reasonable dividend on their capital invested, and to secure both parties in the full enjoyment of their just rights, the most adequate protection should be given. I do not regard the railway management of this State as less fair or liberal than that of other States. Trains are run with regularity and safety, and the traveling public has been well accommodated so far as their physical comfort and safety is concerned.

Nevertheless, there are complaints of unjust discrimination in particular localities for which, it is claimed, there is no redress, and the rates of transportation generally are unnecessarily high. I pass no judgment on these complaints, as I have no such personal knowedge as to enable me to do so ; but this interest has become so important and is so vital to the prosperity of the whole State, that I recommend the organization of a board of railroad commissioners, with power to inquire into all complaints and abuses, and to exercise a general supervision over the operating of the several railroads within the State, and to recommend such legislation as may seem to them expedient, and report annually to the Governor.

Fortunately our constitution gives to the Legislature absolute control over this whole question, and I hope there will be no hesitation in applying an adequate remedy to every just cause of complaint.

The practice of giving bonuses in aid of the construction of railways is not to be condemned where the communities confine themselves within reasonable limits, and the bonus is not disproportioned to the benefits to be derived ; but there has been a degree of recklessness in this regard that has brought great distress on many localities.

After the explosion of the farm mortgage system, which brought hundreds of farmers to bankruptcy and ruin, the next device was to induce the towns, counties and cities to loan their credit in aid of various railroads. Towns that were the most promising of any in the State, in an evil hour were persuaded to loan their credit far beyond their fair ability, to aid in the construction of railways, in the expectation, that the benefits would add so largely to their business and prosperity, that they could easily pay the debt created for that object. In almost every instance disappointment has been the result, and instead of the great advantages predicted, they find themselves buried beneath almost hopeless debt, and their prosperity greatly impaired or destroyed.

With the many examples of this kind which the State affords—first, in the ruined farm mortgagors, and next, in the embarrassed and prostrate towns—it was reasonable to expect that the people would be more cautious about involving themselves in debt beyond their reasonable ability to pay. But such appears not to be the fact, and as near as I can learn there has been as much recklessness as ever during the past year in voting such bounties. The disposition to create debts for future generations to pay, appears to be universal.

While there may be no great objection to any community taxing itself each year to a limited amount in aid of such public improvements as the majority may deem necessary for the public welfare—to saddle posterity with heavy debts for doubtful benefits, can only result in repudiation and disgrace. As a temporary measure of safety, I recommend the passage of a law prohibiting any town, county or city from creating any debt in aid of any railroad or public improvement, in excess of five per cent. of the assessed value of the property of such town, county or city, and that an amendment to the constitution to the same effect, be submitted to the people at the earliest possible moment.

The renewal of the St. Croix and Lake Superior Land Grant is greatly desired by the people in the northwest part of the State. Having made their settlements in the expectation that this road would be built, and purchased their lands at double government price, it is but just that the grant should be renewed by the State ; and to secure that end, it is recommended that you ask Congress to take such action as is due to the State and the people most directly interested. The care of the lands within the limits of this grant, was intrusted by the Secretary of the Interior and my predecessor, to General Samuel Harriman, who was authorized to act both for the State and General Government. His report shows that there was in the State Treasury on the first day of October, 1871, to the credit of the St. Croix and Lake Superior Railroad Land Trespass Fund, a balance of $35,629 86, and that suits are now pending against responsible parties to recover about $75,000 more.

☞ The Treasurer of the Grand Rapids and Bay City Railroad Company reports that a capital stock of $107,700 has been subscribed, and five per cent paid thereon. The expenses thus far have been $1,527, and the balance of cash on hand is $3,457. He also reports the work progressing—the contract for the greater part of the line having been given out.

☞ The bonded debt of the State of Michigan is reported by the Auditor General to have been at the close of the fiscal year, September 30, 1871, $2,355,295 78, having been reduced during the year $36,735 71. Among the outstanding bonds is one war loan bond of the denomination of fifty dollars.

☞ The officers of the Granite Railway Company, recently elected, are: President, John S. Tyler ; Vice-President, John C. Pratt ; Treasurer and Clerk, George Lewis; Agent, Oliver E. Sheldon.

☞ The Carthage, Watertown and Sackett's Harbor Railroad has been leased by the Utica and Black River road, and in a few days train will be run over the latter road direct to Watertown without change of cars.

RAILROADS OF MASSACHUSETTS.

A tabular statement of the Railroads of the State, their Capital and Cost, Earnings and Expenses, Dividends, &c., for the year ending September 30 1871.

[Prepared from the Third Annual Report of the Board of Railroad Commissioners.

Railroads in Iowa.

The Governor of Iowa, in his annual message to the State Legislature, reports the completion of the entire line of railroad from Dubuque to Sioux City, and of its Tete des Morts Branch, as well as the construction of the McGregor and Missouri River Railway to Algona, and the Des Moines Valley Road to Fort Dodge. In addition to these land grant roads, the Burlington, Cedar Rapids and Minnesota Railroad is now in operation from Burlington to Nora Springs, in Floyd county. The Central Railroad of Iowa has been extended on the south to Alba and on the north to Northwood, Worth county. The St. Louis and Cedar Rapids Railroad is completed to Ottumwa, and is operated by the North Missouri Railroad Company, making a direct route from that city to St. Louis. The Burlington and Southwestern Company have built a line from Fort Madison to Bloomfield, connecting at the former place with Burlington, and at the latter with Moulton. The Chicago, Rock Island and Pacific Company has extended its road from Washington, through the counties of Jefferson, Wapello, Appanoose and Wayne, into the State of Missouri, and through that State to Leavenworth, Kansas.

The Burlington and Missouri River Railroad Company has built a branch from Red Oak Junction, in Montgomery county, to Hamburg, in Fremont county, a distance of thirty-nine miles. The Davenport and St. Paul Railroad has been built from the first named city to Maquoketa, in Jackson county, a distance of forty-three miles, and to Wyoming, in Jones county, a distance of fifty three miles. The Iowa Midland Railroad is in operation from Clinton, *via* Maquoketa, to Anamoss, and the Sabula, Ackley and Dakota Railroad is built from the former place, through Jackson and Clinton counties, to Oxford Mills, in Jones county, a distance of some fifty miles.

On the 31st of December, 1868, there were 1,488 miles of railroad in the State, and on the 31st of December, 1870, there were 2,783 miles, an increase of 1,335 miles in two years. There are now 3,000 miles of railroad in operation in the State. According to the estimates of the Treasurer of State, the value of the property now in railroads may be put at rather more than $80,000,000, or about one-eleventh of the entire value of all the property in the State.

Philadelphia Car Works.

J. G. BRILL & SON,

CAMP'S IMPROVED DUMPING CAR.

RIGHTS FOR SALE BY

A. W. RHOADS & CO.,

Wilkes-Barre, Pa.

A. W. RHOADS, N. H. CAMP.

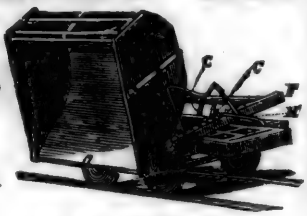

Fig. No. 1, Car Loaded & at Rest. **TO DUMP THE CAR.** Fig. No. 2, Car Dumped.

The Brakeman seizes the lever H, and raises it about a foot, thus releasing the hopper from the catch, C, and the tilting-frame, F, from the catch, C, when the hopper, K, yields to the force of gravity and rolls over to the position shown in Fig. 2.

To Replace the Hopper in Readiness for another Load.

The brakeman bears his weight on the up-end of the tilting-frame, F, forcing it down to its place, when the hopper rolls back to *its* place, where it is held by the catches, C and C.

Address, A. W. RHOADS & CO., Wilkes-Barre, Pa. Lock Box 131.

PACIFIC MAIL Steamship Company's

LINE TO

California, Japan and China.

VIA PANAMA,
CARRYING MAILS, PASSENGERS AND FREIGHT TO
KINGSTON, JAMAICA, SANTA MARTHA AND GREYTOWN, AND PACIFIC COAST OF MEXICO, CENTRAL AMERICA, PERU, AND CHILI.

Steamers leave 15th and 30th each month, except when those days fall on Sunday, then the day previous.

Jan. 30, steamer HENRY CHAUNCEY, Capt A. G. Gray, will leave Pier No. 42, North River, at 12 o'clock noon, for Aspinwall, and connecting at Panama with steamer ALASKA, Capt. Maury, also connecting for all Central American and South Pacific ports.

Freight for last-named ports received until 4 P. M. of Jan. 27.

Steamer CHINA will leave San Francisco, Feb. 1, 1872, for Japan and China.

For rates of passage, freight and all further information, apply at the Company's office on the pier, foot of Canal street.

F. R. BABY, Agent.

EDWARD W. SERRELL,

CIVIL ENGINEER,

78 & 80 BROADWAY,

NEW YORK CITY.

Railroads, Bridges, Explorations.

☞ Particular attention given to the Examination of Public Works for Capitalists seeking Investments.

TRAUTWINE'S CIVIL ENGINEER'S POCKET-BOOK.

THE CIVIL ENGINEER'S POCKET-BOOK OF MENSURATION, TRIGONOMETRY, SURVEYING, HYDRAULICS, HYDROSTATICS, INSTRUMENTS AND THEIR ADJUSTMENTS, STRENGTH OF MATERIALS, MASONRY, PRINCIPLES OF WOODEN AND IRON ROOF AND BRIDGE TRUSSES, STONE BRIDGES AND CULVERTS, TRESTLES, PILLARS, SUSPENSION BRIDGES, DAMS, RAILROADS, TURNOUTS, TURNING-PLATFORMS, WATER STATIONS, COST OF EARTHWORK, FOUNDATIONS, RETAINING WALLS, etc., etc. In addition to which the elucidation of certain important principles of construction is made in a more simple manner than heretofore. By John C. Trautwine, Civil Engineer, 648 pages, with nearly one thousand illustrations, executed expressly for the work; forming, altogether, the most complete and concise work of the kind ever published.

The well-known ability of the Author, and his wide-spread reputation as a Civil Engineer, is a sufficient guarantee of the completeness of the work, and renders further recommendation unnecessary.

Bound in Morocco, Tucks, Gilt Edges. Price, $5.

☞ For sale by Booksellers generally.

The Chesapeake and Ohio Railroad and Virginia Bonds.

The Richmond (Va.) *Inquirer*, of the 26th ult., publishes a letter from New York, in which it was charged that the Chesapeake and Ohio Railroad had participated in a movement to depress Virginia bonds in order to purchase Virginia Central stock cheap. Referring to this, John B. Baldwin, Esq., of Staunton, of counsel to the company, communicates to the above paper extracts from private letters to himself from President Huntington, of that road, and James H. Storrs, Esq., of New York, counsel of the company. Mr. Huntington says:

"Your State is making a fearful mistake in refusing to pay the interest on her indebtedness. I cannot understand how a State with the glorious record of Old Virginia can repudiate her debt when there is so much to be gained by promptly meeting all her obligations and so little as an offset for the disgrace of repudiation. And certainly if the State continues in the course upon which she has now entered, her industrial interests will be put back and a burden assumed far heavier than that imposed by the late war.—I hold none of the securities of your State and can, therefore, speak the more freely upon the subject, with no other motive than an earnest desire for her prosperity."

Mr. Storrs says: "The repeal of the funding bill will ever withdraw the recognition of so much of her obligations to the disappointment and sorrow of many in this community, who have held on to their belief in the fidelity of Old Virginia, and are still unwilling to let go their hold. They know that she has been tried with a sore trial, such as almost no other State has experienced, but they have confidently believed that she would come out of it like gold purified by fire."

Mr. Baldwin adds: "These passages, occurring in letters not intended for the public, represent truly the sentiments of those who in New York have charge of the business of the Chesapeake and Ohio Railroad Company," and he also says that he makes the letters public without advising the writers.

BANKING HOUSE
—OF—
JAY COOKE & CO.

The LARGE and CONTINUOUS SALES OF NORTHERN PACIFIC 7-30 GOLD BONDS IN THIS COUNTRY AND EUROPE, where they have a RECOGNIZED STANDING ON ALL THE BOURSES guarantee the EARLY COMPLETION OF THE ENTIRE LINE OF ROAD.

The popularity of the Bonds is due to the fact that they are based upon the amplest security, being a FIRST AND ONLY mortgage upon the road, and in addition upon over FIFTY MILLION acres of land, susceptible of producing in abundance all the fruits, vegetables, and cereals of the Eastern or Middle States.

The Bonds are exempt from United States tax, have THIRTY YEARS to run, are offered at par and interest in Currency, and will permanently yield a large interest income in Gold.

All marketable securities received in exchange.

Full particulars furnished by

JAY COOKE & CO.,

New York, Philadelphia and Washington.

The Want of More Trans-Continental Roads.

Another heavy snow storm is reported in the far West, blockading again the Pacific Railway trains on both sides of the Rocky Mountains. Very well; they must take it as it comes. But this Winter's experience on the Central Pacific route will be apt to hurry up the Northern Pacific Road, along which, from the depression of the Rocky Mountains in that quarter, and in consequence of the warm winds from the Pacific, there is a comparatively light snow fall; and it will be apt to hurry up the Southern Pacific Road, which turns the flank of the Rocky Mountains and the Sierra Nevada, and along which there is never any obstruction from snow. And the fact is, we want all three of these Pacific Roads; and when they are all in operation the way and the through traffic will give work enough for all, and they will assist, rather than injure, each other in building up all the country between the lines.—*New York Herald.*

Baltimore and Ohio Railroad.

The following is a comparative statement of the earnings and working expenses of the Main Stem of the Baltimore and Ohio Railroad for the years ending September 30, 1870 and 1871—including the Winchester and Potomac and Washington County Branches for 1870 and 1871, and the Winchester and Strasburg Branch from July 1, 1870:

Earnings:	1870	1871.
From passengers	$1,477,892 64	$1,460,699 71
" tonnage	6,950,335 52	8,452,690 78
Total	$8,427,728 16	$9,913,390 49
Working expenses:		
Transportation exp.	$1,610,962 21	$1,776,458 46
General expenses	74,800 47	70,352 74
Losses by accidents	66,514 59	30,190 09
Repairs of railway	1,548,695 11	1,928,776 53
" locomotives	550,086 36	580,736 98
" burden cars	312,498 61	326,764 21
" pass. cars	122,833 90	166,822 99
" stationary machinery	132 257 68	146 022 24
" depots	264,057 10	127,011 53
" water stations	45,015 88	30,846 64
" bridges	221 349 97	199,027 55
" telegraph	6,359 82	10,918 74
Fuel, preparing, etc.	317,802 11	320,893 25
Cleaning engines and cars	89,903 12	96,912 60
Pumping water	20,121 18	25,837 34
Watching cuts, tunnels and bridges	62,578 60	63,232 40
Contingent expenses of machinery department	7,623 29	7,083 39
Total	$5,453,460 00	$5,906,887 68
Net earnings	$2,974,268 16	$4,006,502 81

The ratio of expenses to earnings was in 1870,

64.7, and in 1871, 59.58, showing a decrease of 5.12 per cent.

It is shown that the earnings, in comparison with the fiscal year 1870, have increased $1,485,662 33, and the working expenses $453,427 68, making a comparative increase in the net profits of $1,032,234 65. Compared with the fiscal year 1869, the increase of earnings being $1,188,474 75, and of working expenses $150,781 22; the increase of net profits amounts to $1,037,693 53.

During the fiscal year, the sinking fund for the redemption of the city loan increased to $1,354,316 67, showing a gain of $76,937 58.

Under the action of the sinking fund for the redemption of the £800,000 sterling loan, £17,200 of those bonds were purchased in London and cancelled, thus, at $4 84 per pound sterling, reducing that debt $83,248.

A dividend of 4 per cent. upon the capital stock was paid on the 31st October, 1870, and a similar dividend on the 1st May, 1871. The United States tax thereon was also paid by the Company.

The liabilities of the company, compared with the statement of September 30th 1870, have increased as follows:

Preferred stock, second series, 6 per cent., $131,400.

The profit and loss account shows an increase for the past year of $1,871,681 60, after deducting $500,000 for estimated losses on steamships.

It will be remembered that, at the close of the war, it was the conviction of the Board that, if proper enterprise were exhibited, a vast increase of trade could be attracted to Baltimore. It was deemed necessary not only to extend our lines of railway, in order to command the transportation of the supplies and productions of our great Western and Southern interior, but also to furnish the most modern and improved facilities for ocean commerce. The establishment of a line of steamships between Baltimore and Liverpool was regarded as necessary to attract the attention of the West and South, and of European capitalists, to the advantages of this port as a great and economical entrepot. Acting in accordance with these views, on July 14th, 1865, the Baltimore and Ohio Company purchased from the Government of the United States four steamships, to which, in honor of the respective counties of the State of Maryland, the names were given of "Allegany," "Carroll," "Somerset," and "Worcester." These steamships were strengthened and improved at large cost, and were promptly placed in the service, and made fifty-eight successful voyages between Baltimore and Liverpool.

It was soon demonstrated that their tonnage was too limited for the heavy trade that was rapidly created, and that their carrying capacity was too small to make remunerative results. The enterprise, however, accomplished the important designs of its founders, and became the nucleus of the successful lines of large and splendid steamships now constantly leaving our wharves for Liverpool, Southampton and Bremen.

The losses proved to be large in inaugurating this grand source of prosperity for Baltimore and the vast regions which participate in the advantages which have been secured. Yet, in view of the magnificent results accomplished by what seemed to many, when originated, a hazardous experiment, and the colossal growth of the traffic of the Baltimore and Ohio Road, partly arising from this enterprise, the Board deem their action a subject of congratulation.

It will be seen by the profit and loss account that the surplus fund which represents capital derived from earnings invested in the various branch and connecting roads, and the great improvements which have been continuously constructed on the main line, and which is not represented by stock or bonds, now amounts to $23,246,732 33.

It is shown by the report of the Transportation Department that 1,077,649 barrels of flour were brought to Baltimore during the fiscal year, being an increase of 137,259 barrels.

A large expansion of tonnage of through merchandise, East and West, is also shown, viz: from 286,835 tons in the preceding year to 435,207 tons.

The traffic in live stock and lumber has also largely increased.

The coal trade exhibits a most gratifying increase, viz: from 1,219,638 tons in 1870, to 1,591,602 in 1871, exclusive of 326,880 tons for the company's supply.

The policy adopted for the development of this trade has accomplished the important results anticipated. It was determined to establish and maintain low and uniform rates, so that consumers could rely upon their supplies being furnished throughout the year at prices which would not be affected by changes in the charge for transportation.

The tariff of the Baltimore and Ohio Road, for coal, has continued, summer and winter, without alteration, since March 16th, 1868. During this period the prices of anthracite coals have varied largely, caused by strikes in the mining regions of Pennsylvania and frequent changes in the charges for transportation. The Baltimore and Ohio Company refused all propositions for combinations to obtain advanced rates.

In view of the excellent quality of the semi-bituminous coals of the Alleghany regions, and the confidence established by the Baltimore and Ohio Company through a steady adherence to its policy, large consumers in New England, New York and elsewhere, have been enabled to secure their supplies at satisfactory prices, and have gradually substituted these coals for the other descriptions formerly used.

Two hundred iron hoppers, each of ten tons' capacity, have been built for the coal traffic during the past year.

As it is believed this important trade can be continuously enlarged, additional equipment will be constructed in order to meet the largest requirements of the manufacturing, steamship, and other interests.

Statement of profit and loss for the years ending September 30:

	1870.	1871.
Balance from previous year	$20,861,676 01	$21,375,050 73

WASHINGTON BRANCH.

Statement of earnings and expenses for the years ending September 30:

Earnings:	1870.	1871.
Passengers	$303,724 10	$329,823 79
Tonnage	78,090 86	97,755 63
Total	$381,814 46	$427,579 42

Expenses:		
Repairs of road	$170,518 64	$126,296 96
" depots	9,396 11	12,878 96
" water stations	2,138 28	5,116 44
" bridges	15,036 71	15,067 01
Pumping water	2,038 45	4,051 68
Total	$199,128 19	$163,411 05
Net earnings	$182,686 27	$264,168 37

The earnings of 1871 show an increase as compared with those of the previous year of $45,764 96; the expenditures charged are $35,717 14 less—showing an increased gain of $81,482 10.

A dividend of five per cent. was paid on the 16th of October, 1870, and a similar dividend on the 17th of April 1871.

During the year 969 tons of steel were substituted for iron rails. Number of cross-ties used, 38,938.

Statement of profit and loss for the years ending September 30:

	1870.	1871.
Balance from prev. yr.	$357,660 64	$355,984 16

PARKERSBURG BRANCH RAILROAD.

The following is a comparative statement of the earnings and expenses for the years ending September 30:

Earnings:	1870.	1871.
Passengers	$119,303 04	$150 022 58
Tonnage	442,581 95	583,072 76
Total	$561,884 99	$733,095 34
Expenses:		
Transportation	$130,729 25	$148 979 28
Repairs of road	375,667 12	368 349 92
" water stations	4,415 51	6 070 21
" telegraph	1,090 87	1,179 89
" stationary machinery	2 756 28	2,989 98
" locomotives	52 169 19	47,758 81
" burden cars	15 177 14	17,622 28
" passenger cars	5,439 05	4,484 81
" bridges	8 065 95	17,087 63
" depots	12,942 33	17,334 31
Pumping water	2,884 41	3,296 80
Losses by accidents, etc.	1,228 33	5,593 50
Fuel, preparing, etc.	36,075 25	29,789 15
General expenses	2,891 71	2,569 62
Cleaning engines & cars	2,948 85	7,949 65
Contingent expenses	29 61	22 16
Taxes	3,274 56	40,210 03
Total	$661,780 41	$721,283 03
Deficit	$99,895 42	.....
Net earnings	.....	$11,807 31

It will be seen that the earnings were $171,210 35 more than in 1870, while the expenses increased $59,507 62—showing an improved result compared with that year, of $111,702 73.

The aggregate earnings of the Main Stem, including the Winchester and Potomac and Washington County Branches, (and the Winchester and Strasburg Branch from July 1, 1870,) and of the Washington Branch and Parkersburg Branch, for the years ending September 30, 1870 and 1871, were as follows:

	1870.	1871.
Main Stem	$8,427,728 16	$9,913,390 49
Washington Branch	381,814 46	427,579 42
Parkersburg Branch	561,884 99	733,095 34
Totals	$9,371,427 61	$11,074,065 25

The aggregate expenses of operating and repairs were as follows:

	1870.	1871.
Main Stem	$5,453 460 00	$5,906,887 68
Washington Branch.	199,128 19	163,411 05
Parkersburg Branch.	661,780 41	721,288 03
Totals	$9,314,368 60	$6,791,586 76

And the aggregate net earnings, after deducting the cost of operating and repairs, as follows:

	1870.	1871.
Main Stem	$2,974,268 16	$4,006,502 81
Washington Branch.	182,686 27	264,168 37
Parkersburg Branch.	*99,895 42	11,807 31
Totals	$3,057,059 01	$4,282,478 49

* Deficit.

—showing an increase in the gross earnings of $1,702,637 64; with an increase in expenses of $477,218 16—making the increase in net earnings, $1,225 419 48.

The earnings of the Central Ohio Division for the fiscal year were $946,246 15, the expenses $751,643 31, and the net earnings $194,602 24.

The earnings of the Lake Erie Division for the same time were $513,768 51, the expenses $415,-911 49, and the net earning s$97,857 02.

The earnings of the Wheeling, Pittsburg and Baltimore (formerly Hampfield) Railroad, from May 1, 1871, to September 30, 1871, were $23,-449 51, and the expenses $39,032 99, showing a deficit of $15,583 48.

The gross revenue of the Main Stem and Branches, including the Central Ohio and Lake Erie Divisions, and the Wheeling, Pittsburg and Baltimore Railroad, is thus shown to be $12,557,-529 42, the expenses $7,998.175 15; and the net earnings $4,559,354 27. The aggregate working expenses were 63.69 per cent. of the whole gross revenues.

During the year, 358,046 new cross ties, 10,683 tons of iron, and 7,226 tons of steel rails were used in repairing the tracks of the Main Stem; 38,928 cross ties and 969 tons of steel rail on the Washington Branch; 114,495 cross ties and 3,927 tons of new rails on the Parkersburg Branch; 3,754 tons of new rails on the Central Ohio Division; and 990 tons of new rails on the Lake Erie Division.

At the commencement of the fiscal year 1871 there were in service on the Main Stem and Branches 324 locomotives. During the year 21 first-class 10-wheel freight locomotives were built at the company's shops, of which 10 were furnished to the Pittsburg and Connellsville Railroad; the remaining 11 were added to the equipment of the Main Line, making the total number at the close of the year 335—of these 55 were passenger and 280 freight locomotives; 293 were first-class, 34 second-class and 8 third-class. On the Central Ohio Division there were 31, and on the Lake Erie Division 9—making a total of 375.

The number of cars in service at the commencement of the year was 5,627; to which there were added in 1871, 843—making the total at the close of the year, 6,480; of these 160 were passenger, 31 mail, baggage, etc., 1 post-office, 1 pay, 8 officers', 6 palace, 1 compartment, and 6,272 tonnage, stock, coal and other cars. There were also on the Central Ohio Division 379 cars of all classes, and on the Lake Erie division 229—making a total of 7,088.

The mileage of engines in 1870 and 1871 was as follows:

	1870.	1871.
Main Stem	$6,749,834	$7,871,264
Washington Branch	429,686	449 975
Parkersburg Branch	761,854	836,347
Total	$7,941,374	$9 187,586

The great bridge over the Ohio river, which connects the Parkersburg branch with the Marietta and Cincinnati road, was completed and opened for traffic on the 7th day of January, 1871. The equally superior structure connecting the Main Stem with the Central Ohio Road, at Bellaire, was completed on the 21st day of June, 1871. The cost of these bridges was $2,337,156 80.

A full description of these splendid structures is furnished in the report of the Road Department. Their massive masonry and superior character in every particular insured the excellent results which are daily flowing from their increasing use.

To the Chief Engineer, Mr. James L. Randolph, and to the Master of Road, Mr. John L. Wilson, and their assistants, much credit is due for the perfection of the plans and successful construction of these great works.

The Pittsburgh and Connellsville Road, now known as the Pittsburgh, Washington and Baltimore Railroad, was opened for business in May last. The developments of its trade are large, and demand a rapid increase of plant. The road is being supplied with additional locomotives and cars, and it is believed that the sanguine expectations entertained regarding the results of that important line, will be ultimately realized. Arrangements are progressing for the extension of this road through Pittsburgh to the great Northwest.

It is expected that the construction of the Baltimore, Pittsburgh and Chicago Railroad, fraught as the enterprise will be with such vast advantages to all the extensive and varied interests with which it is to be connected, will be rapidly effected.

The heavy and difficult work upon the Metropolitan Branch Railroad has been vigorously prosecuted.

The expenditures amount to $1,547,565 02. Large forces are engaged, and the construction will be continuously pressed, so that this important and commanding line will be completed, if practicable, in April next.

Investments have been made in original capital, and continuously, for arching the tunnels, perfecting the tracks and works of the Parkersburg Branch Road, and in constructing the bridge for its connection with the Marietta and Cincinnati Railroad, of more than nine millions of dollars.

Much assistance has also been extended to the Marietta and Cincinnati Railroad Company for the improvement of that line.

Large as have been these expenditures, the wisdom of the policy pursued by the Company has been shown not only by a constantly-expanding traffic, and its effect upon the prosperity of the cities of Cincinnati and Baltimore and of the intermediate territory, but the singular directness and importance of the line has commanded the legitimate fruit of securing its practical extension from Cincinnati to Louisville and St. Louis.

On July 23d last, the Ohio and Mississippi Railroad, which, including its Louisville Branch, is 393 miles in length, altered its gauge from six feet to four feet nine inches, to correspond with our line from Baltimore to Cincinnati.

Prior to that period, that important road having the same broad gauge, maintained its chief business by the Atlantic and Great Western and the New York and Erie Roads, with the city of New York.

The superior advantages offered, through the direct and admirable route of the Baltimore and Ohio Railroad to the port of Baltimore, caused the managers of the Ohio and Mississippi Railroad Company to change the guage, obtain the required rolling stock to suit that change, and thus practically assist the merchants of St. Louis and the consumers and producers of the vast regions of which that city is the entrepot, to avail of the great economies of transportation produced by the difference of distance of 272 miles in favor of their route to Baltimore, by the Baltimore and Ohio Railroad, compared with their former connection by the Atlantic and Great Western and the New York and Erie Railroads, to the city of New York.

Commerce of New York.

We give below, from the *New York Journal of Commerce*, a statement of the Commerce of New York for 1871, in comparison with that for the five preceding years. The following is a comparative table showing the relative totals imported at New York in each year since 1850 :

Year.	Dutiable.	Free Goods.	Specie.	Total.
1851.	$119,592,264	$9,719,771	$2,049,543	$131,361,578
1852.	115,336,052	12,105,342	2,408,225	129,849,619
1853.	179,512,412	12,156,387	2,429,083	194,097,652
1854.	163,494,984	15,768,916	2,107,572	181,371,472
1855.	142,900,661	14,103,946	855,631	157,360,238
1856.	193,339,646	17,902,578	1,814,425	213,556,649
1857.	196,279,362	21,440,794	12,898,033	230,618,129
1858.	128,578,256	22,024,691	2,264,120	152,867,067
1859.	213,640,363	28,708,732	2,816,421	245,165 516
1860.	201,401,683	28,006,447	8,852,330	238,260,460
1861.	95,326,459	30,353,918	37,088,413	162,768,790
1862.	149,970,415	23,291,625	1,390,277	174,652,317
1863.	174,521,766	11,567,000	1,525,811	187,614,577
1864.	204,128,236	11,731,902	2 265,622	218,125,760
1865.	212,208,301	10,410,837	2,123,281	224,742,419
1866.	284,033,567	13,001,588	9,578,029	306,613,184
1867.	238,297,955	11,044,181	3,306,339	252 648,475
1868.	232,344,418	11,764,027	7,085,389	251,193,834
1869.	275,779,976	14,789,235	15,788,462	306,357,673
1870.	289,618,878	13.716,500	11,864,644	315,200,022
1871.	349,635,398	28,878,294	6,348,608	384,862,300

In the above table are included, under the head of dutiable, the duty-paying goods entered directly for consumption, as well as those entered for warehousing ; these, with the free goods and specie, make the total entered at the port. All the figures referring to the imports represent only their foreign gold cost, freight and duty unpaid. The specie and bullion landed here, came mostly in transit to foreign ports, and most of it will be found again among the exports.

The following table will show the classification of imports at New York for the years—

	1869.	1870.	1871.
Dry goods	$94,726 417	$109,498,523	$132,480,777
Gen. mdze.	195 842 794	193,836 855	246,032,915
Specie....	15,788,462	11,864,644	6,848,608
Total....	$306,357,673	$315,200 022	$384,862,300

The following is a quarterly statement of the exports from New York to foreign ports, exclusive of specie, for the years named :

Quarter.	1869.	1870.	1871.
1st.....	$36,566 924	$40,776,407	$59,716,950
2d.....	48,705,409	47,514,407	55,344,997
3d.....	54,932,449	46,241,837	58,243,492
4th.....	55,021,124	61,413,082	61,860,798
Total....	$195,226,706	$195,945,733	$234,666,287

Foreign imports entered at New York during the years 1866, 1867, 1868, 1869, 1870 and 1871 :

Railroads in Minnesota.

EXTRACT FROM THE MESSAGE OF THE GOVERNOR.

During the past year there have been 457½ miles of railroad completed and put in operation in this State, as follows:

	Constructed in 1871. Miles.	Previously constructed. Miles.	Length of Line completed. Miles.
St. Paul and Sioux City	0	122	122
Sioux City and St. Paul	56	0	56
Winona and St. Peter	26	139	185
First Division St. Paul and Pacific, (Main Line)	72	135	207
First Division St. Paul and Pacific, (Branch Line)	0	76	76
Hastings and Dakota	20	28	48
St. Paul and Chicago	46½	55	101½
St. Paul, Stillwater and Taylor's Falls	18	0	18
Stillwater and St. Paul	0	13	13
Minneapolis and Duluth	13	0	13
Minneapolis and St. Louis	28	0	28
Lake Superior & Mississippi	0	155	115
Southern Minnesota	0	167½	167½
Milwaukee and St. Paul	0	155	152
Northern Pacific	178	50	228
	457½	1,092½	1 550

The total length of road in operation at the close of 1870 was 1,092½ miles, and the termination of 1871 leaves us a comprehensive railway system extending to an aggregate length of 1,550 miles.

Besides the road ironed in 1871, the grading on the Brainard Branch of the Northern Pacific has been done, and the Sioux City and St. Paul is graded ——— miles beyond the western end of their track, which they propose to complete early this year.

The reports of the various companies to the Railroad Commissioner for the year ending August 31, 1871, give a great many interesting facts and statistics, from which I take the following:

Number of passengers carried during the year	641,711
Average number of miles carried	86½
Average amount received of each	$1 61
Average rate per mile	4 2-5 cents
Total gross earnings for year	$3,430,414 33
Total operating expenses	2 564,435 10
Net earnings (reported)	847,523 04
Total amount paid State Treasurer in lieu of taxes for last fiscal year	56,454 18

The amendment proposed at the last session to the people for their action, which removes from the Legislature the power of ever disturbing the basis on which taxes are levied on the property of the roads, as now fixed by law, has been adopted, and the basis can never be changed unless authorized by the people.

LAND GRANTS TO RAILROADS.

	Total acres deeded to R. R. Co's to close of 1871.	No. acres sold by R. R. Co's to close of 1871.	Per cent sold in 1871.
St. Paul and Pacific	922,411.31	140,835.79	18.6
Winona & St. Peter	365,155.85	31,281.98	8.6
St. Paul and Sioux City	887,864.87	98,541.42	14.0
Southern Minnesota	193,833.00	28,432 54	13.0
Minnesota Central	167,665.34	38,342.75	22.8
Lake Superior and Mississippi	484,934 97	8,178.49	1.6
	3,021,865.34	840 543.07	12.8

☞ The total debt of the state of Florida is given in the Governor's message at $1,811,649 97, of which $747,945 08 is bonded, and the remainder, $563,704 89, is floating.

RAILROAD EARNINGS—MONTHLY.

	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.

American Railroad Journal.

Saturday February, 3, 1872.

Stock Exchange and Money Market.

Money on call has been in more active demand on the basis of 6@7 per cent to the Government houses, and full 7 per cent. as the minimum rate to the Stock Exchange firms. The offerings have been on a less liberal scale, particularly on the part of private lenders, while the wants of speculative borrowers have been seemingly more urgent. In the line of mercantile credit, there has been a fair business reported, the city banks aiding regular customers at the legal rate, and the open market rates for choice to prime grades of short rate paper ranging from 7@9 per cent. per annum. The city banks added nearly 1⅞ millions to their loan and discount average, during the week, while reducing their outstanding circulation slightly. The U.S. Sub-Treasury enlarged its currency balance nearly 1¼ millions. It also made some little gain in its coin reserves. Its currency balance at the close of business on Tuesday was $7,984,258, and its coin reserve, $67,591,315.

The city banks, in their latest return, show an increase of $918,800 of legal tender notes, with a reduction of $2,465,100 of specie, and an increase of $712,700 of deposits; also an increase of $1,848,100 in their loan and discount averages, and a reduction of $82,300 in their item of circulation. The city bank exchanges, last week, averaged $110,373,670, and thus far, this week, 94½ millions daily. The banks now hold $9,225,725 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $25,228,200, against $27,420,445 same time last year. The city bank deposits are now $221,074,200, against $211,105,665 week ending Jan. 28, 1871. The legal tender reserve amounts to $46,338,300, against $49,491 039 same time last year. The circulation now stands at $28,288,900 against $31,848,342 same time last year. The loans are now $280,881,000 against $270,280,370 at this date last year.

The coin reserve of the Treasury department on Tuesday was $105,000,000 including $37,000,000 represented by outstanding coin certificates. The currency reserve was $11,000,000.

The U. S. Sub-Treasury increased its currency balance $1,206,869 and its coin reserve $187,878 as the result of the week's business. The receipts of the office were $4,745,731 in coin, and $3,088,135 in currency; payments, $4,557,853 in coin, and $1,881,266 in currency. The office received $3,215,000 in coin or its equivalent, from customs; and disbursed $1,081,238 of coin interest.

The U. S. Sub-Treasurer retired, last week, $2,927,701 of coin certificates, received for customs.

Government revenues yielded quite satisfactory on a whole, last week. The excises yielded last week about two millions, and thus far since July 1 1871 about 75¼ millions. The customs at the port of New York, last week were $3,128,701; at the outports, equal to about $1,100,000 more, all in coin, or coin certificates.

Under the Treasury financial programme for the month of February, Government will market Gold, during the month, as follows: Thursday, Feb. 18, $1,000,000; Wednesday, 21, $1,000,000. And buy in Five-Twenty bonds as, follows: Thursday, Feb. 1, $1,000,000; 15, $1,000,000; 29, $1,000,000.

There has been a more active movement in Gold, and the price has been quoted decidedly firmer, under the street view of the Treasury financial programme for February, (limiting the Gold sales to two millions, for the month), and the less pacific interpretation of the European advices. The demand has been mainly speculative. The customs call fair; and the export drain, light. The range of the price during the week has been from 109⅛@110 and the closing quotation on Wednesday was 109⅞@110 against 108⅞ the preceding Wednesday. The specie outflow, last week, was $550,029. The Gold Exchange Bank clearances have averaged about 31¼ millions a day during the week.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from July 1, 1871 to Jan. 27, 1872, $55,359,423, against $59,356,283 same time in 1870-1871.

The customs demand for Gold last week, averaged $535,833 a day; thus far, this week, it has averaged $456,000 a day or equal to a weekly aggregate of $2,736,000. The arrivals of

specie from Europe, Havana and other foreign ports last week were $32,512, and since Jan. 1, 1872, $94,052 against $170,558 same time in 1871. The total customs revenue of the Government, in coin, at this port, from July 1, 1871, have been $89,414,005 against $82,052,988 same time in the preceding fiscal year 1870-71.

The export drain of specie was $550,029, last week, against $197,089, same week preceding year. The shipments since July 1, 1871 have been $24,152,469 against $43,393,466 same time in 1870-71.

Foreign Exchange has been in less demand and rather less firmer. Bankers' sixty day bills on London closed on Wednesday at 109@109⅛; sight bills on London, 109⅝@109¾.

The produce exports from this port, week ending with Jan. 30, were to the currency value of $4,500,068.

Government securities have been without notable animation, but values have been fairly supported, on comparatively restricted offerings of the favorite coin bearing issues.

U. S. sixes of 1881 closed here on Wednesday of the current week at 115½@115¾; U. S. Five-Twenties of 1862, (other than the bonds called in) 110⅝@110⅞; U. S. Five-Twenties of 1864 at 110⅝@110¾; U. S. Five-Twenties of 1865, 111¼@111½; U. S. Five-Twenties of 1865 consolidated 110½@110¾; U. S. Five Twenties of 1867, 112⅛@112¼; U. S. Five-Twenties of 1868, 112¼@112½; U. S. Ten-forties at 110½@110¾; U. S. Fives of 1881 (Funding Loan) 110@110¼. Six per cent. currency bonds, 114⅞@115⅛.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Jan. 17.	Jan. 24.	Jan. 31
Consols	92⅞	92⅝	92½
U.S. 5-20's of 1862..	92⅜	92¼	92⅛
U. S. 5-20s, 1865....	93¼	93¼	92¾
" 1867	93⅝	93⅝	92¾
" 10-40s	92¼	92	91

State bonds have been in moderate demand, and at the close, steadier as to price.

Railroad Bonds have been quoted firm as to price, with a good investment inquiry noted for the favorites of both the old and new issues. There has been a fair call for Central Pacific Sixes, at 102⅜@102¼. Chesapeake and Ohio Sixes have been selling freely at 94 per cent. and accrued interest.

The Stock Exchange has passed stringent resolutions designed to check, if possible, all street speculations in stocks on the part of its members, after the closing of the room at 5 o'clock in the afternoon. The resolutions forbid all dealings in Stocks after that hour under a penalty of $50 for each offence; and constitutes all the members of the Exchange a "committee of the whole" to enforce the provision.

Railway and miscellaneous share property has been fairly active, but values have been quite irregular. The later dealings indicated less general animation.

General business has been on a moderate scale, in the line of domestic produce, Wheat, Cotton, Pork, Lard, Spirits Turpentine, Copper and Iron have been quoted firmer. Middling upland cotton closed on Wednesday at 22⅝ cts. per lb. The receipts at all the ports, since Sept. 1, have been 1,872,215 bales, against 2,270,488 bales same time in the preceding year; exports 979,960 bales, against 1,324,195 bales in the previous year; stock at the ports at latest dates, 544,724, bales, against 565,550 bales same date 1870.

At the Live Stock Markets, Beeves have been in good demand at from 9@13½ cts.; Veals quiet at 5@12 cts.; Sheep at 6@8½ cts. Swine, at 5¼@5⅝ cts. per lb., all live weight. The week's receipts were 8,416 Beeves, 828 Veal Calves, 25,261 Sheep and Lambs; and 32,006 Swine.

Foreign goods have been in pretty fair request and about steady as to price. The week's imports of foreign goods reached $9,954,455 including $5,735,456 of dry goods.

Ocean freights have been less active, at about former rates, as a rule, though grain room by Steam was quoted firmer.

At the auction sale of Scranton Coal on Wednesday, 120,000 tons were disposed of at a further reduction in prices, the range having been from $3 30@4 17½, against $3 42½@5 00 in December.

We have been in error respecting the quotation of the Bonds of the Milwaukee and St. Paul Road, Iowa and Dakota Division. These bonds have been held in especial favor, owing to the small mortgage of $8,000 to the mile, and take rank with the old 1st mortgage bonds of the Road now selling at 95.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ BANKING-HOUSE OF

SAUNDERS, HARDENBERGH & KING,

Nos. 112 and 114 Broadway.

February 1, 1872.

ALVIN SAUNDERS, (ex-Governor Nebraska,) President State Bank, Nebraska.

JOHN A. HARDENBERGH.

RICHARD W. KING, member of New York Stock Exchange.

We have formed a copartnership under above style, for the purpose of transacting a general banking business.

Loans negotiated and advances made.

Government, State, City, County and Railroad Bonds, Stocks and Gold bought and sold on commission.

Interest allowed on Deposits, subject to sight drafts.

Collections made in any part of the United States or Canada.

☞ Regular trains are now running to Reedsburg, on the Chicago and Northwestern Railway. A correspondent of the Baraboo *Republic* says grading, bridging and rock cutting is progressing well from Reedsburg to Wonewoc, and it is expected the track will be laid to Saville by the middle of March.

Ashbel Welch, Esq.

Ashbel Welch, Esq., President of the Board of Directors of the United Companies of New Jersey, having been appointed Chief Engineer of the companies and Superintendent of the improvements at Harsimus Cove, has resigned the Presidency, and Col. John G. Stevens, recently Chief Engineer and Superintendent of the Delaware and Raritan Canal, has been elected to succeed him. Though there is very little for a president to do, the works being in the entire control of the Pennsylvania Railroad Company, it is still necessary for the United Companies to preserve a complete organization for the collection of the rental of their works and the declaration of dividends to the stockholders. At a meeting of the Joint Board of Directors, at Trenton, on the 24th ult., when Mr. Welch resigned and Mr. Stevens was elected, the following complimentary resolutions were passed, showing how highly he was appreciated by the Board:

Resolved, That the Joint Board accept the resignation of Ashbel Welch, Esq., General President of the United Companies, to take effect on the first of February, 1872, and that the sincerest thanks of the Joint Board of the United Companies be tendered to Mr. Welch for the earnestness and great ability, integrity and courtesy with which he has at all times performed his duty to these companies. That the Joint Board regret that his acceptance of an honorable position with the Pennsylvania Railroad Company has forced Mr. Welch to decline being a candidate for General President under our future organization.

☞ A dividend of five per cent on the Preferred Stock, and two per cent on the Consolidated Stock, and six months' interest on the Seven Per Cent. Preferred Dividend Scrip of the Morris Canal and Banking Co., will be paid in accordance with the terms of the lease, at the office of the Lehigh Valley Railroad Co., No. 303 Walnut st., Philadelphia, on and after Tuesday Feb. 6, 1872.

☞ The Tredegar Company, owning the great iron works at Richmond, Va., advertise for material for the construction of a mammoth addition to their present railroad car construction shop.—This company now employs 1,300 hands, and the statement is made that they could employ one-third more in the execution of orders now in hand if their facilities would admit.

☞ The State of Connecticut will redeem at the Treasury, Hartford, Feb. 1, $500,000 coupon bonds, of 1881, of $1000 each, numbered 601 to 1100 inclusive, and no interest will be allowed after March 1. These bonds were originally issued July 1, 1861, and made "redeemable at the pleasure of the General Assembly ten years after date."

☞ The Calumet and Hecla Mining Company will pay its usual quarterly dividend of $5 per share February 15, besides giving its stockholders 10,000 shares additional stock (one new to seven old) and pay $5 also on this new stock. This brings the capital to its full amount of 80,000 shares.

☞ The Rutland Railroad Company will pay a dividend of $3 50 per share on the preferred stock, in interest bearing scrip, on and after Feb. 1.

☞ The Allentown Iron Company have declared a dividend of ten per cent payable in Cash on and after the 3d of February.

THE SIX PER CENT. BONDS OF THE CHESAPEAKE AND OHIO RAILROAD COMPANY having still twenty-eight years to run, with interest payable May 1 and Nov. 1, both principal and interest payable in gold coin in the City of New York, are recommended by us for safe and permanent investment for the following reasons, viz:

1. They are thoroughly secured.
2. Like the Central Pacifics they will be widely known, very popular and always marketable.
3. They will be dealt in at all the prominent Stock Exchanges in this country and Europe, and have the advantage of both a home and European market.
4. They should largely advance from the present price of 94 and accrued interest, when all sold by the Company, as Central Pacifics have done.

They are in denominations of $100, $500 and $1,000, Coupon or Registered.

THE CHESAPEAKE AND OHIO being under able and honorable management, partly identical with that of the CENTRAL PACIFIC, there securities should take equal rank in popularity and market value.

For exchange of Five-Twenties or for new investments, we cordially recommend either the Central Pacific or Chesapeake and Ohio Six Per Cent Gold Bonds.

We continue to deal in Government securities, buy and sell investment Stocks and Bonds at the Stock Exchange; open accounts with depositors, upon which we allow interest at the rate of four per cent., make collections in all parts of the country, and transact a general Banking business.

FISK & HATCH.

HARVEY FISK. }
A. S. HATCH. }

ST. JOSEPH AND DENVER CITY RAILROAD COMPANY.

EXECUTIVE OFFICE, No. 31 NASSAU-ST., }
NEW YORK, Feb. 1, 1872. }

The Coupons and registered interest due Feb. 15, 1872, on the First Mortgage Eight per Cent. (8 p. c.) Gold Bonds, (E. D.,) and the Eight per Cent. (8. p. c.) old First Mortgage Sinking Fund Land Grant Bonds (W. D.) of the St. Joseph and Denver City Railroad Company, will be paid at the office of the Farmers' Loan and Trust Company of the City of New York, upon presentation and demand, on and after that date, Free of Tax.

FRANCIS A. COFFIN,
Assistant Treasurer,
St. J. & D. C. R. R. Co

☞ On the 17th ult. the first train passed over the Frederick and Pennsylvania Line railroad to the banks of Double Pipe creek, to which the road is completed, from Littlestown, Pa., a distance of fourteen miles and within half a mile of the Western Maryland railroad, which will be finished in a few weeks. The iron bridge and trestlework over Little Pipe creek will soon be completed, which will be one of the finest structures in the State. They can then push on to Frederick city. When completed, this road will be a feeder to the Western Maryland road.

Journal of Railroad Law.

ORGANIZATION OF COMPANIES IS A CONDITION PRECEDENT TO THE LIABILITY OF OBLIGOR TO PAY HIS STOCK SUBSCRIPTION.

The facts in the recent case of Chance *vs.* The Indianapolis and Westfield Gravel Road Company (32 Ind. 472) are fully and clearly stated in the following opinion by—

GREGORY, C. J.—Suit by the appellee against the appellant, commenced before a Justice of the Peace on a preliminary subscripion of stock to the company. The defendant answered under oath denying every materal allegation in the complaint, including the execution of the instrument sued on. The plaintiff in the complaint avers the due organization of the corporation. Trial by jury; verdict for the plaintiff motion for a new trial over-ruled.

The plantiff, on the trial, failed to prove the organization of the company. This was a fatal omission. It is contended by counsel for the appellee, that this was not put in issue by the pleadings. As we understand the answer, it put in issue every material allegation of the complaint, and was not by the latter clause confined to the mere execution of the instrument sued on.

The Cicero Hygiene Draining Co. *vs.* Chaighead 28 Ind. 274, cited by the appellee seems to sustain the ruling of the court below; the language used in that case is, however, too general, and is somewhat calulated to mislead. The ruling is right when applied to the case then in hand, but is not the law in a case like the one in judgment.

This question was decided adversely to the appellee in Wert *vs.* The Crawfordsville and Alamo Turnpike Co. 19 Ind. 242, upon the authority of which the ruling in Williams *vs.* The Franklin Township Acadinical Association 26 Ind. 310 was made.

Upon a subscription like the one under consideration the organization of the corporation is a condition precedent to the liability of the obligor to pay his stocks.

During the trial, witnesses who had never seen the defendant write, and who were not otherwise acquainted with his handwriting, were permitted to examine his signatures admitted to be genuine, and from a comparison thereof with the signature in question, to give their opinion, as to the genuineness of the latter.

Clark *vs.* Wyatt 15 Ind. 271, is an authority against the ruling of the court below. It was not shown in the case at bar that the witnesses were experts. Had it so appeared, we think the evidence would have been proper. The general rule is not, however, correctly stated in Clark *vs.* Wyatt. While it is true that a witness who is not an expert, must speak from his knowledge of having seen the party write, or from authentic papers derived in the course of business, it is equally true that an expert may give his opinion from mere comparison. This rule is of importance in this age, when there is afloat a vast amount of commercial paper issued by corporations in the different States, circulating freely in all parts of the country. The legislature in this State recognized this in providing that in criminal prosecutions "persons of skill may be called to prove the genuineness of a note, bill, draft or certificate of deposit." (2 G. & H. 411 § 391.)

Experience shows, that the opinions of persons of skill are often more reliable than the judgments of those who speak from knowledge of having seen the party write. After all, both methods are but by comparison. The skill of the one supplies the special knowledge of the other.

Of course, this comparison by experts must be confined to other writings admitted to be genuine. No collateral issue will be permitted. If there is any dispute as to their authenticity the comparison will not be permitted.

Where other writings, admitted to be genuine, are already in the case, the jury may, with or without the aid of experts, make the comparison. But if they are not papers in the case the evidence competent to go to the jury must be that of the witnesses so as to afford the benefit of a cross examination. The jury were permitted over the objection of the defendant, to take with them in their retirement to consider of their verdict, the instrument sued on. This was erroneous.

It is claimed that the court below erred in not instructing the jury in writing. The request so to instruct was not made until after the augument of counsel had been commenced. This was a waiver of the right to have the instructions reduced to writing. This we think, is the result of the rulings in Malady *vs.* McEnary, 30 Ind. 273, and Ollam *vs.* Shaw, 27 Ind. 388. The contrary rule would embarrass the administration of justice.

There was an offer to impeach the general character for truth of one White, a witness for the plaintiff. The witness had resided in Minnesota for two years prior to the time he testified. The impeaching witnesses resided in Hamilton County, in this State, and did not pretend that they were acquainted with the general character of White for truth in the neighborhood where he then resided. The evidence was properly rejected.

Judgment reversed, with costs; cause remanded, with directions to grant a new trial.

Ohio River Bridges.

We give elsewhere an abstract of the Report of the Baltimore and Ohio Railroad Company for the fiscal year ending September 30, 1871. The following description of the bridges over the Ohio River—the one connecting the Parkersburg Branch with the Marietta and Cincinnati Railroad, and the other the Main Stem with the Central Ohio Railroad, at Bellaire—is from the Report of the Master of Road.

The expenditure for labor and material for these bridges on the Ohio River, at Benwood and Parkersburg, amounted at the close of the year to $2,337,156 80.

BENWOOD BRIDGE.

The bridge constructed by the Baltimore and Ohio Railroad Company over the Ohio river, at Benwood, West Virginia, was first opened for the passage of trains on the 21st day of June, 1871. The first stone of Ohio shore Pier No. 1, was laid May 2d, 1868, and from that date to the final opening the work was prosecuted without intermission.

Approaches.—The West Virginia approach is by a line diverging from the Main Stem of the Baltimore and Ohio Railroad, near Benwood Station, and extending with cuts and fills 2,400 feet to the West Virginia abutment. The Ohio approach is by a line diverging from the Central Ohio Division of the Baltimore and Ohio Railroad at the company's stock grounds, and extending by cuts and fills 2,250 feet to the first Ohio abutment. The approach is then continued across the company's grounds and through the city of Bellaire, along First street, by a solid and ornamental arcade work of first-class masonry, extending by 48 arched spans of 33 feet 4 inches each, from centre to centre of piers, a distance of 1,433 feet 4 inches, and of an average height of 45 feet, to the second Ohio abutment in the city of Bellaire.

Masonry.—The masonry consists of solid ashler, and the workmanship is first-class in every respect. The material employed is sand stone, obtained from the Ohio quarries.

The Grafton stone is used for the pier-facing where exposed to the action of the ice. The masonry of the Benwood bridge piers ranges from 40 to 110 feet in height, and of an average height of 77 feet, are fourteen in number, and with the Ohio and West Virginia abutments contains 25,374 cubic yards of masonry; the arcade work contains 14,854 cubic yards; total quantity of masonry, 40,228 cubic yards.

Superstructure.—The spans beginning at the West Virginia abutment are of the following lengths from centre to centre of masonry: Span No. 1, is 121 feet; Nos. 2 and 3, each 106 feet 6 inches; Nos. 4, 5, 6 and 7, each 107 feet 6 inches. These spans, from 1 to 7 inclusive, are deck "Bollman" spans, and were built at the company's shops, Mount Clare. Span No 8 is 211 feet; No. 9, 212 feet; No. 10, 213 feet; No. 11, 348 feet; No. 12, 241 feet 6 inches; No. 13, 210 feet in length. These spans, from 8 to 13 inclusive, constitute the river or waterway spans, and are of a total length of 1,435 feet 6 inches. Spans Nos. 11 and 12 are the channel spans. These spans are of the "Linville and Piper" truss, and were built by the Keystone Bridge Company, of Pittsburg, Pa. Span No. 14, is 107 feet; No. 15, is 105 feet in length. These spans are deck "Bollman," and were built at the company's shops at Mount Clare.

The total length of open work is 2,411 feet 6 inches. The total length of bridge, from end to end of masonry, is 3,916 feet 10 inches.

The total length of bridge and approaches is 8,566 feet 10 inches.

PARKERSBURG BRIDGE.

The bridge constructed by the Baltimore and Ohio Railroad Company over the Ohio River at Parkersburg, West Virginia, was first opened for the passage of trains on the 7th day of January, 1871.

The first stone of River Pier No. 1 was laid on the 9th day of July, 1869, and from that date to the formal opening the work was prosecuted without intermission.

Approaches.—The West Virginia approach is by a line conforming to the street grade through the city of Parkersburg to the West Virginia abutment in Washington street.

The Ohio approach is by a solid and durable embankment beginning at the main bluff and extending across the river valley to the length of 2,676 1/2 feet and to a height of 40 feet at the Ohio abutment, on the west side of Main street, in the village of Belpre.

Masonry.—The masonry consists of solid ashler, and the style of workmanship is first-class in every particular. The material employed for the upper masonry is sand-stone obtained from the Ohio and West Virginia quarries. The foundations of the River Piers and the parts of the piers subject to the pressure and abrasion of the ice are constructed of stone from the Grafton quarries.

The masonry of the Parkersburg Bridge Piers ranges from 10 to 108 feet in height, and an average height, of fifty-four feet, and are forty-five in number, and with the Ohio and West Virginia abutments contain 28,406 cubic yards of masonry, and approach 646 cubic yards. Total amount in bridge and approach 39,052 cubic yards.

Superstructure.—The spans beginning at the West Virginia abutment are of the following lengths from centre to centre of masonry: Nos. 1, 2, 3, 4, 5, 6 and 7 are each 25 feet. Nos. 8, 9, 10 and 11 are each 29 feet 6 inches, and these eleven spans are shad-belly spans, constructed at the

company's shops, Mount Clare. No. 12, crossing Market street, is 65 feet, and is a boiler plate girder span, built by the Keystone Bridge Company. Nos. 13, 14, 15, 16, 17 and 18 are each 59 feet. No. 19, crossing Julian street, is 65 feet. Nos. 20, 21, 22, 23, 24 and 25 are each 59 feet. No. 26, crossing Ann street, is 65 feet. Nos. 27, 28, 29, 30, 31, 32, 33 and 34 are each 100 feet. These, from No. 14 to 34 inclusive, are deck "Bollman" spans, built at company's shops at Mount Clare. No. 35, 209 feet; No. 36, 211 feet; No. 37, 213 feet; No. 38, 349 feet; No. 39, 349 feet, and No. 40, 213 feet in length, constitute the river or water way spans, and are of a total length of 1,544 feet. Nos. 38 and 39 are the main channel spans, and are "through" spans. Nos. 35, 36, 37 and 40 are deck spans. These spans, from Nos. 35 to 40 inclusive, are of the "Linville and Piper" Truss, and were built by the Keystone Bridge Company. Spans Nos. 41, 42, 43,44 and 45 are each 121 feet span. No. 46, crossing Main street, and the span crossing Walnut street, Belpre, are each 126 feet 5 inches in length. These are deck spans built upon the 'Bollman" patent at company's shops, Mount Clare.

The total length of open work is 4,397 feet 10 inches. The total length of bridge is 4,463 feet 10 inches.

The total length of bridge and approaches is 7,140 feet, equal to one mile and 1,860 feet.

Iron in the United States.

As the consumption of iron is held to measure the progress of a people in manufactures, in industry and, to some extent, in civilization also, the statistics of its production and importation have a high social value. The following are, with regard to this country, though not absolutely perfect, the best now attainable.

The aggregate product of Pig iron in this country has increased from less than three fourths of a million tons (of 2,000 lbs. each) in 1854 to nearly or quite two millions of tons in 1871. The returns for the several years are as follows:

Year	Product	Year.	Product.
1854	736,218 tons.	1864	1,135,497 tons.
1855	784,178 "	1865	931,582 "
1856	883,187 "	1866	1,350,943 "
1857	798,157 "	1867	1,461,626 "
1859	840,627 "	1868	1,603,000 "
1860	919,770 "	1869	1,916,641 "
1861	731,544 "	1870	1,900,000 "
1862	787,662 "	1871	2,000,000 "
1863	947,604 "		

Note.—Our civil war doubtless reduced the product of 1861-2. The reduction in 1870 of the duty on imported pig from $9 to $7 per ton has doubtless checked the growth of iron smelting in this country.

Of railroad bars (not steel), the domestic product has grown pretty steadily from 24,315 tons in 1849 to 620,000 tons in 1870, and probably somewhat more in 1871, through the rapid growth of the production of steel rails within the last two or three years may have checked the growth of the iron rail manufacture. Of the iron rails rolled in 1869, the production (in tons) was distributed as follows:

Massachusetts	32,238	Maryland	27,328
Pennsylvania	319,653	Kentucky	7,817
Ohio	41,837	Illinois	53,261
Michigan	6,885	Other States	16,424
Wisconsin	8,680		
New York	79,463	Total	593,586

Of the production of steel rails we have no full statistics, though it is known to be large and very rapidly increasing. It was reported at 8,500 tons in 1868, 12,000 tons in 1869, and 45,000 tons in 1870. We judge that it must have reached 60,000 tons 1871; but this is an estimate merely. No intelligent observer can doubt that steel rails are to supersede iron on all great railroads, and at the turnouts and sidings even of the smaller. Though their first cost is some 50 per cent. greater, they last so much longer than iron that a great economy is secured by the use of steel rails.

Our total production of steel (rails included) is returned as follows:

Year.	Tons.	Year.	Tons.
1865	15,262	1868	30,009
1866	18,973	1869	35,000
1867	19,000	1870	75,000

We hope to learn that the product of 1871 was not less than 100 000 tons. At all events, it has rapidly increased,and is still increasing. Recent inventions and discoveries by our countrymen justify the hope that we shall, within a few years, be able to convert a ton of pig iron into a ton of steel at about the cost of the pig—that is to say, two tons of pig iron will buy a ton of steel of middling quality. The striking improvements in the art of steel making invented by our countrymen within the last five years fully warrant this presumption.

Our importations of iron and steel are made almost exclusively from Great Britain; and these, too, have been steadily enlarged, but not so rapidly as our home production. According to the British official statistics, there were exported from Great Britain to the United States in 1850, 295,521 tons of iron of all kinds, which was swelled in 1853 to 518,000 tons. Thenceforth, it fluctuated from 385,899 tons in 1856 to 243,583 tons in 1859, and in 1862 (our civil war having put a stop to railroad making) it sunk to 53,236 tons. Thence it has pretty steadily risen, so that it reached 596 554 tons in 1869, and has gone still higher in the two subsequent years whereof we have no full statistics.

Note.—These returns are given in tons of 2,000 pounds each, as in the case of our American product. They will not coincide with our custom-house returns, being given for each calendar year; whereas our fiscal year closes with June.

Great Britain has exported railroad iron to all countries (about half of it to the United States) as follows:

Years.	Tons. (2,000 lbs.)	Years.	Tons. (2,000 lbs.)
1860	507,858	1866	557,783
1861	422,873	1867	650,239
1862	448,857	1868	653,507
1863	500,013	1869	1,003,350
1864	457,200	1870	1,187,337
1865	486,427		

Of this aggregate 336,500 tons were exported to this country in 1869, and 472,403 tons in 1870.

The production of pig iron in Great Britain is far ahead of that of any other country, being hardly less this year than 6,000,000 tons, or about treble that of this country. Yet it was but 180,000 tons in 1800, and had barely more than doubled twenty years afterward, when it reached 368,000 tons. Ten years later, it had not doubled again, being (in 1830) 673,417 tons; but about that time railroads were devised, and the British iron product again doubled in less than ten years, being 1,500,000 in 1840. Five years later, it stood very nearly the same; but in 1850 it had increased to 2,250,000 tons. In 1863, it had again doubled, being 4,510,000 tons. In 1869 (our latest full return) it was 5,445,757 tons.

France made 114,000 tons of iron in 1818, 750,000 tons in 1855, and 1,380,000 tons in 1869.

Prussia made 804,052 tons in 1866, against 400,000 tons in 1860.

Belgium made 319,943 tons in 1860, and 863,000 tons in 1869.

Note.—These statistics of European productions are given in tons of 2,240 lbs.

We had hoped to include in this exhibit a view of the distribution of iron-making throughout the Union, showing how steadily this industry is diffusing itself over the country, but we are disappointed. We know generally that the production of pig-iron in Missouri is already considerable and rapidly increasing; we know that it has recently been commenced, under highly favorable auspices, in Indiana; we know that Tennessee, Wisconsin, old Virginia, North Carolina and even Alabama are successfully smelting their own ores into good pig iron, mainly by aid of charcoal; but our returns from these States are provokingly meager and inexact. May we not hope that they will not long remain so?

The production of our rolling mills shows a steady annual increase during the last seven years. Here are the figures:

Years.	Rails.	Other than Rails.	Total. Annual Prod.
1864	335,369	536,958	872,327
1865	356 292	500 048	856,340
1866	430 778	595 311	1,026 089
1867	462.108	579,838	1,041,946
1868	506,714	598,286	1,105,000
1869	593,420	642,420	1,236 006
1870	620,000	710,000	1,330,000

Of the diverse kinds of iron produced by our rolling-mills, we have nothing like full returns later than 1866, when this country produced (of other than railroad) 593 311 tons of rolled or hammered iron, returned as follows:

	Tons.		Tons.
Bar and rod	279,192	Sheet	33,969
Nails and spikes	197,625	Hoop	16,459
Plate	71,507	Axle and other	49,559

This production was locally distributed as follows:

	Tons.		Tons.
All New England	87,571	Maryland	23,602
New York	70,197	West Virginia	24,395
New Jersey	48,616	Ohio	76,052
Pennsylvania	243,921	All others	20,955

For the facts embodied in the above exhibit we are indebted to the American Iron and Steel Association, through Mr. McAllister, Secretary.—*New York Tribune.*

Salisbury and Baltimore Railroad.

We are informed that Messrs. McGinnis and White, the contractors for the grading and masonry of the Salisbury and Baltimore Railroad, extending from Meyers' Mills to a point about one mile beyond Salisbury, Somerset county, Pennsylvania, have completed their work, and that the entire road is now ready for the cross-ties and ballasting. The severe wea her this winter has somewhat retarded the work, but is expected to have the whole road in operation early in the coming spring. This railroad traverses a new coal field of great value, and when it is once prepared for transportation immense quantities of superior bituminous coal will be shipped over it to Eastern markets.

☞ The Erie Railway Company has leased the Southern Central railroad from Owego to Fairhaven via Auburn, on Lake Ontario. This opens new coal fields. The same company has also leased the Goshen and Pine Island Railroad, running from Goshen to the New Jersey State line.

☞ It is reported that the Boston and Albany Railroad has agreed to lease the proposed Lee and Hudson Railroad, when completed, paying the stockholders twenty five per cent. of the gross earnings, and taking ten per cent. for the use of rolling stock.

☞ On the 10th of January the first car load of Pennsylvania coal passed over the Northern Pacific railroad from Duluth across the State of Minnesota to the present western terminus at the town of Moorhead, on the the eastern border of Dakota.

☞ Col. S. C. Slamaker, of Dauphin Co., Pa., has been appointed Chief Engineer of the Lancaster and Reading Narrow Gauge road, and will have a corps in the field at once to survey and locate the branch to Quarryville.

From the N. Y. Daily Bulletin.

A New Development of National Wealth.

COAL FIELDS OF THE KANAWHA OPENED.

During the past two years a great work has been going on toward completion, with that steady and vigorous, but quiet, activity which denotes earnestness and foretells success. And while most people who take any note of what is going on around them have seen the tokens of its presence and the evidence of its progress, very few have formed any conception of the magnitude and importance of the results which wait upon its consummation. The discovery of a new domain of mineral wealth, equal in extent and richness to the islands of Great Britain, rising out of the seas, close to our shores and within our national jurisdiction, would fill the national mind with interest and excitement. A fact, similar in importance and in future results, is being actually wrought out in the opening of the great Kanawha Valley of West Virginia, with its wonderful deposits of coal, and the neighboring region of unrivaled iron ores, by the extension of the Chesapeake and Ohio Railroad to the Ohio River.

The great natural advantages of this region traversed by the western half of the Chesapeake and Ohio Railroad, now nearly completed, and its incalculable riches in coal, iron, salt, timber, etc., have been long known and appreciated, and the restless fingers of American enterprise have been itching to get at them for years; but the absence of railroad facilities has rendered the extensive and profitable development, which they now invite, hitherto impracticable. Messrs. Daddow and Bannan, in their important work, entitled "Coal, Iron and Oil," refer to it in the following terms:

In no portion of our country, North or South, are there more inviting prospects to labor, enterprise and capital than are now presented in the great Kanawha Valley. Not only its unlimited mineral resources invite attention, but the best portion of the trade of the great Mississippi Valley may be diverted into the channel of the Kanawha by ordinary means. To those who have observed the prodigious growth of that trade and the still superior proportions it must assume in the future, the questions we are discussing of this new route to the East will not be a matter of speculation but of necessity. The routes now provided will not accommodate it, while the superior advantages offered by this route in the hands of a free and enterprising people cannot fail to attract attention.

Nearly 16,000 square miles of the best and most available portion of the coal fields of the American continent, lie in West Virginia, and the greater portion of this vast area nature has rendered of easy development, through the agency of the numerous streams which traverse it, and by the marvellous convenience of the manner in which she has located and distributed the choice varieties of bituminous, cannel and splint coal with which it abounds.

The work above quoted says of the Kanawha coal fields:

The coals of this region, generally, are better, purer, and more available for all the requirements of trade and manufacture than the coals of any other portion of the Alleghany coal field. The seams of coal are more numerous, and their thickness greater than in any other portion of this coal field. It can be mined cheaper and with more economy generally, under the same rates of labor, than in any other region in this country without exception. The markets of the West, or the great Ohio and Mississippi valleys, are open beyond any controlling competition to the trade of the Kanawha in *coal, oil, salt, iron and lumber*.

Referring to the neighboring iron regions, the same authority says:

This region of iron ores will perhaps rival any locality in our country—Iron Mountain, Pilot Knob, or Lake Superior not excepted, either in quality or quantity. There is no limit to the resources of brown hematite in this section. It exists in massive beds of great extent, and ranges through a vast area of country. We have seen beds of ore in this region equal to the celebrated Cornwall deposits, and can state, from practical experience, that there is no richer or purer iron ore of this description to be found. The miniature map (illustrating the text in the work from which we quote), shows the coal of the Kanawha to be in close proximity to this great region of iron, and connected with it by a large river, which levels, as it were, the mountains, and grades a uniform path through the huge Alleghanies.

* * * * * * *

It will thus appear that the great Kanawha Valley is not only a great natural mining and manufacturing region, but one that may enjoy the greatest trade that ever flowed from the mountains or the inland plains and valleys to the sea. The *coal, iron oil and salt* of this region are inexhaustible, and may be produced with the minimum of labor and expense, and, consequently, the maximum of profits.

We have long beheld the vast mineral resources of this part of the Great Alleghany coal-field with professional admiration, and have frequently called attention to their value. If we now seem partial to West Virginia, we can prove that our affections have always turned toward her unlimited stores of coal and iron, with an ardent desire to be able to pronounce the 'open sesame' which should expose her treasures to the world.

The foregoing is disinterested testimony given in 1866 before the present plans for opening and developing the regions refered to had been organized. The magic words which the author longed for the power to pronounce—the "open sesame" of the hidden treasures of the great Kanawha Valley—were spoken when Mr. C. P. Huntington and his associates, Messrs. A. A. Low, W. H. Aspinwall, Jonas G. Clarke and other far-seeing capitalists, assumed the control of the Chesapeake and Ohio Railroad and began to make real the vision of the Chesapeake Bay and the Ohio River united together by bands of iron, and the riches of the Kanawha, released from the confinement of centuries, flowing out East and West in streams of solid wealth.

☞ The certificate of incorporation of the Zanesville and Marietta Railroad Company has been filed in the office of the Secretary of State of Ohio. The termini of the road are the city of Zanesville and Marietta, and it will pass through the counties of Muskingum, Guernsey, Noble and Washington. Capital stock $500,000.

☞ The Leavenworth, Lawrence and Galveston Railroad Company has leased the Leavenworth and Lawrence branch of the Kansas Pacific road, and will commence running through trains from the Indian Territory to Leavenworth in February, as soon as the railroad bridge at Lawrence is completed.

☞ A cable telegram received in Halifax (N. S.) recently announced that the Glasgow and Cape Breton Railway Company had decided to extend their railway to Louisburg, and that the shareholders had doubled the amount of the original capital, increasing it to £200,000 stg.

Railroads in Nova Scotia.

The indications are that before many years pass away Nova Scotia will be threaded with railroads from one end to the other. In addition to the lines now in operation from Annapolis to Halifax, and from Halifax to Pictou, and now in course of construction from the New Brunswick and Nova Scotia boundary line to Truro, quite a number of other lines are projected in various directions. A line is to be constructed between Annapolis and Yarmouth, between Annapolis and Liverpool, between New Glasgow and the Strait of Canso, between the Strait of Canso and Louisbourg, between the Strait of Canso and some more northerly point in Cape Breton, and between Sydney and Louisbourg. Lines between other important points in Nova Scotia at present without railroad facilities will also no doubt ere long be felt a necessity which must be provided for.—*St. John News.*

☞ At the recent annual meeting of the Worcester and Nashua Railroad company the following gentlemen were elected directors for the ensuing year: Francis H. Kinnicut, Stephen Salisbury, Jacob Fisher, Thomas Chase, Asa F. Lawrence, Francis H. Dewey, Alex. H. Bullock, Calvin B. Hill and J. E. Smith. At a subsequent meeting of the directors Mr. F. H. Kinnicutt was re-elected president and Mr. T. W. Hammond, clerk and treasurer.

☞ The following gentlemen have been elected directors of the Philadelphia and Trenton Railroad Company: J. Edgar Thomson, Josiah Bacon, Washington Butcher, Jos. B. Myers, John M. Kennedy, Edward C. Knight, Saml. T. Bodine, Thomas A. Scott, H. J. Lombart, Edmund Smith, George B. Roberts and Geo. M. Dorrance.

☞ The Albany *Times* says that a contract has been made with a German syndicate through the banking house of Messrs. Seligman, in New York, for a loan of thirty millions of dollars to a company organized to build a railroad from New York to Buffalo via Albany. Active operations are to be commenced in the spring.

☞ Mr. M. J. Becker, of Steubenville, Ind., Chief Engineer of the Pittsburgh, Cincinnati and St. Louis Railroad, has been elected Chief Engineer of the Holliday's Cove Railroad. He will at once set to work with a new corps of assistants to survey the route from Holliday's Cove to Wheeling.

☞ The directors of the Chesapeake and Ohio Railroad Company have awarded to Brannan and Haggarty, of Baltimore, the contract for the execution of the Church Hill Tunnel at Richmond, Virginia, by which that railroad is to enter the city, and make a landing on James river.

☞ Holders of Pennsylvania Registered War Loan to the amount of $5000 and under are notified that interest on their loan will cease on May 1st, 1872, and that said loan, with accrued interest, will be redeemed forthwith on presentation at the Farmers and Mechanics' National Bank, Philadelphia.

☞ The Spartenburg and Union Railroad is to be sold at Unionville, South Carolina, on the first Monday of February inst., under decree of Court.

☞ The Pittsburg and Boston Mining company have declared a special dividend of $5 per share from the sale of the Lake Superior property, payable Feb. 1.

Commerce of the United States.

The *New York Journal of Commerce* has compiled a statement of the total imports and exports of all the ports of the United States for the last two fiscal years, ending June 30th. Both the imports and exports are given in gold values—the imports as entered at the Custom House at their foreign gold cost, and the exports, when cleared at their currency price, reduced to their gold value by allowing the average monthly premium on gold at the port of New York. It is not a little singular to note the remarkable agreement between the outward and inward movement for the last fiscal year. The difference between the imports and exports is only about ten thousand dollars in a total of over five hundred and forty-one millions.

Imports from foreign ports at all the ports of the United States for the fiscal year:

	1870.	1871.
Dutiable merchandise..	$415,817,537	$483,641,966
Free goods.....	20,159,964	35,951,784
Gold and silver.....	26,400,086	21,900,024
Total imports.....	$462,377,587	$541,493,774

Exports from the United States to foreign ports, reduced to their gold value:

	1870.	1871.
Domestic produce and merchandise	$376,651,156	$428,539,017
Foreign do.....	16,155,295	14,421,270
Specie and bullion....	58,155,966	98,543,885
Total exports.....	$450,962,417	$541,504,172

DESIRABLE
HOME SECURITIES.

THE FIRST MORTGAGE
7 PER CENT. GOLD BONDS
OF THE
WALLKILL VALLEY
RAILWAY COMPANY

Are offered for sale at 90 and accrued interest, in currency,
BY
MEAD & CLARK,
FINANCIAL AGENTS,
NO. 141 BROADWAY,
AND
ERASTUS F. MEAD,
BANKER,
CORNER, 25TH-ST. AND 3D-AV.

By exchanging United States Bonds for the Bonds of the WALLKILL VALLEY RAILWAY COMPANY, you increase your income over 40 per cent., and your principal about 25 per cent. and get a security EQUALLY SAFE.

OFFICE OF THE TOLEDO, PEORIA AND WARSAW RAILWAY COMPANY, No. 80 BROADWAY, NEW YORK, Jan. 30, 1872.

THE COUPONS FALLING DUE 1ST FEBRUARY on First Mortgage Bonds of this Company, (Western Division,) will be paid at the office of the Farmers' Loan and Trust Company, No. 26 Exchange-place, on and after that date, less Government tax.

JAMES F. SECOR,
President pro tem.

OFFICE OF THE ILLINOIS CENTRAL RAILROAD COMPANY, NEW YORK, Jan. 3, 1872.

A **DIVIDEND OF FIVE PER CENT.**, free of Government tax, has been declared by the Board of Directors of this Company, payable on the 1st day of February next, to the holders of full-paid shares registered at the close of the 13th day of January instant, after which and until the 7th day of February next, the transfer-books will be closed.

L. V. F. RANDOLPH, Assistant Treasurer.

NORTHERN PACIFIC BONDS

HAVE THIRTY YEARS TO RUN—PAYABLE, PRINCIPAL AND INTEREST (7-30 PER CENT.) IN GOLD—EXEMPT FROM UNITED STATES TAX—ARE A FIRST AND ONLY MORTGAGE ON THE ROAD AND ITS EARNINGS, AND UPON 50,000,000 ACRES OF TIMBER, MINERAL, AND AGRICULTURAL LANDS—EQUAL IN EXTENT TO ALL THE NEW ENGLAND STATES AND MARYLAND INCLUDED.

THE UNITED STATES HAS MADE SECURE THE PAYMENT OF THE BONDS BY THIS AMPLE AND UNPARALLELED LAND GRANT.

THE BONDS ARE ISSUED IN DENOMINATIONS OF $100 TO $10,000, COUPON AND REGISTERED, AND ARE OFFERED BY US AT PAR AND INTEREST IN CURRENCY.

ALL CURRENT SECURITIES RECEIVED IN EXCHANGE.

JAY COOKE & CO.

NEW YORK, PHILADELPHIA, AND WASHINGTON.

The Operation of Steam Railways in Cities.—The "Viaduct" Project.

There are some considerations respecting the future operation of Steam railways in cities and large towns, which, in minds of thoughtful railway managers, must be gradually asserting claims to more attention than they have heretofore received; and it may be well, at this time, to endeavor to give a right direction to the discussion which has arisen.

It is probably generally known that the tenure of the right of way for railways in the cities and towns of Europe—Great Britain, especially,—rests upon a widely different basis from that which exists in the United States. In Great Britain, the railway company has bought its right of way in the cities as well as in the country. It does not occupy any portion of the public highway, and its steam locomotives are not more subject to municipal control than other steam apparatus operated within corporate limits. It may run its trains when, where and as fast as it may be desirable. In our cities the steam railways occupy the public streets, under grants from the State Government, subject to constant "regulation" by municipal authorities. Of course the former plan of construction, involves a vast increase of the original cost. But its advantages are so apparent and numerous, that we doubt not that the question often suggests itself to those who are engaged in battling the difficulties of the other system, whether it be not the cheapest in the end. If the expenses which have been incurred by the Hudson River, the Harlem, and the New Haven railways, during the past twenty-five or thirty years, in hauling cars with horses, in paying flagmen and guards, in re-imbursing damage to life and property, and in contending with the municipal authorities and organizations of the people antagonistic to them, could be aggregated, it would show a very large sum of money—sufficient, it has been estimated, to have paid interest on the increased cost of originally building on the English plan so much of those roads as lies within the corporate limits of our city.

The subject is one of much importance in relation to the future greatness of New York city. The greatly increasing travel between the New England States and that portion of the Union which lies to the South of us, is yearly more and more incommoded, notwithstanding the most strenuous efforts which the railway companies have made to facilitate the transfer of passengers and baggage through New York City. It is not our purpose to comment upon or even state these disadvantages; suffice that they exist, and are wholly the fault of the system originally adopted for the building of railways in cities and large towns, and cannot be justly attributed to any defects in the present management. But it must be clearly foreseen, that sooner or later a railway running West from Hartford, and crossing the Hudson River at or near Newburgh on a suspension bridge, will permit a through train, with all its attendant comfort, economy, security, and speed, to be sent from Boston to Washington. It could hardly fail to divert from us a large portion of travel and commerce.

Is there any good reason for the continuation of existing difficulties except the present expense? And if there is none, is it not time that our railway magnates should look this phase of the question fairly in the face? The agitation of the project for a "Viaduct railway" is gradually familiarizing people with an undertaking which a few years ago would have been deemed impossible; and the day may not be far distant when the trains on the great railways which enter our city from the North and the Northeast will be brought down to the neighborhood of the City Hall at full speed, on tracks wholly removed from the public highways, and held by the indisputable tenure which purchase gives. This is the true solution of the question of a Viaduct railway. It will take time and much money to reach it, but necessity has accomplished greater works in unexpectedly brief periods.

Chicago and Northwestern Railway.

The completion of the Chicago and Northwestern Extension to Menominee was celebrated at Green Bay, Wis., on the 17th ult. The extension, as it is called, stretches from Green Bay up the shore a distance of fifty miles to Menominee, and opens up the great lumber regions about Peshtigo, Penzaukee, Big and Little Suamico and Menominee—the region, in fact, traversed by the

terrible October fire; so that Chicago is now in direct rail communication with the very heart of the great lumber region of Wisconsin. It is now the intention to vigorously push the surveys from Menominee to Escanaba, and up the river to the Menominee iron region.

Philadelphia, Wilmington and Baltimore Railroad.

The earnings of this road for the years ending October 31, 1870 and 1871, were as follows:

	1870.	1871.
From passengers	$1,530,240 69	$1,532,820 03
" freight and exp.	878,494 16	1,044,760 50
" rents	4,818 96	8,265 90
" mails	39,891 24	39,891 24
" miscellaneous	123,701 84	53,127 39

United States tax paid under protest	10,322 96	
		851,910 65
Leaving balance to credit of revenue October 31, 1871		$494,889 23

The gross receipts were larger than those of 1870 by $117,242 24, and the operating expenses exceeded those of 1870 by $67,238 67. A large portion of the increased business was derived from the transportation of fruit and vegetables from the Delaware Railroad and its feeders. The peaches transported, amounted to two million six hundred and fifty thousand baskets, or over five thousand car loads of eight tons each. This shows that this business has more than quadrupled since 1865.

This company encourages the cultivation of the Peninsula, by transporting manures at a slight advance upon cost, and by moving the fruit at high speed, in cars adapted to the business, mounted upon springs and trucks like those of passenger cars, and well ventilated; while charging for the service, rates which are very low, considering its character. The result has been a constant and large increase of the area devoted to the growth of peaches, strawberries and other fruits. And notwithstanding that the State of Delaware, by exacting from this company, more than thirty times as much tax proportionally, as is assessed upon us by the other States into which your road passes; has added largely to the cost of transportation by rail, and consequently to the rates charged therefor; great profits have resulted to the fruit growers, encouraging them to invest more and more capital and labor each year in the cultivation of fruits and vegetables.

It is to be hoped that the next legislature of Delaware, aroused to a sense of the wisdom of a policy which will encourage enterprise, and promote the prosperity of the State; will repeal the existing unequal and unjust tax laws, and substitute for them such laws as will divide the State burdens justly upon all interests, instead of throwing them as at present, mostly upon the patrons of this company.

The work upon the new road of this company between Philadelphia and Chester, called the "Darby Improvement," while under construction but which when finished will be a part of the main line; has gone steadily on. But the contractors have been somewhat delayed by strikes and scarcity of labor, and have failed to fulfil their contracts so far as the question of time is concerned. The work however, has so far advanced, as to justify the expectation that it will be ready for use by the first of June next.

The value of land upon the new line has more than doubled within the year, and we are encouraged to expect that we shall aventually have a large local traffic upon that part of the road.

In May last, fire was communicated from an adjacent lot to the engine house and shops at Wilmington, causing the loss of a portion of the buildings, with a large stock of oil, waste and other material; and serious injury to many locomotives. Insurance covered all but about ten thousand dollars of the loss. All has been renewed or replaced; and the cost thereof, including over five thousand dollars worth of betterment was included in the operating expenses of the year. The lot of ground upon which the fire originated has since been purchased by this company, and the buildings will be more secure from fire henceforth.

It will be observed that a large outlay was made during the year for repairs of track. Over thirty-five miles of single track were re-laid with steel rails, or with steel-head rails. Our experience each year fully justifies the course hitherto pursued, of replacing worn-out iron rails, with steel rails; and for two years past, all renewals have been made with the steel rails, excepting upon a few miles of track where the comparative value of steel head rails is being tested.

Your directors from personal observation are enabled to report that all depreciation of any portion of the property of the company has been compensated by the general improvement of other portions, and that the whole property is in a sound and wholesome condition, while the prospect of prosperity in the future is encouraging.

The earnings of the New Castle and Frenchtown Railroad were:

	1870.	1871.
Passengers	$22,986 53	$25,014 22
Freight	44,284 22	57,780 60
Mail	881 24	881 24
	$68,151 99	$83,676 06

The company have 61 locomotives, of which 58 are coal burners and 3 wood burners. The number of miles run by engines over the Philadelphia, Wilmington and Baltimore Railroad, including service on Port Deposit Branch, was 1,065,517. Miles run on Delaware Railroad line, between Wilmington and Delmar, by coal burning engines, 197,885; by wood burning engines, 92,064.

The car equipment consists of: 5 twelve-wheel passenger, 2 twelve-wheel chair, and 1 twelve-wheel baggage car; 71 eight wheel passenger, 10 passenger and baggage, 3 compartment, 4 chair, 19 baggage, 6 baggage and mail, 17 express, 2 post office, 3 milk, 1 pay, 615 house, 68 stock, 267 platform, 112 dump, 62 truck, 31 lime, and 11 tool, construction, etc., cars.

Vice President.—ENOCH PRATT.

Directors.—Isaac Hinckley, Samuel M. Felton, William Sellers, Samuel Welsh, Jesse Lane, Joseph Bringhurst, Samuel Harlan, Jr., Thomas Kelso, Enoch Pratt, Thomas Donaldson, Thomas Whitridge, Samuel M. Shoemaker, Jacob Tome, Nathaniel Thayer, William Minot, Jr.

Secretary and Treasurer.—ALFRED HORNER.

A Year's Petroleum Production.

The Titusville (Pa.) *Courier*, 25th ult., gives the annual statistics of the production of petroleum in the Pennsylvania oil region, by which it appears that the total production for 1871 was 5,755,057 barrels, equal to a daily average of 15,767 barrels. The average price realized at the wells was $3 90 per barrel, or a total sum of $22,461,171. The number of wells gone dry show that each well continues to produce on the average for thirty-four months. The new wells put down cost for boring $3,000,000 and for engines and rigs nearly $1 000,000 more. Thus the total cost of new explorations to be paid for out of the profits of current production was about seven and one quarter millions of dollars.

Hartford and New Haven Railroad.

The income of this road for the ten months ending September 30, 1871, is as follows:

From passengers		$836,624 42
" freight		738,425 04
" expresses		40,965 55
" mail service		21,458 57
" rents and wharfage		10,721 57
		$1,648,195 15
Expenses, viz:		
Repairs of road and bridges	$332,329 25	
Wood, coal and oil	94,876 06	
Material and labor on engines and cars, including new cars and engines	214,161 67	
Transportation account and general expenses	359,993 29	
Station repairs and improvements	46,209 38	
Lost and damaged goods, gratuities, etc.	3,393 43	
		1,050,963 08
Net earnings		$597,232 07
National and State taxes	$23,534 52	
Balance of interest	47,786 34	
		71,320 86
Leaving a balance of		$525,911 21
The gross earnings for the months of October and November, 1871, were		$364,084 09
Add gross earnings for ten months		1,648,195 15
		$2,012,279 15
The proportion of current expenses for the two months, is	$175,160 51	
State taxes paid October, 1871	95,621 52	
	$270,782 03	
Add expenses, interest, and taxes for ten months	1,122,283 94	
		1,393,065 97
Total earnings for 12 months		$619,213 18

The gross earnings for the 12 months exceed by about $7,000 per month, the average monthly earnings for the 15 months next preceding. The President in his report says:

At the annual meeting of the stockholders, holden in September, 1869, it was ordered that the fiscal year of the company shall terminate with the 30th of November in each year, with a view, chiefly, to correspond with the period at which reports to the Legislature of Massachusetts were required by the laws of that State. At the next succeeding session of that Legislature, a change of the law required that reports by railroad companies should present the operations of the year ending on the 30th of September. The laws of New York also require reports from railroad companies for each year ending at the same time. As the New York and New Haven company are required to make annual reports to the State of New York, and this company to the State of Massachusetts, and both to the State of Connecticut, the Joint Board of managers of the two roads have advised that the fiscal year of each shall terminate on the 30th of September in each year. We, therefore, present to you in this report a statement in detail of the operations and business of the company for a term of ten months, from the 1st day of December, 1870, to the 30th day of September, 1871, with such information as to the business of the two succeeding months as to afford the substantial results of the operations of the twelve months.

The Windsor Locks and Suffield Railroad, with its depot buildings and appurtenances, has been completed by an additional expenditure during the year past of $23,156 67, and its earnings are fully equal to our expectations.

In May last, the capital stock of that company, in accordance with the provisions of its charter, and of the resolutions of this company at its annual meeting in September, 1869, was merged in the capital of this company, thus adding two hundred thousand dollars to that capital.

This additional stock has been placed in the name of Charles M. Pond, Treasurer, in trust for this company, to be held by him subject to its order.

The new track between Hartford and Newington, alluded to in our last report, has been completed and in use since July last, giving the company now an uninterrupted double track from New Haven to Springfield. The expenditures for this purpose since the last report, amounting to $62,301 53, have been charged to the cost of the road.

There has been constructed by this company, during the past season, at Hartford, a double tunnel over three hundred feet in length, under Albany and Windsor Avenues, near their intersection, constisting of two parallel arches, each for two tracks, one of which arches is for the use of this company, and the other for that of the Hartford, Providence and Fishkill Road; one-half the whole cost to be re-paid to this company in installments, and title to be given when payment is completed.

The necessity of maintaining the public travel, including that by a horse railroad over two important streets, and the uninterrupted passage of more than forty regular, and many extra trains daily under the same streets during the progress of the work, with the treacherous character of the soil, added greatly to the difficulties attending this work. That it was completed without any serious inconvenience to the travel on the streets, or delay of a single regular train, is due to the care and vigilance of our superintendent, E. M. Reed, Esq., by whom all the plans were made, and under whose constant personal supervision the work was executed.

A new passenger depot has been constructed at Wallingford station, and is in use.

A new coal pocket of large capacity has been constructed on the coal wharf at New Haven; an extension of the freight house at Yalesville, and additional side tracks and other improvements at various stations to accommodate the increasing freight business of the road, have been added during the year.

The equipment has been increased by the addition of one new locomotive, constructed in our own shops; and one of greater power than any heretofore in use by the company, intended for freighting purposes, purchased. These, with extensive repairing and partial rebuilding of several of the older engines, place our equipment in better and more serviceable condition than at any previous date.

The Westinghouse air brake has been placed upon all our trains, and our experience thus far in their use, justifies, in our opinion, the expenditure for this purpose, in avoiding materially the dangers of serious accident to the trains.

Resolutions accepting the provisions of the act of the general assembly at its late session, authorizing the merger and union of this company with the New York and New Haven Railroad Company, will be submitted for your consideration and action; and for fixing the termination of the fiscal year of the company hereafter on the 30th day of September in each year.

The income of the company from all sources for the ten months ending September 30, 1871, is as follows:

Cash on hand December 1, 1870	$282 500 66
Earnings of the road as above	1,648,195 15
123 shares scrip stock	9,840 00
Real estate	16,928 45
Total	$1,957,464 26
Thus accounted for—	
Dividends	$433,319 00
Interest	47,786 34
Operating and repairing road, etc.	788,198 65
Windsor Locks and Suffield R. R.	21,812 49
Meriden Quarry Branch	2,492 70
State and National taxes	23,534 52
Steel Rails	125,984 44
Newington new track	12,301 58
New tunnel, Hartford	102,672 74
Wallingford depot	13 067 79
Camp Street Bridge, Meriden	5,000 00
New wharf, New Haven	5,623 77
Locomotive engine	12 000 00
Real estate	350 00
Balance debts due company increased	47,046 34
Cash	316,273 95
Total, as above	$1,957,464 26

The following from the ledger presents a general statement of the affairs of the company, Sept. 30, 1871:

Capital stock. (full)	$3,500,000 00
Capital stock. (scrip)	1,500,000 00
Bonds	754,000 00
Contingent fund	526,071 00
Reserved fund	150,000 00
Profit and loss	237,911 21
Dividends unpaid	5,709 00
Debts due by the company	73,394 44
	$6,747,085 65
Railway, including double and branch tracks, depot buildings, grounds, etc.	$4,251,189 92
Real estate, land and dwellings at and between New Haven and Springfield	114,858 98

☞ Work is being rapidly pushed forward on the Montpelier and Wells River Railway. Track laying will commence in Montpelier next May.

Michigan Railroad Subsidies.

The Detroit *Tribune*, just before the announcement of the decision of the Michigan Supreme Court against the validity of municipal subscriptions to railroads, made the following statement of the subsidies then voted, which, by the recent decision of the United States Circuit Court, will probably be collected again:

	Amount received from towns by company.	Amount in hands of third parties.
Jackson, Lansing & Saginaw	$208,000	$208,000
Flint and Pere Marquette	75,000	75,000
*Paw Paw Railroad	36,100	28,100
Kalamazoo, Allegan & Grand Rapids	95,000	95,000
†From White Pigeon to Kalamazoo	103 000	88,000
Michigan Lake Shore	50,000	50,000
Port Huron and Lake Michigan,	117,000	117.200
Grand Rapids and Indiana.	220,000	220,000
Ionia and Lansing	103,450	95,450
Michigan Air Line	85,500	85.500
Detroit and Howell	48,505	48,505
Other roads	294,200	299,200
Total	$1,445,955	$1,399,955

*Of the bonds of this company $8,000 have already been paid.

†Of the bonds delivered to this company $25,000 have already been paid.

Of action taken under the general law of 1869, as far as the pending cases can affect it, the following is a statement:

	Amount delivered to comp'y by State Treas.	Amount in third parties' hands.
Michigan Air Line	$25,000	$25,000
Kalamazoo and South Haven	36,000	36,000
*Chicago and Michigan Lake Shore	97,500	13,500
Fort Wayne, Jackson and Saginaw	48,500	23,500
Port Huron and Lake Michigan	42,000	42,000
Other roads	50,000	50.000
Total	$299,000	$190,000

*Of the bonds delivered to this road which have not been sold, $4 000 have been paid by a direct tax, and on the remaining $80,000 cash advances have been made by outside parties.

Of the last columns in the foregoing tables the following is a summary:

Amount still in hand of third parties:	
Voted under special acts	$1,399,955
" " general law	190,000
Total	$1,589,955

"The result of our investigation may thus be briefly stated: The towns and counties of Michigan have thus far voted to aid railroad enterprises in which they are interested to the amount of about (probably over) $6,000,000. Of this aid about $1,750,000 has been granted upon the diverse conditions embodied in the various special enabling acts to be found in our statute books, and $4,250,000 upon the clear and precise terms contained in the general law of 1869. Of the last named amount over $3,600,000 have already been deposited with the State Treasurer. The companies aided have thus far obtained actual possession of $1,744,955 in bonds, of which $37,000 have been already paid, $118 000 still remain in their possession, and the balance is now in the hands of third parties. This $1,589,955 has been taken by capitalists and corporations, by contractors and employes, by people of all classes and sections."

Governor Baldwin's estimate of the amount of railroad aid bonds fully earned and outstanding at the time of the Michigan decision, given in his message to the special session of the Legislature in 1870, was as follows:

Bonds issued under special acts of 1864 and 1865, approved by Gov. Blair	$858,600
Bonds issued under special acts of 1865, approved by Gov. Crapo	312,700
Bonds issued under special act of 1867, passed over Gov. Crapo's veto	28,000
Bonds issued under laws of 1869, approved by Gov. Baldwin	447,000
Total	$1,656,200

Imports of San Francisco.

The value of foreign (dutiable) imports of merchandise at San Francisco during the year 1871 is the largest on record, comparing as follows with previous years:

1864	$10,415,913	1868	$15,130,295
1865	10,333,946	1869	15,582,278
1866	13,941,097	1870	12,956,188
1867	14,949,558	1871	17,542,993

The sources of the imports for the past two years show the following variations:

	1870.	1871.
Great Britain	$3,679,265	$4,297,089
France and French possessions	2,167,413	1,532,351
Germany and Belgium	593,122	344,838
China	1,943,479	4,690,838
Japan	804,611	1,872.948
South American (less Brazil)	839,748	755,238
Mexico & Central America	733,854	1,288,626
Brazil	.....	124.695
Hawaiian Islands	725,955	1,054,324
Australia	189,852	152,327
Spanish possessions	37,414	435,674
Dutch East Indies	.....	402.640
Cuba	354,824	365,280
All other countries	886,016	226,180
Totals	$12 955,183	$17,542,993

The diminished imports from France and Germany were attributable to the war. With China, Japan, Central America and the Hawaiian Islands there has been a remarkable increase in our import trade.—*San Francisco Bulletin.*

Diamond-toothed Saw Quarrying Machine.

One of the most noteworthy wonders of this prolific age of invention is a diamond toothed-saw quarrying machine, recently perfected by Vermont stone workers, that bears the same relation to the wealth of the quarry that the saw-mill does to the products of the forest. The main features are simple, and consist of a straight saw armed with diamond points moving back and forth through the stone, with drills working vertically to free the ends of the kerf. The diamonds employed are of the black variety, on a half-inch width, and with a six horse-power engine can be sunk in the solid quarry from six to twenty-four inches per hour, according to the hardness of the material operated upon—the machine having been tested on every grade, from the toughest flint to the easily worked marble, leaving at one operation a smoother face on the harder stones than can be produced otherwise by days of labor. The economy of the machine is shown to be great by the fact that after the first invasion of a quarry by its irresistible teeth (which, in this primal operation, of course smooth but one face of the rock), at all subsequent removes to the centre of the mine two faces of the stone are developed by each sinking of the saw. Besides, the great waste occasioned by the old method of drilling and blasting into valuable quarries is entirely overcome, not a foot of the material being lost if surveys are carefully made. The saw on exhibition can be sunk into the hardest stone through a kerf of eleven feet to a depth of four feet ten inches, but smaller machines can be constructed to answer the varied demands of quarrymen. The instrument is very compact, and one of the power displayed can be operated by two men, whose services, together with the fuel consumed, will amount to less than ten dollars a day, effecting an estimated saving of labor of fifty men, and reducing the cost of solid building material one-half.

Raleigh and Augusta Railroad.

A bill has been introduced in the South Carolina Senate to charter in that State the Raleigh and Augusta Air Line Railroad Company, a corporation created by the laws of the State of North Carolina, with power to construct through that State a railroad with one or more tracks from any point on the State line where the road may enter the State to such point on the dividing line between that State and Georgia, near the city of Augusta, as the company may select. The location of the railroad to be made on such route as the Board of Directors of the Company, after proper surveys, may direct, and they are also authorized to construct branch roads from the main track to any other points or places in the State. Said branches not to exceed 100 miles. The act also authorizes any incorporated city or town or village which may be interested in the construction of the branches to subscribe to the capital stock of the company.—*Augusta Chronicle.*

Norfolk and Lynnhaven Bay Road.

A company composed of some of the most reliable and substantial citizens of Norfolk, Va., has been formed for the construction of a railroad from that city to the mouth of Lynnhaven Bay. These gentlemen have been quietly at work maturing their plans, and are now in a condition to carry them out to a successful issue. A charter has been applied for from the Legislature, and parties are now in Richmond to effect that object. The road will be constructed in the most substantial manner, and work will be commenced as soon as the charter is obtained. The greater part of the stock has been subscribed, and there will be no difficulty in disposing of the remainder. The right of way has been secured by the donation of lands on the route—four hundred acres having been donated. The distance from Norfolk to the proposed terminus of the road at the mouth of Lynnhaven Bay is only eight miles by survey over easy grades. The company proposed to build a breakwater at the mouth of the bay, so as to afford a good and safe harbor for shipping. The road will open a rich and productive country, and shorten the distance from Norfolk to New York, making a considerable saving of time in the passage between the two ports.

Progrers of Ecuador.

The Republic of Ecuador appears to have become an exception to the condition of anarchy which characterizes most of the South American republics. The encouraging progress made by that State may be inferred from the fact that while in 1869 its public revenues hardly reached $1,200,000, in 1870 they had advanced to more than $1,900,000, or an increase in one year of over fifty per cent. Last year the Government abolished the oppressive discriminating head tax imposed on the Indians under Spanish rule and retained under the Republic until that date. The arbitrary exaction of forced loans from the capitalists and business men of the country was also at the same time prohibited. A liberal system of internal improvements is being vigorously prosecuted, while, in addition to the prompt discharge of all current expenses and claims, a considerable sum is being annually contributed to a sinking fund for the liquidation of the public debt incurred by the former administration. An agent of

the Government is now in the United States engaged in the purchase of tools and machinery for the purpose of carrying out a variety of projected public improvements, and he is also authorized to employ a number of competent civil engineers for the service of the Republic. When the numerous railroad projects of Central and South America shall be carried out we look for much closer commercial relations between the United States and the west coast.—*Baltimore American.*

Massachusetts Passenger Railroads.

In the JOURNAL of January 27, 1872, we inserted a general table of the capital, operations and results of the Steam Railroads of Massachusetts from the Report of the State Railroad Commissioners. We then had the pleasure of speaking very highly of said report as a decided improvement on all previous similar reports both in form and completeness. Having since received the returns of the Passenger Railroads to the same authorities, we give in the present issue of the JOURNAL a very valuable abstract of their contents, premising that in all that reports should be they pre-eminently and satisfactorily sustain our aforesaid eulogium on the form and substance of the first division of the subject.

From these reports however it does not appear that the urban and suburban passenger railroads in Massachusetts have been as successful in a pecuniary point of view as might have been anticipated in so thrifty a State as Massachusetts, and especially in the city and suburbs of Boston, in which by far the largest moeity of the total mileage is located.

We add up the leading columns of the table we have prepared with the following results—

Capital stock paid in	$5,041,920
Bonded debt, chiefly 6s	1,040,400
Floating debt	785,513
Total investment	$6,867,833
Miles of track in use	176.26
Passengers carried in cars	36,776,093
Gross earnings from traffic	$2 318,005 63
Operating expenses	1,942,581 40
Net revenue	$875,124 23
Dividends after interest	$273,418 26

The dividends as here stated were paid on $2,300,550 capital, which, if the statement of total capital be correct, no less a sum than $2,741,370, more than one-half the total, is left without any returns, and is for the present sunk. The total dividend on the paying capital was 12 per cent., but on the total capital only 5½ per cent. It is fruitless to search for the cause of this anomally. The travel appears to be brisk, and the gross income therefrom liberal, and in fact there would appear to be only one difficulty, that arising from excessive expenditures in the operating, or manipulating the defaulting lines. There has been no excess in the cost of construction, and for the most part the lines are amply equipped at a cost that would astonish our New York speculators. The fact is that capitalists have in a large number of instances invested in these railroads moderate sums so as to give official positions to their poorer relatives, and thus shift the burden materially from their own shoulders and place it on those whose means are coaxed into railroading for dividends. Therefore, until a better standing is made, there ought to be no further addition to railroad investment. That matters are worse in New York is not material to such a conclusion.

Horse Railroads of Massachusetts.

A tabular statement of the Horse Railroads of the State, their Capital and Cost, Earnings and Expenses, Dividends, &c., for the year ending September 30, 1871.

[Prepared from the Third Annual Report of the Board of Railroad Commissioners.]

American Railroad Journal.

Saturday February, 10, 1872.

Stock Exchange and Money Market.

There has been a much less urgent inquiry noted for Money, during the week, and the market has been working more favorably for the borrowing interest, with call loans quoted down to from 5@7 per cent. and mercantile discounts at from 7@9 per cent. per annum. The available supply has been more liberal and lenders have been generally more accommodating in their views. The somewhat exciting war talk of Monday, growing out of the reports from England, had but little, if any, influence on the movement. The city banks added nearly 1¾ millions to their loan and discount average, during the week, while reducing again their outstanding circulation slightly. The U. S. Sub-Treasury reduced its currency balance nearly two millions. It made a gain of about 2¾ millions in its coin reserves. Its currency balance at the close of business on Tuesday was $6,484,972, and its coin reserve, $71,267,590.

The amount of U. S. currency outstanding on the 1st inst. was $399,067,070 of all issues, including of Old demand notes, $92,681 25; legal tenders, new issue, $146,627,447; issue of 1869, $210,872,553; one year notes of 1863, $113,187; two year notes of 1863, $37,752 50; two year coupon notes of 1863, $31,952 50; compound interest notes, $672,480; fractional currency, first issue $4,391,783 90; second, $3,190,686 16; third, $4,513,278 88; fourth, first series, $18,602,585 64; fourth, second series, $9,920,682 35.

The city banks, in their latest return, show an increase of $227,500 of legal tender notes, with a reduction of $1,242,100 of specie, and of $167,500 of deposits; also an increase of $1,729,400 in their loan and discount averages, and a reduction of $70,200 in their item of circulation. The city bank exchanges, last week, averaged $92,475,900, and thus far, this week, 101½ millions daily. The banks now hold $8,271,050 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $28,986,100, against $26,233,573 same time last year. The city bank deposits are now $220,906,700, against $215,388,595 week ending Feb. 4, 1871. The legal tender reserve amounts to $46,565,800, against $54,187,393 same time last year. The circulation now stands at $28,218,700 against $31,764,129 same time last year. The loans are now $282,610,400 against $270,789,777 at this date last year.

The U. S. Sub-Treasury reduced its currency balance $1,915,686 and increased its coin reserve $2,785,971 as the result of the week's business. The receipts of the office were $5,675,547 in coin, and $2,367,177 in currency; payments, $2,889,576 in coin, and $4,282,863 in currency. The office received $3,631,000 in coin or its equivalent, from customs; and disbursed $938,955 of coin interest.

The receipts of the Sub-Treasury Office in January were $112,064,701, including $13,696,426 from customs; payments, $116,752,896, including $15,184,566 of coin interest and $1,345,420 of currency interest on the public debt.

Government revenues yielded more liberally last week. The excises yielded about three millions, and thus far since July 1, 1871, about 78¼ millions. The customs at the port of New York, last week were $3,542,943; at the outports, equal to about $1,200,000 more, all in coin, or coin certificates.

The Treasury Department reports disbursements, on executive accounts, for January, of $12,836,024, as follows: War, $3,204,641; Navy, $2,538,124; Interior, $600,004; Civil (miscellaneous) $6,413,255.

Under the Treasury financial programme for the month of February, Government will market Gold, during the month, as follows: Thursday, Feb. 18, $1,000,000; Wednesday, 21, $1,000,000. And buy in Five-Twenty bonds as follows: Thursday, Feb. 15th, $1,000,000; 29th $1,000,000.

The gold speculation has been more spirited, and the dealings have been quite extensive, as indicated by the higher daily average of the clearances at the Gold Exchange. The apparently warlike tenor of the advices from England, on Monday, relative to the General Conference negotiations, served to stimulate operations and to strengthen the price. The later and more pacific reports were against a buoyant movement, on speculative account. The customs demand was more active, while the export drain was very light. The range of the price during the week has been from 109¾

@110¼ and the closing quotation on Wednesday was 110⅛@110¼ against 109⅞@110 the preceding Wednesday. The specie outflow, last week, was only $44,980. The Gold Exchange Bank clearances have averaged about 48⅜ millions a day during the week.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from July 1, 1871, to Feb. 4, 1872 $56,298,378, against $60,703,678 same time in 1870-'71.

The customs demand for Gold last week, averaged $605,167 a day; thus far, this week, it has averaged $639,000 a day or equal to a weekly aggregate of $3,834,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $13,137, and since Jan. 1, 1872, $107,189 against $194,774 same time in 1871. The total customs revenue of the Government, in coin, at this port, from July 1, 1871, have been $93,044,095 against $85,141,095 same time in the preceding fiscal year 1870-'71.

The export drain of specie was $44,980, last week, against $1,423,699, same week preceding year. The shipments since July 1, 1871, have been $24,197,449 against $44,527,654 same time in 1870-71.

Foreign Exchange has shown a fair degree of steadiness, on a moderate call for prime bills, which have not been offered with much freedom. Bankers' sixty day bills on London closed on Wednesday at 108⅞@109⅛; sight bills on London, 109½@109¾.

The produce exports from this port, week ending with Feb. 6, were to the currency value of $5,308,173.

Government securities, though generally quoted comparatively strong as to price have been unusually quiet. The public debt statement of Feb. 1, showed a further liquidation of $5,633,462 in January. The later dealings in the public funds indicated rather less firmness.

U. S. sixes of 1881 closed here on Wednesday of the current week at 115⅛@115¼; U. S. Five-Twenties of 1862, (other than the bonds called in) 110⅜@110⅝; U. S. Five-Twenties of 1864 at 110⅛@110⅜; U. S. Five-Twenties of 1865, 111⅞@111¼; U. S. Five-Twenties of 1865 consolidated, 110¼@110½; U. S. Five-Twenties of 1867, 111½@111¾; U. S. Five-Twenties of 1868, 111¾@112¼; U. S. Ten-forties at 110@110½; U. S. Fives of 1881 (Funding Loan) 108¾@109. Six per cent. currency bonds, 114⅝@114⅞.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Jan. 24.	Jan. 31.	Feb. 7.
Consols	92⅝	92½	92⅛
U. S. 5-20's of 1862..	92¼	92⅛	92⅛
U. S. 5-20s, 1865	93¼	92¾	92¼
" 1867	93⅝	92¾	92¼
" 10-40s	92	91	90¾

State bonds continue in moderate demand, at about previous figures, in most instances.
